Corporate purpose

Inspiring people
through innovative
and sustainable
spaces.

Mission

Leading company that, responsibly, imagines and anticipates with its customers innovative surfaces of high value for the world of architecture and design.

Vision

To lead the global surfacing market through the action of its brands with innovative architectural solutions that provide design, value and inspire the lives of our customers.

We are Cosentino

Certifications

Cosentino is deeply committed to exceeding the needs of our customers and suppliers with respect for the environment though responsible resource management, guaranteeing innovation and continuous improvement of our processes, products, and services globally.

At the center of Design

Cosentino House Builders Guide

The entire Cosentino network is committed to helping you accomplish the key objective of producing satisfied Buyers.

From quality materials and workmanship to home readiness and customer service, our focus is on providing solutions that add value to your Buyers and your homes.

All our products are bound and comply with strict regulations imposed by authorising bodies and our own exacting demands to provide sustainable, ethical, quality products and service.

Material Availability

Full control over the supply chain. Vertically integrated. From manufacturing to distribution to in some cases, countertop fabrication and installation.

Clear Pricing and Stability

Colours and price groups tailored to specific projects.

Quality and on-time Installation

Cosentino has the largest network of trained and certified Fabricators in the country. Products are always in stock and ready to meet production cycles.

Low Maintenance Products

Cosentino products are virtually maintenance free surfaces.

→ Cosentino City Barcelona / Atelier LAB

Product Warranty

Silestone® and Dekton® offer a 25-Year Transferrable Warranty and Sensa a 15-Year Warranty.

Local Support to Regional Customers

Our large team of Sales Managers can visit all sites to offer full training.

Added Product Value for your Buyers

Reassures your Buyers with an unexpected level of product protection.

- Creates real differentiation for your homes around the kitchen and bathroom
- Provides your Buyers with a countertop choice that adds more value over regular stone.

Enhanced Buyer Satisfaction

The entire Cosentino network is committed to helping you accomplish the key objective of producing satisfied Buyers. From quality materials and workmanship to home readiness and customer service, our focus is on providing solutions that add value to your Buyers and your homes.

Easy Warranty Registration

It's simple to register once for the whole project no matter how large and then hand over the warranty details along with the rest of the new-owner pack to your customer on completion.

Homeowner Care Program

Reliable service after move-in is essential to a builder who wants to enhance Buyer satisfaction. Dekton®, Silestone® and Sensa offer a Homeowner Care Program and product warranties. Our entire network of Certified Cosentino Installers are committed to servicing your Buyers and providing reliable service after the sale.

Product and Process Training

Educating the Buyer on the value of Cosentino brands is also critical to your sales success. To help accomplish this, training is focused on the specific product and installation process. The goal of the training is to equip your staff with the ability to properly present, select, order and care for the chosen product.

Ensured Availability, Preferred Delivery

On-time completion and homereadiness are important to you and your Buyers. To maintain our installation commitments, our network of approved Fabricators are encouraged to keep a standard line of colours in stock for efficient turnaround.

Grow Sales with the Leader

With the largest production and stock capacity in the quartz surfacing industry and the largest network of trained, certified quartz surfacing installers, building with Cosentino products means better home readiness for you and your Buyers.

Certified Assurance

All our products are bound and comply with strict regulations imposed by authorising bodies and our own exacting demands to provide sustainable, ethical, quality product and service.

Quality Point of Sale Materials

Small and larger samples are available through this programme along with literature designed to educate your Buyers on the features, benefits and overall value of owning Cosentino products. Sample boards can be made to your specific requirements.

Marketing Support

Programme of free material for show houses is available. Ask for details.

→ Cosentino City Sydney / Atelier LAB

Get inspired

COSENTINO CITY

Cosentino City

Live the Cosentino® DNA with a multifunctional space to create connections.

Cosentino® puts at your disposal the network of Cosentino Cities in over a dozen cities across the world. They were created as meeting places for inspiration and creativity, for interior designers and architects to find everything they need from Cosentino.

In our design and inspiration showrooms you will have access to:

→ Cosentino City Barcelona

→ Cosentino City Amsterdam

Personalized Visits

Arrange visits and meetings with your customers to show them Cosentino's innovative surfaces and products in a unique space.

New digital services

Use our augmented reality digital services to help your clients visualize their projects.

Experience Zones

A space to experiment with materials, textures, and surface patterns, combining them to create new design possibilities at our Atelier Lab.

Expert Advice

Finding the right design solution for any type of application, through experimentation and combination of Cosentino's most innovative brands, such as Silestone®, Dekton® and Sensa byCosentino®.

Events and Speakers

Learn and be inspired by our continuous programs of activities, speakers, and encounters with media specialized on design, architecture, culture, and creativity.

Our showrooms across five continents

- LOS ANGELES
- MANHATTAN
- MIAMI
- SAN FRANCISCO
- MONTREAL
- TORONTO
- BARCELONA
- MADRID

- TEL AVIV

Digital Slab

Cosentino® Digital Slab allows the visualization of all Cosentino products in a giant 4K 80” vertical screen.

This way, you'll be able to see the product closely resembling their original format and visualize hundreds of slabs with the swipe of a finger.

An amazing tool to experience the potential of Cosentino products.

Atelier Lab

A space to experiment with materials, textures, and surface patterns, combining them to create new design possibilities.

→ Cosentino City Barcelona

Exhibition of facade system

In our Cities you will experience a selection of the most interesting facades and buildings created by prestigious architects.

The fixation system and projects details can be explored through an interactive screen.

Sustainability

At Cosentino, we approach sustainability as a collective commitment that stems from the individual involvement of those that are a part of Cosentino. o

Our continuous improvement efforts involve constant analysis of our entire value chain - from the acquisition of raw materials to the delivery of the final product of consumers.

We are firmly aligned with the United Nations' 2030 Agenda. As a global leader in the manufacturing and distribution of innovative surfaces from our headquarters in Almeria Spain, we are committed to driving the path towards local and global sustainability.

→ Olives in Cosentino industrial park.

→ LED lighting throughout the Cosentino industrial park.

