Dekton is surface.
Dekton is innovation.
Dekton is ultra-compact.

Dekton is a sophisticated mixture of more than 20 minerals extracted from nature.

Dekton emulates in a few hours what takes nature thousands of years, through an exclusive technological process.

Dekton uses in its manufacturing the exclusive TSP technology, able to sinter mineral particles making them bond with each other, change and compact their internal structure. A unique and innovative technological process that represents an accelerated version of the metamorphic changes that natural stone undergoes when exposed for millennia to high pressure and high temperature.

As a result of its exclusive sintering and ultracompaction process, Dekton has a near to zero porosity, which generates a surface with no micro-defects that could cause tensions or weak points, setting it apart from other materials.

Fireplace cladding: Dekton GK07 Ceppo

Dekton features

Large Format

Thanks to the size (up to 330 × 150 cm)* and the lightness of Dekton (from 4 mm thick), the design possibilities for your kitchen, bathroom, facade, walls or high transit floors are growing exponentially.

Slab Format

up to 320 × 150 cm

Available thicknesses

4, 8, 12, 20 and 30 mm

Unaffected by heat

Highly resistant to high temperatures, such as hot kitchen utensils taken straight from the hob or hot hair straighteners, and UV rays.

Great resistance

Extremely resistant to scratching, virtually zero porosity and highly resistant to aggressive chemical products used in kitchens and bathrooms.

Unlimited inspiration

Design your modern kitchen with eye-catching colours and unique textures. Large format for new compositional solutions.

A worktop to be enjoyed

Easy maintenance, no traces of fingerprints or marks and maximum durability. Your Dekton worktop is guaranteed for 25 years.

* Check availability of 4 mm thickness, only suitable for cladding.
Check availability of 30 mm thickness.

Dekton advantages

Highly UV resistant

Scratch resistant

Resistant to stains

Maximum resistance to fire and heat

Resistant to abrasion

Resistance to freezing and thawing

Superior mechanical resistance

Low water absorption

Dimensional stability

Fireproof material

High resistance to hydrolysis

The only carbon neutral surface throughout its life cycle

Sustainable development is an essential component of the company's growth strategy, with special regard to the respect and protection of the environment.

1. We reduce our impact

We are committed to energy efficiency, emissions reduction and sustainable mobility to minimize our impact.

Energy Efficiency

It is a priority objective for Cosentino to reduce energy consumption in the production process and in the general group activity. In addition, 100% of the electricity we use in the production process comes from renewable sources.

Emission Reduction

2.8 million euros have been invested in the implementation of an energy management and monitoring system for the heat systems which allows heat from the Dekton furnaces to be recovered and used in the dryers, thus reducing emissions.

Sustainable Mobility

Our mobility policy includes the installation of 100% renewable electric energy chargers for electric vehicles, thus encouraging their use among employees, and the availability of hybrid buses that facilitate the movement of employees and visits from points close to the facilities.

2. We calculate our carbon footprint

As part of our de-carbonization Plan, our carbon footprint is calculated and verified by an accredited third-party organizations.

With the approval of MITERD (Spanish Ministry for Ecological Transition and Demographic Challenge), it is part of the Spanish Registry of Carbon Footprint, Off setting and CO2 Absorption Projects of the OECC (Spanish Office of Climate Change).

For this calculation, we use data on energy and or fuel consumption, raw materials, etc., of the entire value chain and of the Cosentino Group branches (Centres, Workshops, Cities, HUBs, HQ,...).

3. We offset our emissions

To achieve carbon neutrality in Dekton, at Cosentino we offset our emissions over the entire product life cycle (scopes 1+2+3) by investing in GHG emission o setting projects.

For this purpose, we identify those projects that meet the requirements for responsible offsetting and that, in turn, have a strong social dimension that contributes to the achievement of the Sustainable Development Goals of the UN's 2030 Agenda.

The project selected to offset the 42,532 tons of CO2 emissions resulting from one year of Dekton production was the "Loma Los Colorados Land II Gas Project" in Chile, which has a direct impact on sustainable development by supporting the local economy, providing training and job opportunities.

