C·Bath

A NEW BATHROOM EXPERIENCE BY COSENTINO

C-Bath is Cosentino's comprehensive approach to reimagining the bathroom space through design and technology.

A complete vision of the space from a new perspective. Innovation in the design of unique and personalised atmospheres, featuring large format wall and floor cladding and minimum number of joints, colours and textures in perfect balance, minimalist washbasins and shower trays designed in detail. Manufactured with state-of-the-art materials such as Silestone, Dekton and Sensa, C-Bath gives a fresh look to your bathroom.

C-Bath is the experience of designing a bathroom to suit you, a personal space in which to find serenity and well-being: a bathroom to be lived in.

Bathrooms where creativity is at its best with The Bathelier: exclusive collections created by designers from all over the world for C-Bath.

A creative look at the bathroom space where art and functionality converge.

We seek a **more valuable, meaningful** and more comprehensive benefit.

Enriched and balanced **with the positive impact of everything we do.**
Good for people's lives, the development of their communities **and the planet we live on.**

A growth that harmonises **the benefits of today with those of the future.**
A growth that is responsible for the **consequences of our activity.**

A benefit to keep growing, but **in an ever better world.**

Photovoltaic plant at Cosentino Industrial Park

Meaningful
Design to Inspire
People’s lives.

**Cosentino
Sustainability**

At Cosentino we approach sustainability as a collective commitment that stems from the individual involvement of those that are part of Cosentino.

Our continuous improvement efforts involve a constant analysis of our entire value chain – from the procurement of raw materials to the delivery of end products to customer.

At Cosentino we are strongly committed to the 2030 Agenda promoted by the United Nations. The company, in view of its position as a global leader in the production and distribution of innovative surfaces for decoration and architecture from its Almería base, is committed to driving the local and global sustainability efforts.

Water

Since our inception, we have appreciated the importance and understood the challenges of proper water management.

This has motivated us to implement a sustainable use policy maximising the efficient use of water resources in the different production processes.

We use cutting-edge technology to achieve 100% recycled water in all our production processes in Cosentino’s industrial park.

Additionally, we use 100% of surplus water to irrigate green areas.

Waste treatment and recovery plant (CoMA)

Materials

We are aware of the importance of making the most of the materials we work with, both from the beginning of their life cycle to the end of the value chain.

With this goal in mind, in recent years we have embarked on an ambitious R&D project called ‘Circularity’ to reuse the materials from which we manufacture our products.

Another action is the disruptive Hybriq+® technology that brings about the new generation of Silestone. Hybriq+® contains a minimum of 20% recycled materials and is manufactured using only renewable energy and 100% recycled water.

100% recycled water in all our production processes

Cosentino CO₂ Neutral

We offset our CO₂ emissions for the entire life cycle of the product.

The ultra-compact Dekton stone is classified as Carbon Neutral.

We have identified those projects that meet the requirements for responsible offsetting and that, in turn, have a strong social dimension that contribute to the achievement of the Sustainable Development Goals of the UN’s 2030 Agenda.

The project chosen in 2019 for the offsetting of CO₂ emissions has an important direct impact on sustainable development by supporting the local economy, providing training and job opportunities.

Care for the Planet. Restoration of natural spaces in Cantoria, Almería.

The Bathelier

The Bathelier

by Cosentino

A unique vision of creative bathrooms.

The Bathelier is Cosentino’s concept that embodies the vision of a unique, experience-oriented space through renowned designers who interpret the bathroom of the future: unusual, unique and seamless. Iconic spaces with a focus on materials that elevate and redefine the bathroom.

An exclusive portfolio of bathroom solutions, with unique shapes, evocative textures and geometries that combine seamlessly, uniformly and sculpturally. A canvas of colour that transforms the bathroom.

The Bathelier is the result of a creative process that pushes the boundaries of design, generating unique environments that breathe and inspire us. Environments that move us.

REMY MEIJERS

X
The Bathelier

“A bathroom should be a space to unwind and clear the mind. It is a place where you start and end your day, so it should be as calm and relaxing as possible. It should also have plenty of room to move around, which is why it is better to refer to it as a bathing space rather than a bathroom”.

In 1995, Remy Meijers graduated with honours from the Department of Interior Architecture and Furniture Design at the Utrecht School of the Arts. In his work, all elements are perfectly in place, but behind the apparent simplicity of his interior designs lies a coherent and comprehensive vision that has been continuously honed over two decades.

Meijers' oeuvre encompasses not only interiors, but also architecture, accessories and furniture. According to Meijers' philosophy, these are not separate elements, but rather complementary parts of an intelligible whole.

Urban Hideaway

by Remy Meijers

Conceived as a set of architectural features that give character to the space, this bathroom has plenty of room for all the elements: a large shower for two, a large washbasin and a spectacular bathtub ideal for bathing.

To complete this spa-like experience, the project features wooden elements for added warmth, a fireplace and an outdoor space with double shower and washbasin. The message is clear: self-care has become a fundamental part of our lives, and the bathroom is at the heart of it.

A large, open space where you can spend time and feel good about yourself. A place to unwind. Without distractions.

Divided into two separate yet complementary parts, one of the most impressive areas in the project is reserved for the bathroom, highlighting the importance of this space in everyday life.

Designed by: Remy Meijers
Year: 2023
Washbasin: Reflection S
Shower floor: Dekton Rainfloor
Dekton: Lunar, Kreta and Laurent
Decoration: Vases designed by O4Home
in collaboration with Remy Meijers

A solid volume presides over the outdoor area, incorporating a washbasin in the form of a fountain that makes the most of the technical performance of the material.

Washbasin: Silence S

Areas connected to the outside, but with plenty of privacy, a large open shower, etc. The designer conceives a space that pushes the boundaries of the bathroom, moving towards new concepts of self-care.

The Palazzo

by Remy Meijers

In contrast to the historic architecture, Remy Meijers uses lightweight, contemporary elements with an essentialist design and straight lines, while retaining original ceilings, doors and windows to add a sense of warmth. An experience that invites you to indulge in the natural fusion of old and new.

The aim of this project is to ensure that the original elements of the space are maintained with an updated approach. To this end, Meijers combines decorative elements, such as the ceiling mouldings and herringbone flooring, with contemporary materials, such as Dekton and Silestone, which are used for washbasins and shower trays.

Designed by: Remy Meijers
Year: 2023
Washbasin: Marie TOP L
Shower floor: Dekton Rainfloor
Dekton: Taga and Rem
Silestone: White Zeus
Other products: Lamp designed by Keylight
in collaboration with Remy Meijers

The shower area is the centrepiece, dominating the centre of the room. Its raised floor design preserves the original ceiling structure and gives it greater prominence.