Energy

Energy efficiency and the use of renewable energy sources are the two key elements of our strategy to minimize the impact of our activities.

100% of our energy consumption comes from renewable energy sources. Additionally, for 2021 we aspire to reach 30% energy self-consumption.

On the other hand, the constant improvement of our processes and machinery allows us to reach a high level of energy efficiency, which translates in an 8% decrease of our electrical consumption in our production processes.

→ Photovoltaic installations at Cosentino

Water

Since our inception, we have valued the importance and understood the challenges of proper water management.

It has motivated us to implement a sustainable use policy maximizing the efficient use of water resources in the different production processes.

We use cutting-edge technology to achieve 99% recycled water in all our processes in the Cosentino Industrial Park.

In addition, we use 100% of the surplus water to irrigate green areas.

Materials

We are committed to making the most of the materials we work with throughout the value chain.

In recent years we embarked on an ambitious R&D project called “Circularity” to reuse the materials from which we make our products.

Another action is the disruptive HybriQ+ technology that brings about the new generation of Silestone. HybriQ+ incorporates a minimum of 20% recycled materials and is manufactured with 100% renewable energy and 98% recycled water.

Cosentino® CO₂ Neutral

The ultra-compact Dekton® surface is classified as Carbon Neutral.

We offset our CO₂ emissions over the entire life cycle

We have identified those projects that meet the following characteristics

necessary for responsible compensation and, at the same time, have a strong social component that supports the achievement of the Sustainable Development Goals of the UN's 2030 Agenda.

The project chosen in 2019 for offsetting emissions has a significant social impact on sustainable development through support for the local economy by training and creating of employment.

Dekton®

by Cosentino®

Innovation applied to design

Dekton® is a sophisticated blend of more than 20 minerals extracted from nature. Its production process is the result of years of learning and inspiration in the manufacture of glass, state-of-the-art porcelain and quartz surfaces.

Electron microscopy makes it possible to appreciate the reduced porosity of the material, a consequence of the sintering and ultracompaction process exclusive to Dekton®. This reduced porosity and the absence of micro-defects causing stresses or weak points are the distinguishing feature of Dekton®.

Sintered Particle Technology

Dekton® uses an exclusive SPT in its manufacturing, capable of sintering mineral particles, bonding them together and compacting their internal structure. This innovative technological process mimics and accelerates the processes that natural stone undergoes when exposed to high pressures and temperatures for millennia.

Dekton® emulates in a few hours what nature takes millennia to do, thanks to the exclusive SPT technology.

- The furnace has a length of 180 metres (196 yards).
- Temperatures reach approximately 1250°C (2300°F).
- Total processing time depends on the thickness of the slab (about 4 hours).

Safety in facades and cladding

In order to reinforce safety in ventilated facades and interior cladding, there is the possibility of adhering a safety mesh behind the Dekton® slab, specially developed to prevent falls due to breakage. It is a 300 g/m2 fiberglass mesh adhered to the material with epoxy resin. Safety is one of Cosentino's main concerns.

Ultracompact Surface

Dekton®
Product features

Dekton® meets all the technical specifications required in a high-resistance surface to materialize any interior and exterior residential design project.

Low water absorption

The water absorption of Dekton® is negligible; therefore, it does not undergo expansion movements.

High resistance to UV rays

Dekton® is highly resistant to ultraviolet light (UV rays) and will not fade or degrade over time in any outdoor application.

Superior mechanical strength

The wide variety of Dekton® thicknesses allows its use in applications where a high wind or impact resistance are a requirement of the project.

Fireproof material

Dekton® can withstand the highest temperatures without burning, charring, or cracking. The standar European tests EN 13501 y ASTM E84 qualify the ultracompact surface as non-combustible.

Durable Color

The control of pigmentation and decoration in the manufacture of Dekton® gives the material better color uniformity for each slab, resulting in a long-lasting product that does not fade over time.

Resistant to scratches

Dekton® is one of the most scratch resistant surfaces on the market today. It has a rating of seven (7/10) on the Mohs scale of mineral hardness.

Dimensional stability

The expansion of Dekton® is minimal: the panels can be installed with thin joints. These joints will retain their width under all conditions.

Maximum fire and heat resistance

Dekton® has been successfully installed in facades located in areas exposed to high temperatures.

Freeze and thaw resistance

The resistance that Dekton® has demonstrated in durability tests under freezing and thawing situations in various conditions proves its high performance.

Easy cleaning and minimal maintenance

It is easy to remove Dekton® graffiti with standard cleaning products. Reduced maintenance costs.

Abrasion resistance

Dekton® is even more resistant to abrasion than granite and porcelain, being the ideal surface for facades or floors subjected to high activity in commercial applications.

Resistance to stains

Dekton® is a material that is resistant to stains from different sources so that they will not be permanent.

Dekton Formats

Adaptable and versatile. In any space.

Dekton® offers a variety of standard sizes, custom sizes and thicknesses to meet the functional and creative needs of the designer in any interior or exterior project, no matter how complex.

Large format

Optimma Format → 260 x 100 cm
Large format board → 320 x 144 cm

Other formats

- 106 x 71 cm
- 142 x 106 cm
- 142 x 142 cm
- 142 x 71 cm
- 142 x 79 cm
- 159 x 142 cm
- 159 x 71 cm
- 71 x 71 cm
- Tailor-made formats

Thicknesses

- 0,4 cm
- 0,8 cm
- 1,2 cm
- 2 cm
- 3cm

Dekton textures

Different Sensations.
Richness of Shades.

Dekton® comes in different textures so that the only limit is the architect's or designer's imagination: from the finish ultra-glossy, to matte or velvety textured options.

X-Gloss

A luminous and dazzling finish achieved by mechanical polishing, without the need for enamels or other materials.

Matte

The matte texture pursues a natural, shine-free appearance, ideal for achieving a harmonious and timeless finish. Most Dekton® products are manufactured with this finish.

Velvet

Velvet is Dekton's velvety texture. The materials chosen in Velvet create a feeling of warmth and comfort. This texture is perfect in classic colors, with veins.