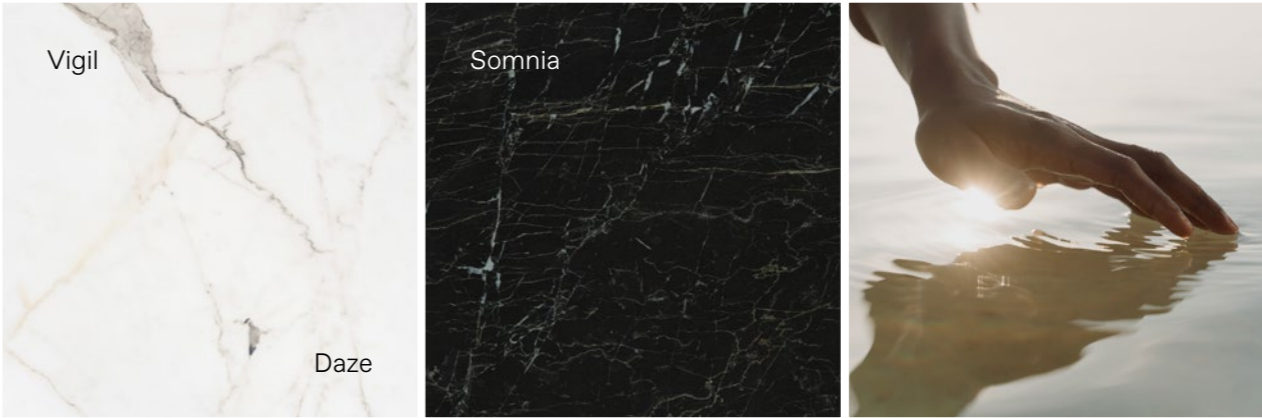

From the most daring textures to everyday needs.

DEKTON
KRAFTIZEN

Designed by Cosentino®

A series of five versatile, beautiful and honest colors that are also durable and resistant come to life in the new Kraftizen Collection.

We have mastered the refined technique of stucco through technology creating a durable surface that delights the five senses through textures and volumes, silky and extra matte colors that will clad floors, walls, tables, countertops and any timeless space that inspires.

Dream about Nature. Wake up surrounded by beauty.

DEKTON
ONIRIKA

Designed by Nina Magon

A collection that unites the poetic and unique beauty of stones harnessed by Dekton technology.

The collection is named in honor of the lavish inspiration of the two worlds conveyed in marbled colors to captivate our eyes and bring to any space a feeling we understand but cannot explain.

DEKTON
PIETRA KODE

Designed by Daniel Germani

The Italian stones of yesteryear recoded by Dekton for contemporary architecture and design.

The new Dekton collection embodies Vitruvius' principles for a perfect city through three series: Vicenza Kode, Travertine Kode and Ceppo Kode. Through them, his principles are reformulated and given a new meaning that responds to the demands of the architecture and design of the future, while maintaining that shared code of beauty that has evolved over the centuries to connect classicism with modernity.

With Pietra Kode, designer and architect Daniel Germani reinterprets for Dekton the atemporal beauty of three classic stones: Vicenza, Travertine, and Ceppo.

Elegant designs that transport us back in time, rich in shades, colors, and textures that create a sensory experience beyond what the eye can see.

159 × 71 cm
71 × 71 cm
Tailor-made format

Thicknesses

4 mm (with mesh, cladding only)
8 mm
12 mm
20 mm

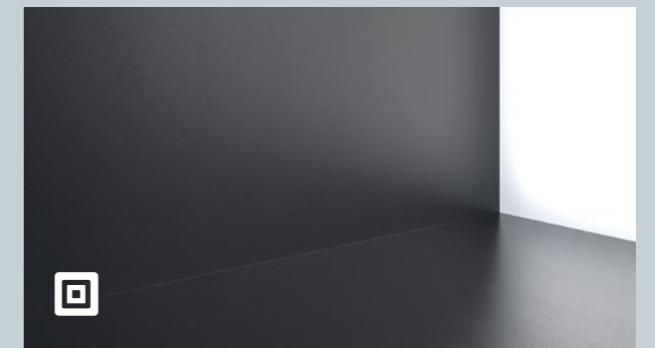

Dekton Textures

Dekton comes in different textures so that the only limit is the architect's or designer's imagination: from the finish ultra-glossy, to matte or velvety textured options.

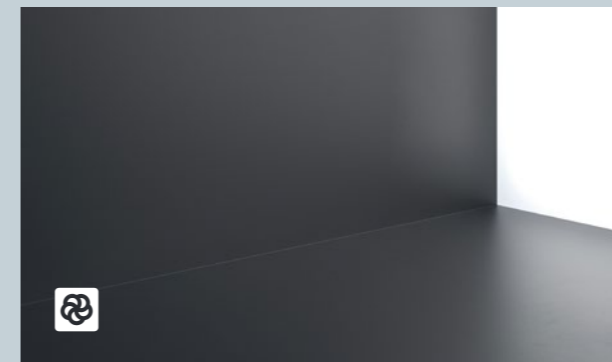

XGloss

A luminous and dazzling finish achieved by mechanical polishing, without the need for enamels or other materials.