A large volume made from Dekton Rem doubles as a shower tray and is the central feature of the room. Visually connected to the screens through a large glass panel, Meijers suggests an outdoor space for contemplation.

The cladding, washbasin and shower surfaces are a contemporary twist to traditional materials in contrast to the wood and herringbone flooring.

CLAUDIA AFSHAR

X
The Bathelier

“Well-being has never been as important in the bathroom as it is today, with functionality and aesthetics playing a key role”.

Based in Los Angeles, Claudia Afshar and her studio have become an international benchmark in the field of interior design. Celebrities and developers worldwide rely on the designer to bring their most emblematic projects to life.

In them she blends stylistic references to the US with hints of the UK and London, her home town, where she began working while learning architectural design at Living Space, her mother’s award-winning interior design firm. Her houses, marked by an elegant and contemporary décor, are regularly featured in magazines such as Vogue, Elle Décor and Rue Magazine.

Ananda
by Claudia Afshar

In Hindu, Ānanda means, among other things, ‘pure happiness’, one of the highest states of human being. Thus, Claudia Afshar has created a striking open plan space that conveys warmth through a design of grooved materials.

She demonstrates the ability of small details to bring a fresh look to the bathroom, with playful accents and textures on all surfaces.

Designed by: Claudia Afshar
Year: 2023
Washbasin: Simplicity
Shower floor: Dekton Rainfloor
Dekton: Umber and Nacre

Designed to capture the essence of Dekton, Claudia Afshar elevates the Simplicity washbasin on a bespoke pedestal in Dekton Umber, which is grooved as a result of a delicate cutting of the material.

The designer envisions a warm space that embraces the user through the inherent connection with the earth and nature by Dekton colours Umber and Nacre.

Sawaru

by Claudia Afshar

Touch is one of our fundamental senses for understanding our relationship with the environment. It gives us a nuanced perception of surfaces. With this in mind, Claudia titled her project ‘Sawaru’, the Japanese word for ‘touch’.

A space conceived as a sanctuary, which explores the bathroom as a place of connection and self-care. Sawaru welcomes visitors through an entrance that conveys calm and tranquillity. Light tones and textures combine perfectly with the smooth curves, creating an atmosphere for personal care and complete relaxation. This bathroom offers a dream spa experience.

Designed by: Claudia Afshar
Year: 2023
Washbasin: Reflection M
Shower floor: Dekton Rainfloor
Dekton: TK06 Marmorio and Nacre
Silestone: Nolita

Neutral and serene, the interior of this bathroom lies somewhere between the concepts of a personal spa and a homely haven. A recessed arch frames the shower area in the form of a bench, exploring ancestral hygiene rituals from a contemporary perspective.

Claudia experiments with the possibilities of materials, pushing the washbasin to the limit. In this way, by repeating a curved shape, she manages to create a skirt full of volume.

Featuring a minimalist and relaxed design, the entire bathroom project revolves around the relationship between curved and straight lines, generating a leisurely pace that allows you to relax.

DANIEL GERMANI

X
The Bathelier

“A visually appealing space is no longer enough to satisfy people. Their needs and behaviours are key to creating an engaging and holistic experience and, more importantly, for well-being to flourish”.

After graduating in architecture in his native Argentina, Daniel Germani spent almost a decade in Europe working on different creative and business projects. A highly innovative vision of design has seen him work as a creative director and designer for some of the world’s most inspiring companies.

His multi-disciplinary studio, specialising in product design, design consultancy, interior design and architectural renovation, is based in Phoenix, Arizona, but Daniel travels around the world doing design work in partnership with leading global brands. His rationalist yet distinctive style is clearly influenced by the modern and Bauhaus movements. Its philosophy is simple: good design should always be honest and inspiring.

Ceppo

by Daniel Germani

In this project, Germani develops two separate vanity areas to adapt to the different needs of the users of the space. At the same time, it creates a more pleasant and playful feeling in the shower and bath area. The space maintains a balanced effect of personal sanctuary, where small daily rituals of self-care are explored as a way of enhancing well-being.

With a deep respect for the materials, Germani achieves a calm and serene space of large dimensions, in which the bathroom stands as the centrepiece of the home.

Designed by: Daniel Germani
Year: 2023
Washbasin: Silence M
Shower floor: Dekton Rainfloor
Dekton: GK07 Ceppo
Taps: Taps from Fantini's Sailing Collection

The brutalist feel of the cladding, which echoes the traditional Ceppo di Gré stone from Lombardy, highlights the subtle, warm design accents throughout the space. It includes two large washbasin areas designed with Dekton due to its high performance: resistance to stains, scratches, knocks, etc.

The Silence washbasin lives up to its name, providing a relaxed look and subtle lines. In combination with the Ceppo series from Dekton's new Pietra Kode collection, it underlines the timelessness of the materials used in the space.

Travertino
by Daniel Germani

Contemporary, intimate and sophisticated features make up a balanced project. Two walnut vanity units and a shelf provide additional storage space, allowing you to discreetly store toiletries or decorative items.

The view of the courtyard with its greenery is a peaceful oasis for relaxation. The shower, which is in a separate area, is a way of escaping from everyday life through the ritual of water. In this project, Germani transports us to Rome in all its glory.

The result is a clean and serene bathroom, which embraces the experience of light flooding the space. This water room reclaims a leading role that explores ancient bathing rituals from an updated perspective.

In a wilful confusion between indoors and outdoors, Germani recreates a space for self-contemplation that goes beyond the traditional boundaries of the bathroom.

The project addresses several strategies that, when approached in a specific way, complement each other to give a complete turnaround to the bathroom, transforming it into a more open and flexible residential space that breaks with conventions.

Designed by: Daniel Germani

COLIN SEAH

X
The Bathelier

“The ideal bathroom is a sanctuary for holistic wellness, where body and mind are cleansed and nourished. Away from the hustle and bustle and distractions of the world around us, it offers a moment to immerse ourselves in healing sounds, aromas and textures”.

Colin Seah trained as an architect in the USA, but today he is the Design Director and founder of the Singapore-based studio Ministry of Design (MOD). His radically innovative approach to design and architecture leads him to question conventions and redefine spaces in every project.

Beyond spaces, Seah creates physical reflections on how design can act as a catalyst for change. He has overseen over 100 projects worldwide and has received numerous awards, including ‘Designer of the Year’ by the International Design Awards USA (2010) and ‘Rising Star in Architecture’ by Monocle.