Matte or Textured Velvet

Matte or Textured Velvet textures combine the warmth of velvet with the roughness of a textured, imperfect material. It is ideal for emulating the finish of natural stone.

Optimma

New optimized Dekton® format.

The ultimate interior cladding solution

The Dekton® slab has been optimized with its most common applications in mind to create a new format with improved cost, design, installation and handling. Introducing our first Optimma family format specifically for cladding: Optimma format 260 x 100 x 0.4 cm.

260x 100 cm
in 4 mm thickness

The slabs are created in 4mm thickness, which gives it a lightness that allows easy handling, and in case of need, it can be easily cut to adapt the product to all spaces.

Cost Efficiency

The sizes were optimized to the most common coating standards, this allows us to avoid waste, which in turn reduces price.

Design with Purpose

The board has been created to take advantage of its total height, which makes it much easier to cut it for cladding.

Easy to Install

The product is smaller and lighter, which makes it easier to use transport and handling. Cutting can be done with simple tools. The edges are already bevelled and the piece is always meshed.

Design Match

The design has been conceived to place the boards vertically to create a continuous design.

Dekton® Slim

High aesthetic value and performance in vertical cladding and furnishings

Minimum Thickness of 4mm → Large Format & Performance

Dekton® Slim is the ultra-thin 4mm thickness in large format that offers unlimited design options and incredible ease of installation and transportation. Ideal for bathroom and kitchen floors and walls, as well as all types of furniture.

01 → Large format and minimum number of joints

Its large format of up to 3200 x 1440 mm covers large surfaces avoiding as much as possible the number of joints and therefore, dirt.

02 → Easy installation

Having such a light format, but with so many possibilities, simplifies everything. Its thin thickness allows for quick cutting and on-site adjustments with ceramic tile tools.

03 → Design without limits

Dekton® Slim is very easy to work with and can be cut to size. It adapts to all spaces.

04 → Maximum resistance to humidity

Dekton® Slim is the ideal ultra moisture and stain resistant coating for bathrooms. A high performance product that requires no more maintenance than a simple damp cloth.

DEKTON® SLIM
designed by COSENTINO

At Cosentino we offer personalised Customer Service. Ask as many questions you like and request all the advice you need to ensure you get exactly what you want out of the new Dekton® Slim.

Find your nearest Cosentino Centre at www.cosentino.com

01 → Bathroom Cladding

Maximum resistance against humidity with minimal joints.

02 → Kitchen Cladding

Reduced thickness, infinite possibilities

03 → Furniture Cladding

Reduced thickness, infinite possibilities

Silestone®

by Cosentino®

The ultimate mineral HybriQ

Silestone® is a hybrid surface of minerals and recycled materials to dress interior spaces with color and texture.

Silestone® advantages

Silestone® is extremely durable in kitchens, bathrooms and other spaces exposed to constant activity and use. In addition, it offers an unlimited range of colors and textures.

Silestone® has many advantages, including minimal maintenance, high resistance to stains and scratches, and a low fluid absorption rate. This resistance to fluids and its minimal joints make Silestone® the ideal solution for places where liquids are present. Silestone® is resistant and allows for prolonged enjoyment over time, beyond what is expected.

The properties of Silestone® are the result of constant years of innovation that guarantee maximum hygiene and safety.

Acid and Scratch Resistant

Silestone® has a high level of scratch and scuff resistance, impacts, as well as to external aggressions and acids common in daily kitchen use.

Impact Resistant

The high impact resistance of Silestone® allows the handling of hard objects (pots, pans, trays, etc.) with total peace of mind.

Stain Resistance

Silestone® is a non-porous surface that is highly resistant to stains from coffee, wine, lemon juice, oil, vinegar, makeup and many other everyday products.

Introducing the new Silestone®

HybriQ is a technology developed by Cosentino® that consists of a manufacturing process that respects the environment and a renewed formulation of mineral-based Silestone® surfaces and recycled materials

The Ultimate Mineral HybriQ Surface

98%
Recycled
Water

100%
Renewable
Energy

MIN 20 %
Recycled Glass
& Water

More sustainable

HybriQ+ uses a minimum of 20% recycled materials, 98% recycled water and 100% renewable energy.

Same benefits

Silestone® with HybriQ+ maintains all the characteristics of quality, durability and warranty that have made Silestone® the market reference in its category.

More innovation

Cosentino®'s commitment to offering the most innovative and sustainable surfaces leads Silestone® to exceptional performance and depth of surprising color. Silestone® is the combination of innovation and sustainability.

More design

The new mineral composition allows for greater depth of color, textures and Silestone® tones to create unique and personalized interior spaces.

Silestone® formats

Infinite possibilities for
indoor applications

Silestone® is available in slabs up to 325x159cm and in 30x30cm, 40x40cm, 60x60cm, 60x30cm and 60x40cm tiles. They are marketed in thicknesses of 1.2, 2 and 3cm. In addition, different pieces can be combined to simulate thicker edges.

Large format

Jumbo Boards → 325 x 159 cm
Standard Boards → 306 x 140 cm

Jumbo Slabs

Cosentino® offers Silestone slabs in Jumbo format (325x159cms max.). This format allows for the creation of large surfaces with minimal jointing, design versatility, and better hygiene. This way, the slabs' use is optimized and waste minimized.

Floor format

- 30 x 30 cm
- 40 x 40 cm
- 60 x 60 cm
- 60 x 30 cm
- 60 x 40 cm
- Tailor-made formats

Thicknesses

- 1,2 cm
- 2 cm
- 3 cm
- Customised thicknesses by adding different pieces together

Silestone® textures

Surface sensory
perception.

In order to adapt to all styles, Silestone® offers different textures for any of its applications. Polished, Suede or Volcano are three possibilities that make your imagination fly and have the countertops, floors or walls with the texture you have always wanted.

Polished

Extreme gloss, smooth surface to the touch and uniform, intense and consistent color.

Suede

A matte appearance that conveys a unique experience to the touch for its beauty and fineness.