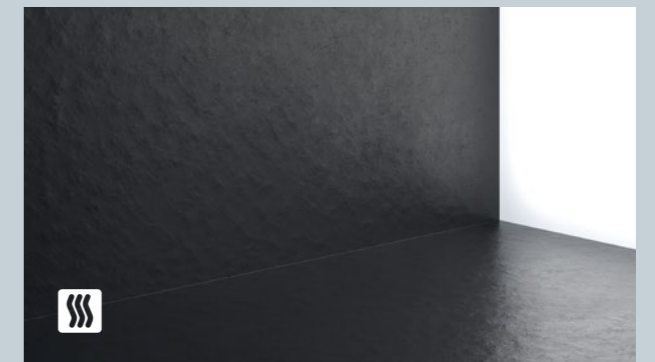

Matte

The matte texture pursues a natural, shine-free appearance, ideal for achieving a harmonious and timeless finish. Most Dekton products are manufactured with this finish.

Velvet

Velvet is Dekton's velvety texture. The materials chosen in Velvet create a feeling of warmth and comfort. This texture is perfect in classic colors, with veins.

Matte or Textured Velvet

Matte or Textured Velvet textures combine the warmth of velvet with the roughness of a textured, imperfect material. It is ideal for emulating a realistic finish, with the advanced features of Dekton.