The Collage

by Colin Seah

In life, as in art, we seek balance and harmony when its complexities threaten to pull us in different directions.

The Collage strikes a balance between a range of different and even contrasting colours to create a unique moment of holistic harmony. The inherent beauty and challenge of a collage is to achieve an “elusive balance”. When this is achieved, the whole magically becomes more than the sum of its parts.

The Simplicity washbasin fits into a large volume, featuring a countertop that takes advantage of the large dimensions of Silestone materials to build an extra-long surface to adapt to the space.

Chaos and order are the two cornerstones of Seah's project.

A bathroom space that explores the diversity of nature and the mix of materials, generating a collage that integrates the elements of the shower tray, in combination with the cladding, and the washbasin.

Designed by: Colin Seah
Year: 2023
Washbasin: Simplicity
Shower floor: Rainfloor
Dekton: Soke and Laurent
Silestone: Et Serena and
Ethereal Noctis

The Cave

by Colin Seah

Personal hygiene and bathing habits are undeniably primitive and fundamental to human beings. From this premise, Colin Seah explores a space reminiscent of a cave and introduces us to a primitive way of relating to the place in which we live.

In this design, rituals come to life through the creation of a dramatic bathroom, characterised by sloping walls in deep earth tones, integrated lighting and a huge window at the back. This bathroom also reminds us of the most primitive form of architecture: the cave.

Designed by: Colin Seah
Year: 2023
Washbasin: Simplicity
Shower floor: Dekton Rainfloor
Dekton: Bromo, Laurent and Awake
Silestone: Coral Clay Colour
and Sienna Ridge
Decoration: Gessi

The volume of the washbasin, made with the Reflection model integrated with Dekton Laurent, recreates an almost mystical atmosphere. In the same way as an altar, this object elevates the moment of contact with water to a ritual, pondering how the bathroom has become an essential space for self-care and health.

An opening in the façade frames a privileged view of the exterior and floods the interior with plenty of natural light. This impressive area is reserved for the shower tray, making this moment a unique experience.

MUT DESIGN

X
The Bathelier

“Reconnecting with our body and mind to reach the ideal of healthy living has become a fundamental part of how we overcome stress in our lives. For us, the bathroom is that private, safe haven where this dialogue takes place”.

Specialising in product design, Alberto Sánchez and Eduardo Villalón are the design duo behind MUT Design, one of the leading studios on the international design scene and clear representatives of the new wave of Valencian designers. Since it was founded in 2010, MUT Design has received continuous recognition at major industry awards.

Its thoroughly contemporary style is a perfect balance between an essentialist design and a careful selection of materials and finishes. Today they are among the most popular and renowned designers of their generation and have collaborated with some of the most inspiring brands in design.

The Resilient House

by MUT Design

A home is as essential as a roof and four walls to shelter us, but above all it is the place that gives us the privacy and freedom we need to connect with ourselves, rethink our lifestyle and value well-being. Based on this premise, MUT Design suggests a space inspired by a kind of Roman bath in ruins delimited by the walls of a quarry, alluding to the origin of Cosentino.

As an interior architecture programme, MUT Design makes use of a series of volumes with Dekton to create hollows in the space, completed with a bathtub and a washbasin where the Simplicity model is integrated. This project proves the material's ability to adapt to any type of surface and functional solution.

A completely uniform range of materials makes for a minimalist and serene space, interrupted only by the natural stone that emerges in reserved areas. The contrast highlights the clash of materials, thus elevating the presence of both.

Designed by: MUT Design
Year: 2023
Washbasin: Silence L
Shower floor: Dekton Rainfloor
Dekton: Nacre

Ellipse

by MUT Design

In this project, MUT Design is inspired by the expressionism and organic architecture of Torres Blancas in Madrid. The curved, spiral and seashell shapes so often found in nature are used here as an expression to convey emotions through shapes and textures.

It is a space that serves not only as a formal experiment but also as a functional one. To achieve this, a partitioning element plays with the different levels of privacy in an open bathroom space formed by truncated cylindrical modules that facilitate the flow from inside to outside and vice versa, and also explores new ways of understanding this piece as a fundamental part of today's home.

Designed by: MUT Design
Year: 2023
Washbasin: HLine Urban
Shower floor: Dekton Rainfloor
Dekton: VK02 Avorio and Argentium
Furniture: Sancal chair by MUT Design

Different spaces are generated through the volumes, playing with the levels of privacy of an open-plan bathroom. Using the same slat construction system, the HLine Urban washbasin is housed in a pedestal.

A shower area is concealed behind the cylindrical element, which ensures privacy, but is directly connected to the large exterior window.

State-of-the-art technology and innovative design for your bathroom. Beauty and functionality for a customised space.

At Cosentino we have developed a wide collection of surfaces and features for bathrooms. From wall and floor claddings in different yet perfectly balanced formats, colours and textures, to attractive washbasins and shower trays, carefully designed with great attention to detail and simplicity.

Change your vision of the bathroom. An all-round solution of high aesthetic and functional value to turn the bathroom into a complete experience of well-being and visual comfort.

The avant-garde design and the quality of Cosentino materials merge in timeless bathrooms made to be lived in.

Atmospheres designed by Cosentino in which quality, sophistication and a holistic view of the space are paramount. Inspiration and solutions for any decorative style that will help you find your ideal bathroom thanks to Cosentino's extensive portfolio of materials and products.

From industrial character to Mediterranean simplicity. A wide range of spaces rich in details and finishes to connect with any style.

Mediterranean

Classic

Industrial

Timeless

Silestone Exelis

Dekton Reflection S

Dekton VK03 Grigio

Dekton VK04 Grafite

In this bathroom with a pure design and straight lines, natural light takes on a material dimension.

The play of light and shadow accentuates the contrast created by the subtle combination of two very similar, but at the same time very different Dekton colours: VK03 Grigio, a colour inspired by Grigio Alpi natural stone, and VK04 Grafite, a colour that reinterprets dark limestones. The difference in colour between these two shades of grey helps to create contrasts between light and dark full of intentionality, as in the lintels of the window arches or in

the transition space between the water area and the bedroom. VK04 Grafite also helps to accentuate the powerful beauty of the Reflection washbasin by enclosing it in a monolithic pedestal with a free-standing tap. The almost zero porosity of Dekton ensures that this design will remain unaltered over time. The same applies to the Exelis shower tray, which is made from Silestone.

Silestone Eclectic Pearl

Silestone Kador Suite

Silestone Simplicity

A spacious and practical bathroom that is dressed with elegance and minimalism.