Volcano

Rustic and rough texture, at the same time attractive, soft and pleasant to the touch.

Sensa

by Cosentino®

Protected Natural Stone

Sensa by Cosentino® is premium maintenance-free natural stone brought to you by Cosentino, a world leader in the natural stone industry.

Sensa by Cosentino® is treated with a revolutionary stain protection treatment called SenGuard, and comes with a 15-year stain warranty.

SENSA
15
AÑOS
GARANTÍA

SENSA
by COSENTINO®

Treatment

The long-lasting, chemically-integrating technology allows the material to breathe. This technology enhances its powerful properties.

The process alters the surface tension of the stone causing the material itself to prevent liquids such as water, coffee or oil from penetrating

SENSA
by COSENTINO®

Normal

Applications

Sensa kitchen countertops.
Natura, stain-proof beauty.

Enjoy the design, hardness and resistance of natural stone without fear of stains. Sensa by Cosentino® quartzites and granites feature a revolutionary stain-resistant treatment that protects them for the life of your countertop.

Textures

Unique shapes for
unrepeatable surfaces

The colors and textures of Sensa by Cosentino® have the patient and whimsical design of nature. Each of the seven available shades has a texture that produces different effects and sensations: suede, polished or caresse.

Living rooms

The living room is transformed into a personal and timeless space with Cosentino surfaces; an expression of sophistication and functionality.

Live your space

Rediscover your home’s living space

An integrated solution
with maximum versatility
and functionality.

Endless personalization
possibilities.

Limitless customization

Designing a living room with high aesthetic value requires versatile surfaces in a variety of colors, textures, and unique chromatic pantones, such as Dekton and Silestone, which will cover floors, furnitures, cladding, and more, to create an integrated and differential interior design experience.

Resistance to high traffic

Dekton® es una superficie innovadora con un alto nivel de resistencia, capaz de soportar altas temperaturas, rayos ultravioleta y cualquier arañazo. Permanece inalterable ante el desgaste y la abrasión, como resultado del alto tránsito diario de una estancia como el salón.

Easy installation

Dekton® is offered in a Slim format which is light, easy to cut, and adaptable to every space. Its thin thickness of 4mm allows adjustments to be made during installation, using tools for ceramic tiles.

Comprehensive solution

The same material for flooring, cladding, and furniture created visual continuity and high aesthetic impact, unifying spaces and increasing their functionality.

New Dekton® Optimma Format

Dekton® has been optimized for interior cladding. The Optimma format (2600x1000x4 mm) allows for cost efficiencies, more design possibilities and easy installation and manipulation. The results: impactful cladding and integrated spaces.

Large format, minimal joints

Dekton Slim's large format up to 3200 x 1440 mm and thickness of 4 mm allows you to cover large surfaces creating a continuous and homogeneous aesthetic for cladding and furniture. This size reduces the number of joints, easing cleaning and maintenance.

01/ Living Space

Spaciousness,
brightness and
visual continuity

**A single flooring material
for the whole house**

Goal: to create an attractive continuous canvass, without joints, that adds visual unity and highlights the greenery and furniture of the space.

To achieve this, Silestone® White Zeus has been used, which provides continuity throughout the home. The walls and interior woodwork, also in the same white color, help to create a bright, calm and balanced space.

Continuous spaces all in the same material.

The pure white of the Silestone® flooring contrasts with the warmth of some of the wooden furniture, such as this sideboard and the dining table.

A clean, neutral background highlights the artwork in this loft and the greenery of the home. A beautiful yet practical solution that will stand the test of time.

Set of horizontal planes

As this is an open-plan area with a split-level living room, the use of the same flooring material, combined with the appropriate use of glass, provides harmony and balance to the space.

→ Flooring by Silestone®, White Zeus color

02/
Living
Space

High-rise city
apartment

A modern, functional
grey canvas

In this city apartment, the interior designer has opted for a light grey Dekton® Keon cladding in a large square format. The choice of this material is perfect for making the space look bigger and giving it visual continuity.

The grey flooring goes well with the industrial-style furniture and the fabrics of the sofa. All in all, a simple design that will stand the test of time.

→ Flooring by,
Dekton® Keon

Tropical wood on a large-format grey background.

The coldness of grey and white is balanced by subtle hints of reddish wood in the dining table and chairs, the floor lamp and the sofa legs.

The choice of Dekton® Keon flooring is perfect for this practical and stylish city apartment.

03/ Living Space

Materials with
character for an
eclectic home

Grey veining is on trend

The vision for this very distinctive home was clear: the owner was looking for a vibrant material with uniqueness so that each piece would be different. Although large-format Dekton® Kreta slabs are used to create a continuous space, Dekton® Bergen was chosen for the countertop and the side cladding of the furniture, with its grey veining giving a sense of movement.

The same material can be found in the staircase and the skirting board, bringing together the different spaces.

→ Flooring by Dekton®,
Kreta color

Matte
texture

Dekton® embraces a velvety texture. The matte finish provides a flat, non-rough surface, which conveys a unique soft and pleasant feel.

Large format Dekton® Bento is an ideal solution for flooring in open-plan spaces. It brings visual continuity, neatness and a neutral decoration to combine, as in this case, with wooden wall panelling or white lacquered interior woodwork.

→ Flooring by Dekton®,
Bento color

04/
**Living
Space**

Sophistication
and mid-
century style

**Dekton® Danae
throughout the home**

For a classic look, the interior designer for this home opted for designer items such as lamps, armchairs and chairs.

Dekton® Danae, a surface inspired by traditional travertine, helps to blend all the spaces and helps to make the furniture stand out.

Thanks to its large format, the result is a continuous floor in a cream, bright and matte tone with hardly any joints.

A format for every space

The designer of this home has used large-format Dekton® Danae slabs for flooring. This creates a very neutral and uncluttered effect, helping to highlight the designer furniture, such as the Barcelona chair.

The staircase allows for a different format, giving the impression of floating in space.