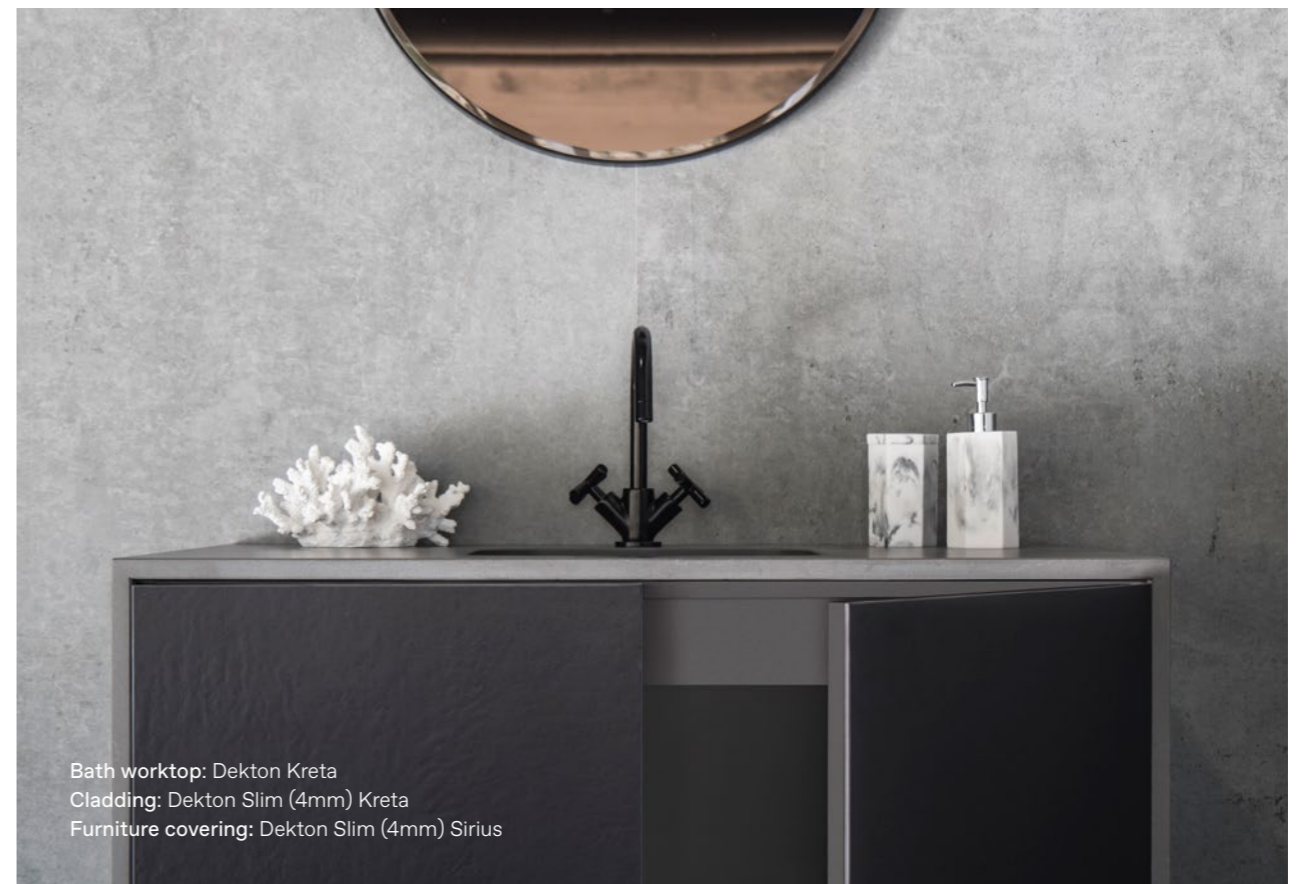

Bath worktop: Dekton Halo
Cladding: Dekton Slim (4mm) Zenith
Furniture covering: Dekton Slim (4mm) Kreta

Bathroom coating Dekton Slim 4mm

The most ultra-thin surface on the market.
Simply revolutionary.

4mm thickness in large format that offers unlimited design options and incredible ease of installation and transportation. Ideal for bathroom and kitchen walls, as well as all types of furniture.

Bath worktop: Dekton Kreta
Cladding: Dekton Slim (4mm) Kreta
Furniture covering: Dekton Slim (4mm) Sirius

Dekton Slim with our XGloss finish is the thinnest and most lightweight polished material available on the market

Slim thickness.
Huge format & performance

Its highly technical characteristics make it very strong yet light, easy to handle and install and perfect for both indoor and outdoor use.

DEKTON® SLIM
Designed by COSENTINO

Dekton XGloss

A bright, dazzling finish achieved through mechanical polishing, without the need for glazes or other materials.

Mirror effect

Cosentino's vast experience and expertise in treating and polishing natural stone over generations has enabled us to create a completely smooth surface with an almost entirely clear reflection.

Damp-proof Surface

It is highly resistant to stubborn stains, thanks to our X-Gloss nanotechnology that is unique to the market, and also boasts water-repellent properties.

Dekton Slim XGloss must have a mesh on the back to guarantee stability and protection against the manufacturing and installation procedures.