Light tones predominate in this space, in counterpoint with some dark-colored elements, thus creating a harmonious and unique combination.

Silestone Eclectic Pearl, applied to walls, countertops and Simplicity sinks, features a cream background and delicate silver veins.

This design is part of the brand's latest collection, Le Chic, which aims to revive marbled patterns, providing bright touches. The shower tray is also one of the models from the Silestone Kador Suite bathroom collection completely adapted to the rest of the space.

Dekton TK06 Marmorio

Dekton TK05 Sabbia

Silestone Exelis

Dekton Silence S

Inspired by the timeless beauty of Travertine marble, this bathroom reinterprets the concept of Roman baths to create a modern space with relaxed lines.

Thanks to the use of two totally different patterns based on the same stone, the sense of spaciousness is enhanced. The colour chosen for the walls was Dekton TK06 Marmorio, a recoding of Travertino Navona, the stone out of which ancient Rome was built. Its distinctive parallel lines add solemnity to the whole. As for the flooring and washbasin area, the colour chosen was Dekton TK05 Sabbia, a

stylised version of Travertine characterised by a strong horizontality and veining that maximises the expressiveness of natural stone while giving it the highest performance of ultra-compact stone. TK05 Sabbia was also used for the Silence washbasin, achieving total integration, while the simplicity of Silestone Exelis was chosen for the shower tray.

Silestone Bohemian Flame

Dekton Sirius

Silestone Waka Brim

Silestone Armony

Industrial style and sophisticated touches:
a bathroom to enjoy functionally and
aesthetically.

With dark colors in all its applications, this space has Silestone in the wall covering, countertop and sink. Bohemian Flame, one of the designs from the brand's latest collection, designed to redefine timeless classics, is chosen for the creation of this uniquely designed bathroom. The veins that intersect the dark background are inspired by the movement of golden lava flows that create scars in the volcanic soil.

The flooring, for its part, has been covered with Sirius, one of the dark classics of the ultra-compact Dekton stone.

The shower tray installed is the Silestone Wacka Brim model and the sink is Silestone Armony. Both complete an environment that demonstrates the versatility and visual continuity of all Cosentino products.

The stone that has shaped contemporary Milan has become one of the main trends in decoration.

Both residential and commercial spaces surrender to the beauty of Ceppo di Gré, whose whimsical structure features large, attractive grey and blue patches.

Dekton GK07 Ceppo

Dekton VK04 Grafite

Silestone Exelis

Silestone Marie TOP L

The new GK07 Ceppo redefines this beautiful pattern to give it greater visual strength and the technical features of the ultra-compact Dekton stone. Large format slabs allow for a more seamless design, with fewer joints. This finish, used on floors and skirting boards, is combined with VK04 Grafite, another of the colours from Dekton's new collection, Pietra Kode. To create a contrast with the stone tones, two Silestone designs were chosen: the shower tray features the Exelis model; while the Marie TOP L was the model chosen for the countertop washbasin.

Dekton VK03 Grigio

Dekton VK01 Nebbia

Silestone Exelis

Dekton Silence L

The simplicity of Vicenza stone and the purity of Dekton's large format design come together in VK03 Grigio and VK01 Nebbia.

Both contribute to creating a Japandi-style bathroom where the warmth of the rich taupe grey range of VK03 Grigio combines with the wooden elements and creates a contrast with the creamy base dotted with spots of VK01 Nebbia, the colour used for the countertop and the

integrated Dekton Silence washbasin. The shower tray features the Exelis model by Silestone, in large format. This surface has very low porosity, which reduces daily maintenance and improves hygiene in the bathroom.

Dekton VK01 Nebbia

Dekton VK04 Grafite

Silestone Exelis

Dekton Reflection L

Nature is very present in this bathroom that opens onto an interior garden and features a combination of materials and textures in neutral tones.

In dialogue with the wood and rattan design elements, Silestone and Dekton surfaces blend seamlessly into the overall design. The space features VK01 Nebbia on walls and floors, bringing a calm and classic touch with its texture inspired by Italian Vicenza stone.

This light grey tone is combined with the deep Dekton VK04 Grafite, which was used for the Dekton Reflection washbasin and the floors in the wet area. Its dark background features a pattern that creates a sense of continuity while reinterpreting the texture of limestone. The perfect frame for the Silestone Exelis shower tray.

Modern and elegant, this bathroom presents a space in which straight lines take centre stage.

The balance between the forms creates a sculptural atmosphere featuring a two-colour combination that spans a wide range of greys and blacks. In this composition, both Silestone Charcoal Soapstone and Dekton Kreta have an equal role.

Used on floors, walls and bathtub cladding, the texture of Dekton Kreta adds depth and creates a greater sense of spaciousness thanks to its light tone inspired by classic cement floors. Meanwhile, Silestone Charcoal Soapstone gives the washbasin countertop a dramatic effect, adding an elegant touch. Above it, Silestone Marie TOP L washbasins add a touch of finesse with their rounded corners. Finally, the shower tray features the Rainfloor model by Dekton, perfectly integrated thanks to the use, once again, of Dekton Kreta.

Silestone Charcoal Soapstone

Dekton Kreta

Dekton Rainfloor

Silestone Marie TOP L

Monolithic forms give character to this temple-like bathroom in which textures inspired by natural stone establish a dialogue with the surrounding landscape, which is connected to the bathroom through floor-to-ceiling openings.

Dekton Fossil, a colour featuring a very powerful natural finish with the aged look typical of fossilised stones, was the material chosen for both the countertop and the floor. In dialogue with this natural texture, Dekton Taga, an elegant grey shade with a marbled look inspired by Taj Mahal quartzite, was the material chosen to clad the walls.

The design of the washbasin is undoubtedly the star of this space. The Custom Washbasin in Silestone Negro Tebas is mounted on a horizontal base that runs through the space and counterbalances the verticality of the rest of the elements.

Dekton Taga

Dekton Fossil

Silestone Negro Tebas

Custom Washbasin

Silestone Marie TOP L

Dekton Rainfloor

The updated classic style of this luxurious bathroom is expressed in every detail.

Dekton Awake

Dekton Nacre

The use of light, neutral colours, contemporary touches such as black taps and a sophisticated texture inspired by natural stone create a space that exudes a quiet elegance. To maximise the light, the surfaces, furniture and Marie TOP L washbasins feature light colours.

Used on the washbasin area, floor and walls, Dekton Awake shines in its own light and elevates the tone of the entire room. Its design inspired by Paonazzo stone gives an elevated look with its thick veins in shades of light grey, terracotta cream and subtle blues. To define the wet area, such as the bathtub and shower floor – perfectly integrated thanks to the use of Dekton Rainfloor–, the colour chosen was Dekton Nacre, a more neutral tone that contributes to creating a more relaxed space.