→ Flooring by Dekton®, Danae color

05/ Living Space

Cladding to
connect spaces

**Color depth and
fine veining**

Silestone® Charcoal Soapstone was selected for the wall cladding of the living room, the island and the kitchen fronts. With its fine white veining, it creates an elegant color contrast to the ensemble.

Wall cladding
for a niche

The versatility of Silestone® allows the slabs to be cut to the desired size and to suit every need. This project features a TV niche, using a different type of cladding and its own lighting,

helping to create a contrast.

A further advantage of Dekton® and Silestone® wall cladding is that the designer does not need to fit a skirting board.

→ Wall cladding by Silestone®,
Charcoal Soapstone color

Simplicity
and elegance

The combination of these two white and dark grey veined materials results in a simple and elegant look. Wooden pieces of furniture, hemp rope and a set of candles add some warmth to the space.

Cosentino Bathrooms

Cosentino® helps you
to rediscover your
bathroom through a
unique and integrated
design concept

Bathroom Space

Reimagine the most personal space in the home. Create a unique experience in which the most beautiful and functional Cosentino surfaces transform unique, warm, and exclusive spaces.

From wall and floor claddings in different yet perfectly balanced formats, colors and textures, to attractive vanities and shower trays, carefully designed with great attention to detail and simplicity.

Solutions of great aesthetic and functional value to suit every requirement and style of bathroom, which redefine the way in which we experience such a personal space and feeling of well-being .

Large format

Large format, minimal joints. Tailor-made floors and wall cladding.

Bathrooms are exposed to constant activity. Using a high-quality surface for floors and cladding reduces joints and guarantees hygiene and cleanliness. The strategically placed slabs in XXL make the room look bigger, creating the sensation of a larger bathroom.

Shower Trays

Shower trays with Dekton Grip+ and Silestone: exclusive and integrated designs in the bathroom with limitless customization possibilities.

Cosentino offers an extensive collection of shower trays in the material the architect or designer chooses and adaptable to any space. It is an interesting alternative to the traditional shower that simplifies installation and assembly.

Sinks

Sinks and countertops with great versatility that adapt to any space. Sophisticated designs with maximum beauty and durability.

Silestone sinks are built with a unique and innovative design able to live up to the most demanding creative proposals. From sinks that integrate into the countertop, to above-countertop options, double bowls...everything is possible with tailor-made fabrication.

Optimma Format

Dekton Optimma Format. Optimized for interior bathroom cladding: taking full advantage of the space, easy installation, and design continuity in a vertical format.

The Optimma slab format is 260 X100 cm y 0.4 cm thick, able to meet any vertical cladding need creating a continuous design, taking advantage of the full height with easy installation and minimum waste.

Total Integration

Total aesthetic integration and visual continuity. The same material for your entire bathroom: floor, cladding, shower tray, and vanity.

A single surface applied to every component of the bathroom allows for complete esthetic homogeneity, creating harmony, balance, and amplitude.

Colors and textures

New collections of innovative, on trend colors and textures. to create bathroom spaces full of originality and impact.

Innovative Silestone and Dekton surfaces possess a wide variety of solid and veined colors, unique chromatic pantones, and sensory textures to rediscover bathroom spaces.

01/ Bathroom Space

Minimalist Style

Minimalist bathrooms, plain and bare: purity of lines, neutral colors and balance of shapes.

Surfaces blend harmoniously in with the space, creating a sense of well-being.

In a minimalist bathroom, shower trays and vanities come together in perfect harmony with horizontal and vertical cladding, all in the same material.

Dekton's most versatile interior cladding format, Optimma 260X100 cm, surrounds the Gocce shower tray, achieving the best result for a minimalist bathroom.

The wide, well-defined lines of the Silestone® Silence vanity in Corktown colour (Loft Series), create a dramatic contrast against the Dekton® Rem cladding, a surface featuring a white background with brown and grey veins.

- 1→ Floor and wall cladding by Dekton®, Rem color (Optimma Format)
- 2→ Silence washbasin by Silestone®, Corktown color
- 3→ Gocce shower tray by Dekton®, Rem color

02/ Bathroom Space

Urban-
Industrial
Style

Reinterpreting the
industrial style:
cement and veining
enjoy harmonious
interpretation.

Using a black and grey palette, the designer
has created a timeless yet modern bathroom,
in which two very powerful elements stand
out: the grey floor with cement effects,
in Dekton® Kreta, and the monolithic-
looking countertop, in Silestone® Charcoal
Soapstone.

Floor and wall cladding
in the same material
to unify spaces

Inspired by the typical New York style loft without walls, the interior designer planned a metal and glass structure that also serves as the front of the bathroom.

A strong-looking half wall in the same material as the floor – Dekton® Kreta – is vertically integrated into this structure.

On the horizontal plane, the Silestone® Charcoal Soapstone countertop stands out. In total creating a very attractive contrast of planes and volumes.

In contrast, and to add a sense of lightness, the designer has opted for two beautiful and delicate Marie Top vanity in Silestone® Blanco Zeus, featuring a round design.

1

2

3

4

- 1→ Bathroom countertop by Silestone®, Charcoal Soapstone color
- 2→ Marie Top washbasin by Silestone®, Blanco Zeus color
- 3→ Tailor-made shower tray by Dekton®, Kreta color
- 4→ Floor cladding by Dekton®, Kreta color

A large-format, grey floor is always the right choice. In this project, the Dekton® Kreta material from the Industrial Collection provides a cement-like finish, ideal for an industrial or urban decorating style.

With its soft, rounded lines, the Marie Top washbasin is the perfect choice to place on the countertop. Although this project has a distinctly industrial look, its one-piece design, with no visible joints, enhances its attractiveness.

03/ Bathroom Space

Urban-
Industrial
Style

Continuous surfaces for floor,
vertical cladding, countertop
and vanity to create a
flowing, unified space

①

②

The uninterrupted surface of Dekton® Vera, used for floor, wall and countertop with vanity, is the unifying feature in this bathroom. This material from the Natural Collection is reminiscent of polished cement, but also features long, delicate veins that run along the entire surface.

The impressive, straight-lined Simplicity washbasin, also in Dekton® Vera, is fully integrated into the countertop.