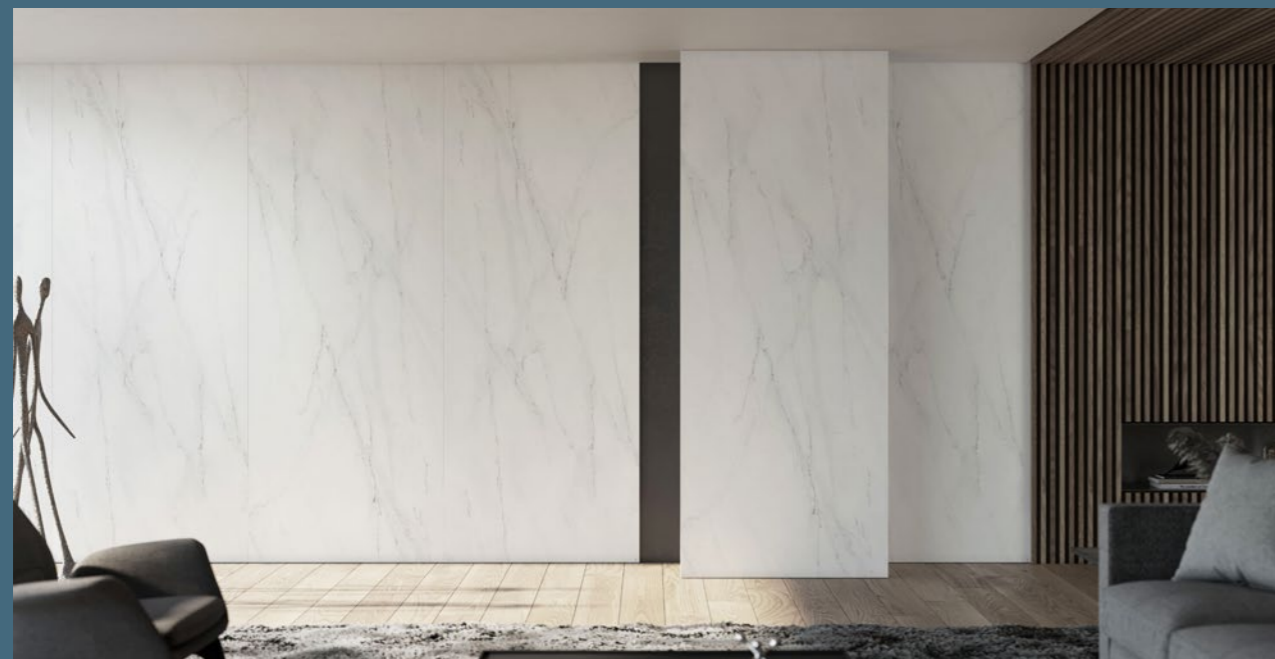

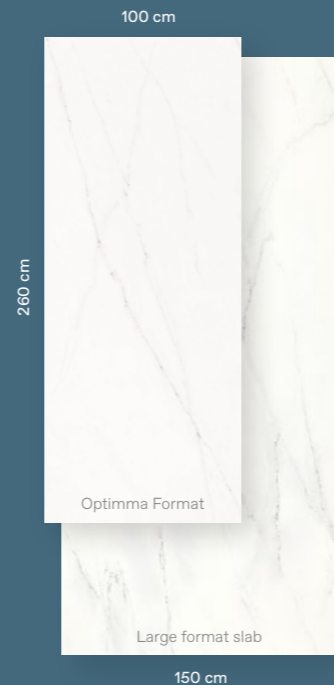

Optimma format

New optimized Dekton format. The ultimate interior cladding solution.

The Dekton slab has been optimized with its most common applications in mind to create a new format with improved cost, design, installation and handling. Introducing our first Optimma family format specifically for cladding:

260 × 100 cm
in 4 mm thickness

The slabs are created in 4mm thickness, which gives it a lightness that allows easy handling, and in case of need, it can be easily cut to adapt the product to all spaces.

A Dekton format optimised for maximum efficiency in the most common applications.

Cost efficiency

The sizes were optimized to the most common coating standards, this allows us to avoid waste, which in turn reduces price.

Design with purpose

The board has been created to take advantage of its total height, which makes it much easier to cut it for cladding.

Easy to install

The product is smaller and lighter, which makes it easier to use transport and handling. Cutting can be done with simple tools. The edges are already bevelled and the piece is always meshed.

Design match

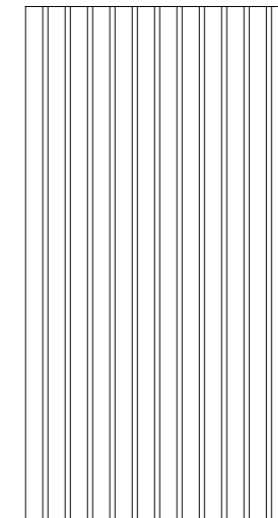

The design has been conceived to place the boards vertically to create a continuous design.

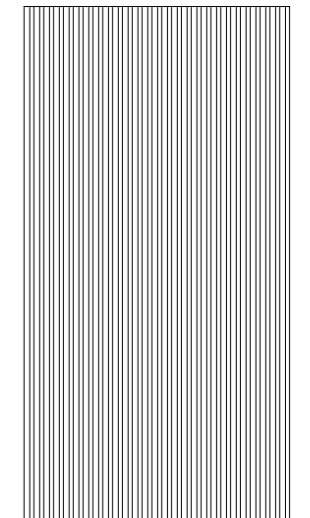

Dekton Ukiyo: The inner texture

Two patterns, available in five different colours, transform the look of interior cladding.

Dekton textures have been developed in collaboration with designer Claudia Afshar to create aesthetic and unique spaces.

Kitchen worktops

Dekton is a product designed to last and to create unique spaces, such as the kitchen, for unlimited enjoyment.

It is a clean surface, pleasant to the touch and resistant to the daily wear and tear of time. A uniform surface that can be laid in one piece, minimising cuts and joints. Thanks to its characteristics, it adapts perfectly to a wide range of design styles.

A combination of beauty and strength with easy and hassle-free cleaning. Dekton's structural density is a major technical breakthrough, but it is its resistance to scratches, stains and heat that really makes the difference in a space like the kitchen.

Outdoor kitchen

Cook with the sky as a roof

Cooking is definitely a pleasurable experience and doing it outdoors, usually results in a small social event. Everyday celebrations that we can enjoy with company around a grill. Dekton, due to its ultra-compact structure, is particularly suitable for installations for outdoor kitchens and barbecues.