A combination of black and white dominates this urban style bathroom with city views.

The elegance in this bathroom comes from the elevated design pieces used, such as the golden taps, the black freestanding bathtub and the striking front vanity unit supporting the geometrically shaped Dekton Silence washbasins.

These elements create a dialogue with the contemporary feel of Dekton Neural, whose design provides a strong sense of continuity. Its fine, pale veins run through its marbled background in light cream tones, creating an enveloping effect.

To create contrast and separate the different spaces, the walls of the shower area – which features a Silestone Exelis shower tray –, are clad in Dekton Somnia, a black colour with brown and white veins.

Dekton Neural

Dekton Somnia

Silestone Exelis

Dekton Silence M

Dekton Nacre

Dekton Umber

Dekton Rainfloor

Silestone Evita L

The honesty of this rustic Mediterranean bathroom design is made clear in every aspect.

The harmony and commitment to tradition is evident in every aspect of this bathroom, from its vernacular architecture to its natural materials and finishes. To create this vibrant atmosphere, a combination of two warm colours was used on the walls and floors. Both bring innovation and, at the same time, fit in perfectly with the style.

The powerful terracotta shade of Dekton Umber is, probably, the star of the space. Alongside this colour, the cream tone of Dekton Nacre – a colour with a texture similar to that of lime plastering and featuring subtle details and a degraded texture – was also used, bringing authenticity and character to the space, creating a contrast and establishing a dialogue with Umber. The Silestone Integrity Evita L washbasins blend subtly into the space, without pretension. In the shower area, clad in Dekton Nacre, the use of a Dekton Rainfloor shower tray provides continuity to the room.

Silestone Blanco Zeus

Dekton Helena 22

Silestone Marie TOP L

Silestone Kador Suite

The quietness of white is interrupted and overwhelmed by an elegant combination of textures and finishes in this contemporary bathroom.

A calm and, at the same time, very elegant atmosphere thanks to the many bronze details, such as the alcove frames, round mirrors and taps. In addition, two Cosentino surfaces were chosen to elevate the design of the room: Silestone and Dekton.

The pure and neat texture of Silestone White Zeus was chosen for floors and the washbasin - featuring the rounded design Silestone Marie TOP L-, the Silestone Kador Suite shower tray with anti-slip strips, and one of the walls. For all applications, a glossy, light-

reflecting finish was chosen, creating a perfect dialogue with the fine crackle effect of Dekton Helena, the colour used for the front of the washbasin unit and the rest of the walls in the room. This rich colour featuring a combination of white and grey shades with patterns inspired by Onix natural stone, elevates the design, adding elegance and sophistication.

Projects

Re-imagine the most personal space in your home. Create a unique experience in which the most beautiful and functional Cosentino surfaces are transformed into unique, warm and exclusive spaces.

From wall and floor claddings in different yet perfectly balanced formats, colours and textures, to attractive washbasins and shower trays, carefully designed with great attention to detail and simplicity.

Solutions of great aesthetic and functional value to suit every requirement and style of bathroom, which redefine the way in which we experience such a personal space and feeling of well-being.

Villa Hartl / Promenade, Austria

Casa Brasileira

São Paulo, Brazil

Cosentino sets the tone for São Paulo’s most ground-breaking building, with interiors by Jader Almeida.

Dekton Rem

U Interior Design Casa Decor 2022

Utrecht, The Netherlands

After years of designing houses for others, Nathalie Swinkels of Studio Zuyd has completed a masterpiece: her own home. Here, the bathroom in the bedroom becomes the centrepiece. She chose Dekton Khalo and it was the starting point for the rest of the house.

Dekton Awake

Studio Zuyd

Utrecht, The Netherlands

After years of designing houses for others, Nathalie Swinkels of Studio Zuyd has completed a masterpiece: her own home. Here, the bathroom in the bedroom becomes the centrepiece. She chose Dekton Khalo and it was the starting point for the rest of the house.

Dekton Khalo

**A house by
Moyson-Derveaux
Architects**

Meise, Belgium

Bringing nature and architecture from the outside in was the aim in designing this spectacular home. In the bathroom, the deep white of Dekton Zenith mirrors the aperture in the ceiling above the shower, creating an illusion of open space that is enhanced by the texture of Dekton Korso, which adds character to the skylight.

Dekton Korso

Dekton Zenith

Flat in Tel Aviv

Tel Aviv, Israel

The master suite in this home designed by Ariella Goren has an en-suite bathroom with walls and washbasins clad in Dekton Liquid Shell, which the designer says is “reminiscent of sea sand”. A subtle touch that blends in perfectly with the parquet floor.

Dekton Liquid Shell

North House

Melbourne, Australia

The bathroom in this home, designed by the BuildHer8 team, is transformed into a tranquil haven with a wall-mounted vanity unit featuring a Silestone Pearl Jasmine countertop, “to create a clean, floating visual effect,” explains the studio.

Silestone HLine Bath Top

Silestone Pearl Jasmine

Upscale home in Dallas

Dallas, Texas, USA

Debbie Bagley from Furstenwerth & Bagley Design signed off on the design of this bathroom, which features Dekton Danae on the floors and Dekton Arga in the wet areas. The beauty of the latter, inspired by the quartzite of the Taj Mahal, infuses the room with luxury without the need for maintenance.

Dekton Arga

Dekton Danae

House in
Itacaré

Bahia, Brasil

Dekton Lunar is the leitmotif of this spectacular project by Saraiva + Associados studio (S+A studio), which chose the ultra-compact stone not only for its minimalist beauty but also for its high resistance. In the bathrooms, this visual harmony is maintained with Dekton on the walls and floors.

Dekton Reflection S

Dekton Lunar

Mediterranean style villa in Murcia

Murcia, Spain

From the washbasin to the walls, the fireplace and the flooring, everything in this home designed by María Conesa features Cosentino surfaces. A wide variety of applications and colours that create lively, very Mediterranean spaces.

Dekton Laurent

Dekton Simplicity

Design Zage

Singapore

By combining style and functionality, Dekton Bergen creates a sophisticated and timeless atmosphere in the master bathroom.

Cadenza Showroom

Indonesia

At the Cadenza showroom in Indonesia, they believe that every space is special and unique, and their aim is to turn your design vision into reality. This is why they recreate rooms as if they were those of a house. From stone to sanitary ware, they offer the highest quality finishes, and their majestic application can be admired in rooms such as this bathroom clad in Dekton Taga.