1→ Revestimiento suelo, pared y encimera, Dekton® Vera
2→ Simplicity vanity by Dekton®, Vera color

04/
Bathroom
Space

Urban-
Industrial
Style

Cement, wood and iron: an essential, classic trio for any industrial style project. In this industrial style bathroom, all three materials are very much present.

Floor and cladding feature [Dekton® Kreta](#), a cement-like grey colour that is part of the [Industrial Collection](#).

The under counter cabinet in reclaimed wood with black metal profiles finishes off the industrial look.

To create contrast whilst highlighting the vanity area, the designer has chosen a [Silestone® White Zeus](#) countertop. The vanity integrated into the countertop provides a practical and hygienic design.

Custom showers and shower trays in the same material as the floor

Integrating the shower area with the floor and wall cladding in order to avoid cuts and changes of plane creates a seamless, on-trend look.

The Dekton® Gocce shower tray makes it easy to achieve. Uninterrupted surfaces, large-format shower screens with black profiles and ceiling-mounted shower heads result in a stunning shower design.

In this project, the Evita S vanity is integrated into the countertop. Both integrated vanity and surface-mounted washbasins are currently in vogue.

The use of cantilever, freestanding furniture and matt black taps finish off the look.

Silestone® White Zeus, from the Mythology Collection, is a timeless material, which brings a touch of brightness and character to any bathroom.

Dekton® Kreta is a cement inspired material, perfect for urban or industrial style decoration. Its 320 x 144 cm format allows for continuous surfaces and integrated spaces; for example, the bedroom, bathroom and living room - the result is a loft style look.

- 1→ Countertop by Silestone®, White Zeus color
- 2→ Gocce shower tray by Dekton®, Kreta color
- 3→ Evita S washbasin by Silestone®, White Zeus color
- 4→ Wall and floor cladding by Dekton®, Kreta color

05/ Bathroom Space

Contemporary
Style

An interesting use
of space and cream
tones result in this
contemporary
style bathroom.

Three vertical planes - mirror, vanity and window
- in perfect contrast to the monolithic countertop
and the horizontal plane of the floor, in the same
material, achieve a spectacular result in this very
architectural bathroom.

The coldness and abruptness of square shapes and vertical and horizontal planes is offset by the warmth of the materials used in the project.

Inspired by the quartzite of the Taj Mahal, Dekton® Taga evokes the elegance and character of natural stone.

For the wall, the designer has chosen Dekton® Taga, a color embracing earth tones and caramel-colored veins: an evocative yet classic colour for such a modern design.

Dekton® Fossil, from the Natural Collection, has been used on both the countertop and floor, achieving an excellent result: a dark grey cladding that transports us back to the most ancient periods. This color is available in two formats, 320 x 144 cm and made to measure, which is very useful when it comes to cladding the horizontal planes of a space, such as the floor and countertop of this bathroom.

Finally, as if it were a huge totem, the washbasin has been custom-made in Silestone® Negro Tebas, with an attractive matt texture finish.

①

Cosentino Exterior Spaces

Redesign your
outdoor spaces to
include porches and
terraces that blend
in with your home

Exterior Space

Customization without limits

Open spaces with freedom for inspiring, designing with a unique purpose: personalizing your outdoors spaces

Easy installation

Dekton® is very lightweight, easy-to-cut and adaptable format.

Resistance to high traffic

It is unaffected by wear and tear typical in high-traffic areas such as living rooms.

Dekton Outdoor Worktop

Dekton outdoor worktop is resistant and durable. Innovative surfaces turn into functional and beautiful worktops.

01/
Exterior
Space

Redesign your outdoor spaces to include porches and terraces that blend in with your home

Beautifully continuous and durable outdoor spaces

Outdoor areas such as porches, terraces or gardens have become the most precious spaces of the home. In the past, outdoor materials required annual maintenance and often lacked proper care. In addition to this, there was always a visible gap between indoor and outdoor flooring.

Dekton® redefines the experience of enjoying outdoor spaces by creating uninterrupted floors that continue inside. The exterior and interior become continuous, with almost no joints or maintenance, and will remain unaltered over time.

→ Revestimiento suelo,
Dekton® Aeris

Dekton® Blanc Concrete is a material from the Tech Collection that features an interesting combination of beige and grey with a concrete-inspired look. It works very well on outdoor floors thanks to its 320 x 144 cm format. It can be fitted to a staircase, swimming pool, outside covered area, etc., and it can continue inside the home.

Dekton® Grip+ prevents slipping in outdoor areas when walking barefoot. In addition, it is highly resistant to stains, UV rays and temperature changes

**.Outdoor spaces
with a concrete look**

A large-format natural foundation connects the porch or terrace with the living room; the material has the look and feel of concrete, but without its disadvantages – the end result is spectacular! The designer can find all these advantages in Tech and Industrial collections by Dekton.

02/
Exterior
Space

Sand and white
expanses with
Mediterranean
character

Visual
continuity

In this project, the architect designed a Mediterranean and up to date house with cubic volumes and modern floor plans.

The Mediterranean style can be seen in the white walls, reminiscent of the whitewashed houses of southern Spain, and in the continuous large-format floor that evokes the seaside. A warm, durable and practical material that connects the terrace, porch and bathroom spaces.

→ Flooring by Dekton®,
Danae color

**The warmth of
Dekton® Danae**

Dekton® Danae from Natural Collection is a timeless material that blends perfectly into any space. Its limestone beige tone is reminiscent of sand.

It is available in 320 x 144 cm format, making it the perfect choice for flooring.

There are 5 thicknesses (4, 8, 12, 20 and 30 mm); ideal for countertops, furniture and wall cladding both indoors and outdoors.

03/ Exterior Space

Inspiring outdoor
spaces that associate
with local materials

Functionality with a rustic touch

In this porch and garden project, the interior designer has renovated a house with practical and technologically efficient materials. This stylish renovation includes the use of Dekton® Kreta for the flooring and the replacement of the original windows with large glass windows.

These modern finishes fit perfectly with the stone masonry walls, terracotta pots and rattan chairs – all traditional materials with a rustic touch.