Dekton provides strength and style to these spaces, it gives them an undeniable personality and unlimited practicality. Stains, bumps, utensils at high temperature...

Dekton will resist the demanding use over time while maintaining its unchanging beauty.

It is not affected by ice, sun, sleet, or wind either. When bad weather arrives, Dekton simply needs an effortless, fuss-free cleaning so that it can showcase its best again.

C·Bath

A NEW BATHROOM EXPERIENCE
BY COSENTINO

Cladding: Dekton VK01 Nebbia and Dekton Albarium
Flooring: Dekton Albarium

C·Bath is Cosentino's comprehensive approach to reimagining the bathroom space through design and technology

A complete vision of the space from a new perspective.

Innovation in the design of unique and personalised atmospheres, featuring large format wall and floor cladding and minimum number of joints, colours and textures in perfect balance, minimalist washbasins and shower trays designed in detail. Manufactured with state-of-the-art materials such as Dekton and other surfaces from the Cosentino Group, C·Bath gives a fresh look to your bathroom.

C·Bath is the experience of designing a bathroom to suit you, a personal space in which to find serenity and well-being: a bathroom to be lived in.

On the other hand, with The Bathelier, Cosentino presents exclusive collections created by designers from all over the world who interpret the bathroom of the future. Proposals where creativity is at its best. A creative look at the bathroom space where art and functionality converge.

Dekton Grip & Grip+

Improved grip for any anti-slip application such as bathrooms, swimming pools or outdoor floors.

Each space has different technical needs. We launch to the market a new portfolio for antislip flooring in two finishes Grip and Grip+