Dekton Taga

Overall bathroom concept

Flooring and cladding

Possibility to combine washbasins and shower trays with all Silestone, Dekton and Sensa surfaces and their wide variety of formats and finishes.

Washbasins and countertops

Washbasins and countertops in different Dekton and Silestone finishes, which allow them to be combined with the rest of the bathroom elements.

Shower trays

Made of Dekton Grip/Grip+ and Silestone sandblast, our washbasins and shower trays can be customised to any space.

How do we make it?

Custom design

All our products are manufactured to order using fast manufacturing systems. This allows us to offer a tailor-made design for each client.

Total integration

Visual and aesthetic continuity. The same surface for all of your bathroom: floor, cladding, shower tray, washbasin, countertop...

Variety of formats, colours and textures

Cladding and flooring in different formats, colours and textures in perfect balance with Silestone, Dekton and Sensa materials.

Large format

Fewer joints ensure greater cleanliness and hygiene. The extra-large slabs give a sense of spaciousness.

Materials

The state-of-the-art materials developed by Cosentino bring unique, warm and avant-garde spaces to life.

The high performance and the variety of formats, colours and textures of Cosentino's materials allow for countless design possibilities. Silestone, Dekton and Sensa contribute to the design of visually uniform spaces that seamlessly integrate all the features: floors, cladding and furniture, washbasins, countertops and shower trays.

Innovative materials that inspire the design of the future and create exclusive bathroom spaces in which beauty and functionality go hand in hand.

Dekton. The Ultra-compact Stone.

Dekton is an ultra-compact stone that takes inspiration from the beauty and processes of nature and reinterprets them through unique technology.

Dekton is functional beauty in a high performance material that breaks the boundaries of architecture and design.

Dekton is stone

Dekton is a sophisticated blend of more than 20 minerals extracted from nature.

Dekton is a totally inorganic material with unbeatable hardness and strength properties that does not deteriorate.

Dekton is ultra-compact

Dekton is the only material in its sector that uses a 25,000 tn press in its ultra-compaction process.

Dekton's exclusive press generates a pressure equivalent to 2.5 times the weight of the Eiffel Tower, resulting in a material with no weak points and almost zero porosity.

Dekton is sintered

Dekton perfects in a few hours what nature creates in thousands of years.

Particle Sintering Technology (PST) binds mineral particles together to achieve a homogenised and compacted internal structure.

Dekton is technique

Dekton is a high performance, multi-purpose material for the world of architecture and design.

Its strength, variety of formats, sizes and installation options make it perfect for all types of applications and construction solutions. It withstands the most demanding conditions, even in its 4 mm thickness.

Dekton Features

The beauty of peak performance.
The beauty of imagining with no limits.

Abrasion-resistant

Dekton withstands abrasion better than granite and porcelain, making it ideal for all interior and exterior applications, including façades and flooring in busy commercial spaces.

Scratch and impact resistant

Dekton's great resistance to impact and scratches makes it perfect for everyday use. Its hardness equals quartz, scoring 7/10 on the Mohs scale of mineral hardness.

Water and stain resistant

Dekton's variety of thicknesses allow it to be used in applications where resistance to wind or impact are a project requirement.

Fire resistant

Dekton is classified A1, which certifies it as a non-combustible material capable of withstanding high temperatures without burning.

Resistant to extreme temperatures

Its thermal conductivity, mean bending strength and low coefficient of expansion make it ideal for projects exposed to sudden changes in temperature, frost, wind or heat. In addition, it can be installed with minimal joint spacing.

UV rays resistant

Dekton is unaffected by ultraviolet rays. Its colour will not fade or degrade over time, maintaining the same appearance as the day it was installed in any interior or exterior application.

Variety of sizes

Dekton is available in both small formats of 71 x 71 cm and large formats of 320 x 144 cm, perfect for giving visual continuity to large spaces with a minimum number of joints.

Variety of thicknesses

It is available in thicknesses of 20, 12, 8 or 4 mm (Dekton Slim). A thickness for every application, always ensuring the highest performance.

Variety of colours and textures

Each Dekton collection offers a myriad of colours in a wide range of finishes, from ultra-gloss to matt or velvet.

Customisation possibilities

Dekton offers the possibility of customising colours and complex cuts, thus creating unique pieces that result in unforgettable spaces and open up limitless design possibilities.

Easy installation & cost optimisation

Lower cost and lighter weight with the Dekton Optimma format (260 x 100 cm in 4 mm thickness), specially designed and manufactured for the most common vertical cladding applications.

Creation of continuous spaces

Thanks to its properties, Dekton can be installed with virtually imperceptible joints, thus ensuring colour uniformity over the entire surface and covering large spaces in a continuous and natural way.

DEKTON® SLIM
Designed by COSENTINO

Dekton Slim Protek 4mm

All the properties of Dekton in an ultra-thin surface, unique in its category.

Large format and minimum number of joints

Large format, 4 mm thick slabs offer limitless design possibilities and are very easy to install and transport.

Ideal for cladding and flooring, both indoors and out.

Dekton formats. Flexible and versatile. For any space.

Whatever the project, indoors or out, and however complex it may be, Dekton offers a variety of thicknesses and standard formats customised to meet the functional and creative needs of architects and designers.

Dekton textures. Different material sensations. A rich variety of shades.

Dekton comes in different textures so that the only limit is the imagination of the architect or designer: from an ultra glossy finish, to matt or velvety textured finishes.

XGloss
A bright, dazzling finish achieved through mechanical polishing, without the need for glazes or other materials.

Matt
The matt texture aims for a natural, shine-free look, ideal for a harmonious and timeless finish. Most Dekton products come in this finish.

Velvet
Velvet is Dekton's velvety texture. The materials chosen in Velvet create a feeling of warmth and comfort. This texture is perfect for classic colours, with veins.

Matt and Textured Velvet
Matt and Textured Velvet textures combine the warmth of velvet with the roughness of a textured, imperfect material. It is perfect for emulating the finish of natural stone.

Silestone. The Ultimate Mineral Hybriq+ Surface.

Silestone is a hybrid surface made from premium minerals and recycled materials designed to bring colour and texture to your bathroom.

Your bathroom is a source of well-being in which Silestone wants to be by your side. An easy to maintain, seamless and hygienic surface with unique colours and textures.

Moisture resistance

Silestone is a non-porous surface that is highly resistant to water absorption, moisture, stains, make-up and other everyday products, ensuring both hygiene and ease of cleaning.