→ Flooring by Dekton®,
Kreta color

**Floor and large-format
table with the same
code: Dekton Kreta**

Dekton Kreta was selected for the outdoor flooring of this house, a grey part of the Industrial Collection that mimics cement.

Even though it is available in 320 x 144 cm format, the designer opted for a more reduced format to leave visible joints reminiscent of a checkerboard

The same material was used to create the large 4 meter table, which created a monolithic, robust, and potent effect.

04/
**Exterior
Space**

XXL format for
large surfaces
which stand out
in your home

**Porch and terrace
in a single finish**

One of the challenges of this project was to successfully integrate the outdoor space with the rest of the house.

To do this, Dekton® Danae 320 x 144 cm slabs have been laid vertically with continuous joints that are barely visible.

The use of the large format in this layout gives a sense of depth, welcoming you into the home while connecting the outdoor and indoor spaces.

→ Flooring by Dekton®,
Danae color

**Endless possibilities in
any outdoor space**

In addition to the unique properties of the material that make it ideal for outdoor applications, the different beige shades of Dekton® Danae also make it a very beautiful choice.

The large-format flooring on the two floors of the house connect and blend both spaces seamlessly with an elegant and timeless visual appearance.

05/
Exterior
Space

A house on the
mountain overlooking
the fjord

When the material
blends in with nature

This impressive home is an architectural achievement which showcases materials that blend in and complement nature. Objective: to seamlessly blend in with the surrounding nature, highlighting proximity to the fjord.

Perfect harmony is achieved with the grey of the reinforced concrete – like rocks – and the brown of the façade cladding – like wood and clay – finished with the infinite glass surfaces overlooking the water.

→ Ventilated façade by Dekton®, Kadum color

Reinforced concrete + Dekton®

Dekton® Kadum from the [Tech Collection](#) features brown and charcoal tones and an oxidized matte finish, bringing a modern yet industrial feel to any building.

In this home, Dekton® Kadum was the perfect choice to help achieve a very modern architectural style reminiscent of Frank Lloyd Wright's iconic Fallingwater house.

Two resistant materials work together for the façade of this very special home, achieving a fantastic result.

The architect has designed the layout using large slabs and various formats, which helps to create a sense of horizontal symmetry and suits the different spaces.

06/
Exterior
Space

A kitchen with
character
that breathes
fresh air

**Black and
sandy tones**

When working in such a beautiful environment, surrounded by water and greenery, a designer should go for simple shapes and honest materials so as not to compete with the landscape. This is the case of this outdoor kitchen, “hanging” over a white sandy wetland and roofed with bamboo canes. The chosen materials -concrete for the structure of the bar, table and bench, and Dekton® Kelya for all the worktops- offer a raw, stark and elegant finish, without pretension.

The colour palette ranges from earth to black tones so as not to outshine the greenish blue of the wetland. The result is an outdoor kitchen with barbecue, very attractive and with excellent performance to withstand the sun’s rays and temperature changes typical of the outdoors.

Worktop and extra large table

The focal point of the project is the extraordinary worktop in Dekton Kelya, with large dimensions and a 10cm strip. This worktop connects the cooking and dining areas, creating a social space to share and enjoy while cooking. A brutalist and functional style that responds to the demands of a client who loves cooking without renouncing the beauty of a finish like Kelya.

Cosentino Kitchens

Reinventing the
kitchen to make it the
heart of the home

Kitchen Space

It's been a long time since the kitchen was a forgotten room in the darkest part of the house. The kitchen is now a key space that can integrate with the living-dining room and share the same design.

Integration within the space

The kitchen as a living space connected to the rest of the house. Total integration of the worktop with the living room cladding or floor

Kitchen Worktop and Island

Thousands of households all over the world have trusted Cosentino to provide them with a kitchen that is not only functional and beautiful, but also plays a key role in the daily lives of their families. We offer a wide range of colours and textures, so you're sure to find your perfect worktop.

Kitchen Flooring and Cladding

In this so-called “reconversion” process, the island plays a major role, as it serves as a connecting element between the two environments as well as a meeting place in the home. In this project, the interior designer built the entire design around the island.

Kitchen Sinks

The sink is a crucial feature within the room: it must guarantee resilience, safety, and hygiene. At Cosentino we use a low-porosity material which can withstand impact, high temperatures, and frequent exposure to water and grease.

Find your style: colours that combine with everything.

For choosing the textures and colours that could fit better with your kitchen, it is key that you know the designs available. Maximise it with the unlimited variety of materials, formats and colours that Cosentino offers you.

Silestone Integrity Sinks

Gama completa de productos

Without joints, cracks, or limits. Integrity wants to unite your kitchen with surfaces don't have an ending or beginning. Integrity brings a sense of unity and perfect integration with the rest of the elements on your countertop. A single piece available in a range of Silestone colors, so your kitchen is endless.

Disponibles en una amplia gama de colores

Reinventing the kitchen to make it the heart of the home

Connecting the kitchen and living room

Gone are the days when the kitchen was a forgotten room in the darkest part of the house. The kitchen is now a key space that can integrate with the living-dining room and share the same design.

In this so-called “reconversion” process, the island plays a major role, as it serves as a connecting element between the two environments as well as a meeting place in the home. In this project, the interior designer built the entire design around the island.

Island in a classic material

Although this kitchen has a distinctly modern look, the designer has opted for a classic material for the countertop: Silestone® Calacatta Gold in a polished finish. The use of a 5 centimeter strip and the diagonal cut on the front side bring modernity and style to a material reminiscent of ancient marble.

→ Kitchen countertop by Silestone®, Calacatta Gold color, Polished finish

02/ Kitchen Space

Islands that
turn into
dining tables

Kitchen table and wall cladding in the same material

In this project, the brown tones of dark wood and the black cladding in Dekton® Domoos used on tables and walls, coexist in perfect harmony.

The island, with a built-in sink, is more than just an island. It turns into a genuine dining table of substantial proportions. The bioethanol fireplace serves as a divider between the kitchen and the living area.