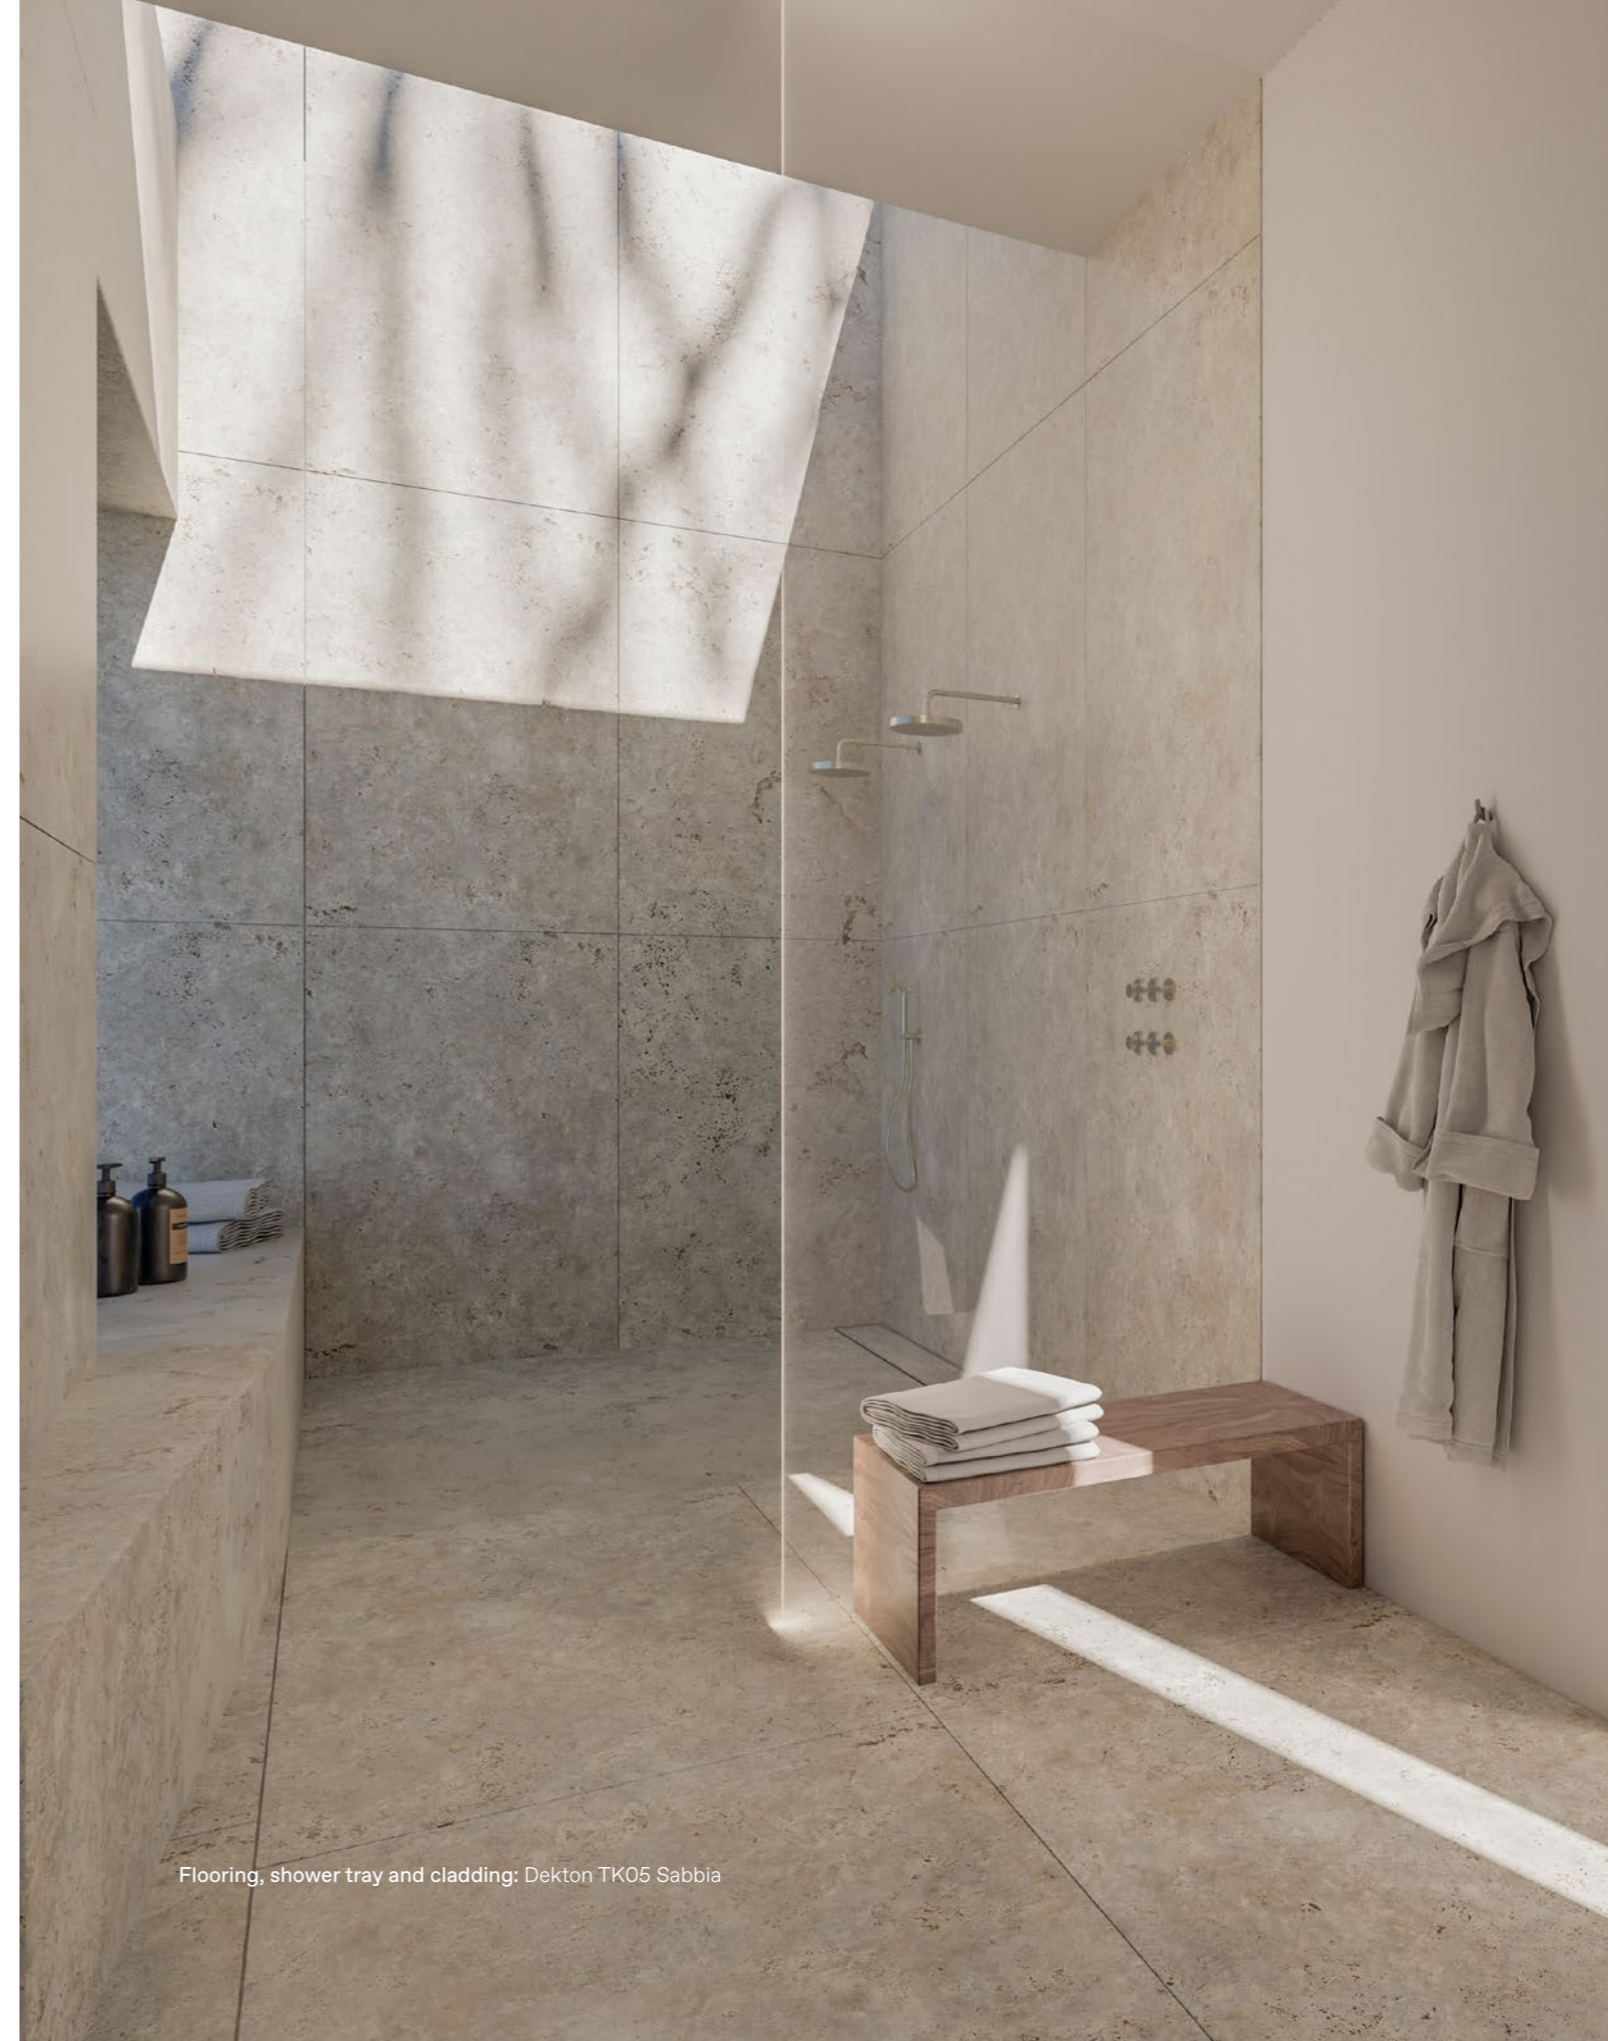

Grip, the anti-slip finish that is easy to clean and ideal for light colours. Grip+, the maximum grip for the most demanding applications and maximum ease of cleaning.

Two highly durable and resistant anti-slip treatments, applied in a controlled manner during the manufacturing process of Dekton, without the need for chemical or mechanical means.

Colours with the anti-slip finish may have slight colour differences compared to the standard matt finish, which are more evident in colours such as Sasea or Danae.

Bathroom cladding and worktops

Minimum maintenance.
Great beauty and resistance.

The bathroom is the space in the home, where hygiene and harmony need to express themselves in the best possible way. A peaceful environment devoted to personal care and hygiene - a space to relax and unwind free of any worries.

Dekton, thanks to its low porosity, is completely waterproof against liquids. Water glides smoothly over

the surface without ever penetrating. This, along with unchanging beauty, results in extremely easy cleaning.

Their textures and colours are an endless source of inspiration for the design of water-related areas, we're talking about Dekton, its possibilities are endless.