Exceptional durability. Low maintenance

Silestone is highly resistant to the scratches, shocks and knocks that occur in daily bathroom use, so it requires minimal maintenance.

Minimal joints. Total integration

Thanks to its different formats, Silestone creates total continuity in the bathroom with infinite and personalised surfaces. Integrity washbasins also allow you to create an integrated space with no visible joints.

Silestone Advantages

Silestone is the comprehensive solution for your bathroom, including countertops, washbasins, shower trays, flooring and cladding, all with exceptional durability.

The high durability of Silestone means that it can be used and enjoyed in the bathroom for longer than expected, as it requires minimal maintenance, is highly resistant to stains and

scratches and has a low fluid absorption rate. This resistance to fluids and its minimal joints make Silestone the ideal solution for places where liquids are present.

The properties of Silestone are the result of constant years of innovation that guarantee maximum hygiene and safety.

Silestone with Hybriq+[®] Technology

2020 Marks the beginning of a new **revolutionary** technology that reduces the crystalline silica content in Silestone

In 2020 we launched our revolutionary technology Hybriq+[®], that drastically reduces the content of crystalline silica in Silestone's composition, blending premium minerals with recycled materials to create a new product category: Hybriq+ Mineral Surfaces.

More innovation

HybriQ+[®] is the technology that transforms Silestone into a hybrid mineral surface made up of premium low crystalline silica minerals and recycled materials.

More sustainable

Silestone is manufactured with HybriQ+[®] Technology using at least 20% recycled materials, 100% recycled water and 100% certified renewable energy.

Same performance

Silestone with HybriQ+[®] Technology keeps all the quality, durability and warranty features that have made Silestone the market benchmark in its category for decades.

More design

Silestone is made from a blend of different minerals, giving it a distinctive colour, brilliant lustre and a deep stone-like quality. This makes it suitable for all design styles, encouraging the creation of integrated and personalised spaces.

This new generation maintains the high quality that characterises Silestone surfaces.

Silestone formats. Multiple possibilities for indoor applications.

Silestone Textures. Surface sensory perception.

In order to adapt to all styles, Silestone comes in different textures for any of its applications. Polished, Suede or Volcano are three possibilities that let your imagination run wild and provide your worktops, floors or walls with the texture you have always wanted.

Large format

Jumbo slabs — 327 x 159 cm
Standard slabs — 306 x 140 cm

Jumbo slabs

Cosentino offers Silestone slabs in Jumbo format (327 x 159 cm max.) This format allows large surfaces to be created with a minimum number of joints, design versatility and improved hygiene.

This optimises the use of the slab and minimises waste.

Other format

Polished

Extremely glossy and smooth texture with an intense and consistent colour.

Suede

A matt finish which offers a unique soft and pleasant feel.

Soft sandblasted (Anti-slip)

Surface available exclusively in the shower tray range to guarantee maximum anti-slip safety.

Sensa by Cosentino. Protected natural stone surface.

Sensa by Cosentino is a premium, maintenance-free natural stone brought to you by Cosentino, a world leader in the natural stone industry.

Sensa by Cosentino is treated with a revolutionary stain-resistant treatment called SenGuard, and comes with a 15-year warranty against staining.

Applications

Bathroom countertops.
Stain-proof natural beauty

Disfruta del diseño, la dureza y la resistencia de la piedra natural sin miedo a las manchas. Las cuarcitas y granitos de Sensa by Cosentino cuentan con un revolucionario tratamiento antimanchas que los protege durante toda la vida de tu encimera.

Textures

Unique shapes for one-of-a-kind surfaces

Los colores y texturas de Sensa by Cosentino tienen el diseño paciente y caprichoso de la naturaleza. Cada una de las tonalidades disponibles cuenta con una textura que produce diferentes efectos y sensaciones: suede, pulido o caresse.

Sensa by Cosentino Treatment

Cosentino applies an invisible, long-lasting treatment to quartzite and granite, which is chemically integrated into the material allowing it to breathe. This technology increases its powerful natural properties and prolongs its life.

The process changes the surface tension of the stone, enabling the material itself to prevent liquids from penetrating it.

Colours

Innovative colours and textures to design spaces full of character and originality.

Silestone, Dekton and Sensa surfaces come in a wide variety of colours and textures: uniform, veined, etc. From classic iconic stones to new designs in solid colours, innovative patterns and textures that go beyond the visual dimension to offer a unique sensory experience.

Innovation and technology in design. A range of versatile colours and textures to give character and originality to any bathroom.

Flooring & Cladding

Visual continuity throughout the space

The same surface is used to clad floors, walls and furniture. Thanks to its large format and almost zero thermal expansion coefficient, it can be installed with fewer, practically imperceptible joints.

Design and patterns

Three groups of patterns that make the design process easier.

We have classified our Dekton colour range into three different clusters of patterns to facilitate the design process. All our portfolio is labelled as Infinite Pattern, Singular Pattern or Smooth Pattern, depending on the desired effect for large surfaces and the placement of slabs adjacent to one another, taking into account the orientation of the design, shades and variations.

However, this classification is merely indicative. and we recommend that you contact our Product department to obtain an individual assessment that guarantees how you can materialise your project the way you imagined.

Singular Pattern

Designs with colour ranges of greater complexity and a very strong orientation, which result in patterns with a lot of character and variation in smaller cuts or continuous layouts.

Smooth Pattern

Designs with an orientation in the graphic structure that has to be taken into account when cutting and placing the slabs. It is a very versatile type of pattern that requires consideration of orientation in its installation.

Infinite Pattern

Uniform colours or designs with a consistent or almost consistent composition and structure that, when used for cladding such as floors, walls or façades, allow for random placement of slabs, providing a beautifully consistent look.

Dekton Design Match

Match your style with Dekton

Designs that have the power to leave a lasting impression. Veins that run across walls and continue seamlessly across floors, creating patterns that may seem unattainable with natural stone, but not with Dekton.

Rotating Pattern

All colours have a rotating pattern, except Optimma format Rem and Kelya, these have a static pattern.

With rotating pattern the graph is printed with a slight vertical displacement upwards (scroll up) in each one of its iterations (in each slab).

In the static pattern the graph is always printed in the same position, but there is the option that, when position the slabs next to each other horizontally, the one immediately after it rotates 180° with respect to the above, as shown in the following illustration, in order to play with the movement in the design.

Book Match

Based on some of our designs, we have created unique, symmetrical and interchangeable references that allow compositions and designs to be made where the veins have continuity between different pieces.

Each piece has a unique combination of numbers and letters to select the patterns that best suit your needs according to colour and available thicknesses.

Material on request, check availability.

Dekton Lucid and Morpheus
Available in 8, 12 mm and Optimma format 260 x 100 x 0.4 cm

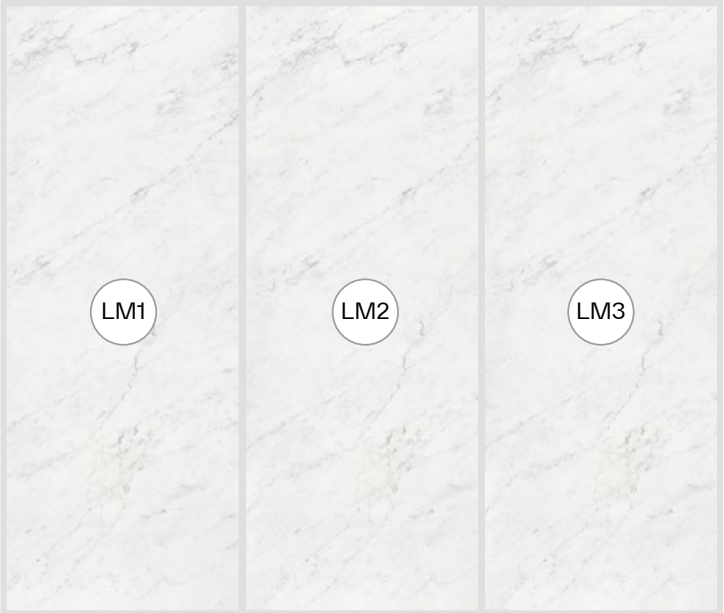

Dekton Awake
Available in 4, 8 and 12 mm thicknesses

Lineal Match

We present a new concept that includes references of the same colour to create a fluid and continuous atmosphere. Focused on large-area flooring and vertical cladding applications.

A new design conceived to position the slabs vertically. The slab is rotates 180° in each of its iterations, thus creating a continuous and harmonious design.

Dekton Marina [NEW](#)
Available in Optimma format

Dekton Grip & Grip+

Improved grip for any anti-slip application such as bathrooms, swimming pools or outdoor floors.

Each space has different technical needs. We launch to the market a new portfolio for antislip flooring in two finishes Grip and Grip+

Grip, the anti-slip finish that is easy to clean and ideal for light colours.

Grip+, the maximum grip for the most demanding applications and maximum ease of cleaning.

Two highly durable and resistant anti-slip treatments, applied in a controlled manner during the manufacturing process of Dekton, without the need for chemical or mechanical means.

Colours with the anti-slip finish may have slight colour differences compared to the standard matt finish, which are more evident in colours such as Sasea or Danae.

Dekton Grip colours

Aeris	Albarium 22	Danae	Lunar 22	Nacre	Sasea	VK01 Nebbia

VK01 Nebbia	VK02 Avorio	VK03 Grigio	VK04 Grafite

Errors in the installation, use, cleaning or maintenance of Dekton with Grip/Grip+ non-slip finish can significantly affect its performance. Defects or loss of performance due to any installation, use, cleaning and maintenance operations that are not specified in the corresponding manuals made available to the customer at www.cosentino.com or by request to info@cosentino.com, will be excluded from the Dekton product warranty applicable to these products.

Rainfloor

Shower floor

Solution according to the different design trends in the shower area. Combine Dekton with any evacuation system available on the market: grilles in steel, ABS or covered with Dekton itself. An elegant and quality product to give a touch of distinction to the bathroom.

Characteristics

- 1. Premium bespoke integrated shower flooring.
- 2. Versatile solution integrated with the rest of the finishes.
- 3. Flush fitted shower flooring.
- 4. With the best textured finishes Dekton Grip/Grip+.
- 5. Suitable for a wide variety of drainage systems.
- 6. 5 year warranty for antislip finishes.
- 7. Easy on-site installation.
- 8. Possibility to send the pieces already cut or to cut them on site.

New Collection Dekton Ukiyo

Cosentino x Claudia Afshar

A new Dekton collection designed by Claudia Afshar, inspired by the Japanese concept Ukiyo.

Luxury interior design firm, Claudia Afshar Design, is led by this London-born and Los Angeles-based designer. Alongside her talented team and global projects, Afshar creates extraordinary environments that redefine opulence.

Both brands pay meticulous attention to detail and are focused on providing impeccable craftsmanship. Dekton Ukiyo features colour-filled structured patterns that offer a sensory experience.

Step into a world where time stands still, and the present moment is all that matters.

Experience the beauty of living textures crafted by nature.

Cosentino standard warranty letter

This Letter of Warranty (hereinafter, the ‘Warranty’) shall only be fully valid when the consumer has registered the project within 6 months of the purchase of the product, as indicated in the relevant section, and when the consumer submits the original invoice or purchase receipt (indicating the date of purchase and the name of the dealer of the product). The consumer shall send the defective product to COSENTINO GLOBAL S.L.U. (hereinafter, **COSENTINO**). In order to be effective, this Warranty must be registered online on the website www.cosentino.com. This Warranty is transferable.

COSENTINO reserves the right not to offer the warranty service free of charge if the requirements set out in the previous paragraph are not met, or if the information provided by the consumer is false, incomplete or illegible. This Warranty is intended for non-professional end users and shall be considered applicable for residential use, such as any building or facility for private accommodation, whether it is a single-family or multi-family dwelling.

End Products Manufactured by Cosentino

This section of the Warranty is limited to end products manufactured under any of the COSENTINO brands in the form of three-dimensional products, such as kitchen sinks, washbasins, bathroom countertops and shower trays (hereinafter, the ‘**End Products**’), and covers any manufacturing defects in such products for a period of **FIVE (5) YEARS**, from the date of purchase.

All this under the terms, conditions and limitations described for the rest of SILESTONE or DEKTON by Cosentino products in this document and also available on the website.

This Warranty is only valid when the end products have been correctly installed (in accordance with the applicable regulations and the specific assembly instructions), and have been used correctly according to their intended application (Use, Care and Maintenance Guide). Consumable items (rubber elements, seals, valves, etc.) are not covered under this Warranty.

Warranty Registration

To register as a holder of this Warranty, it must be activated via www.cosentino.com. This website requires certain information for registration, including information relating to the point of sale and/or the marble supplier, as well as the customer. Therefore, we recommend that customers register directly with the point of sale or marble supplier. At the end of the registration, the customer may print this Warranty for their use. In order to benefit from the Warranty, it must be registered within six (6) months of purchase.

⁽¹⁾ Check each approved model.