The result is an elegant, well-balanced and warm space. The use of large-format cladding, 320 x 144 cm, creates the illusion of an uninterrupted, jointless surface that gives depth to the room, whilst ensuring easy maintenance and cleaning.

The touch of darkness is provided by Dekton® Domoos, a beautiful material from the Solid Collection in a matte finish, perfect for lovers of sobriety. On the other hand, chocolate brown is used on the leather high chairs and the fireplace mantel.

Kitchen
Space

Kitchen in Calacatta
Gold and wood.
Classic Scandy

**Wall, countertop and island
in the same material**

The success of this project lies mainly in the use of a beautiful and timeless material reminiscent of ancient marble: Silestone® Calacatta Gold. This white surface with grey veins is used for the front cladding –featuring built-in extractor fan and alcoves–, countertop and island, thus achieving a beautiful combination of classic and modern.

In contrast to the coolness of the white and the effect of the marble, the cabinets, floor and seating around the island are all in honey-colored wood. Finally, the designer wanted to give the kitchen a deco touch. To this end, they used black on both sides of the kitchen: on the left, the door casing is clad in Silestone® Et Marquina; on the right, the large window features an industrial-looking profile.

Monolithic islands

The beauty of this project lies in the perfect symmetry between the cooking area, with its built-in extractor fan, and the large, monolithic island. All of this, clad in the same classic, timeless, beautiful material: [Silestone® Calacatta Gold](#).

→ Kitchen countertop by Silestone®, Calacatta Gold color, Polished finish

04/ Kitchen Space

A stunning
work surface
for keen cooks

**A kitchen full
of character**

In this urban style home with concrete ceilings, the aim was to create a warm, welcoming kitchen where the pleasure of cooking can be enjoyed with friends. Gardening and cooking are the two passions of the owner of this home.

With this in mind, the interior designer planned a cozy kitchen in wood, with a very pleasant living area and a stunning island with a cooking area perfect for cooking for guests. As for the owner's second great passion, gardening, is reflected in the plants hanging from the ceiling - as if it were an urban garden - and in the many others scattered throughout the rest of the kitchen. Wood and plants meet for a very personal kitchen

A stunning island in white

Silestone® White Zeus was the color chosen to clad this extra-large island with integrated hob and sink.

In this kitchen, all the attention is focused on the island thanks to its impressive, glossy finish.

→ Countertop by Silestone®, White Zeus color

05/ Kitchen Space

Reinventing the kitchen to make it the heart of the home

Cubic lines and a play of planes

For this kitchen design, the owner wanted a tidy and functional space that would blend harmoniously with the classic style of their living room furniture. Based on that request, the designer planned a large white island with an integrated sink and cooking area.

A robust, horizontal surface in Dekton® Sirius outlines the bar and then continues along the wall, helping to enlarge the space. The steel cooker hood in a double-cube design above the hob finishes off the room. The result is a kitchen carefully designed, in which nothing has been left to chance.

→ Island by Dekton®,
X-Gloss collection, Bergen color

The island as
a sculpture

To bring some movement and character to this kitchen, the designer chose Dekton® Bergen in polished finish for the island. This material, from the Stonika XGloss Collection, is inspired by Portobello stone.

A stunning
black bar

In this kitchen, Dekton® Sirius bar extends across the island and then continues along the wall. This black textured color, without veins, contrasts beautifully with the traditional colour of Dekton® X-Gloss Bergen.

Furthermore, Dekton® Sirius blends in perfectly with other appliances such as taps, ceiling lamps and stools, also in black.

→ Island by Dekton®, Sirius color

Furniture

Surfaces integrated with
unique and timeless
furniture design

Dekton, the furniture’s skin

It’s on-trend to use the same cladding on the kitchen or bathroom countertop to clad drawers and wardrobes. This allows you to achieve continuous and clean surfaces where joints disappear, creating a monolithic effect.

This decor trend is only possible with the technological evolution of materials. 8 mm and 12 mm thicknesses are ideal for tables and coffee tables. The slim 4 mm thickness format allows kitchen and bathroom furniture cladding, and also answer the creative restlessness of the designer: table tops for the interior and exterior completely personalized and exclusive.

Furniture

Unprecedented durability and design

Cosentino surfaces redefine furniture thanks to their versatility, durability, and beauty

Dekton® Slim, 4 mm thickness makes it an incredibly easy material to work with. Its light weight and properties make it the ideal solution to clad all types of furniture and adapt to any aesthetic proposal: in white and gold, in black and chrome...

Dekton Slim has all the advantages and properties of Dekton, high resistance to scratches and stains.

→ Revestimiento mobiliario cocina, Dekton® Slim Zenith

Ideal for cladding wardrobe doors and kitchens

Dekton® Slim Zenith and Dekton® Slim Opera were the two tones chosen to hide these drawers under the stairs or on the front of the kitchen. The result is a camouflaged surface of this practical storage solution, without compromising the aesthetic of the space.

→ Kitchen furniture cladding by Dekton Slim Opera

→ Kitchen furniture cladding by Dekton Slim Kreta

Cabinets integrated into the island

Dekton® Slim is the perfect solution to clad drawers in the kitchen island, achieving a monolithic effect.

For this industrial project, the designer chose Dekton Trilium: a finish inspired by volcanic rock with a touch of oxidation, which adds great character to the space.

Once again, Slim's 4 mm thickness allows the creation of an island totally integrated with drawers.

→ Kitchen furniture cladding by Dekton Slim Trilium

→ Table top, Dekton Laos

→ Table top, Dekton Laos

→ Table top, Sensa by Cosentino Orinoco

Unique and marked veins in small surfaces

With Sensa by Cosentino the designer can run with his most creative ideas and choose natural materials with pronounced veining, such as the color Orinoco.

Sensa by Cosentino is protected natural stone. The designer can choose the part of the stone they want for their design. This has a particular quality: there will never be a table like this one.

→ Table, Dekton Aura

Large cubic blocks

Dekton allows you to clad large furniture pieces as if they were blocks of stone straight out of the quarry. In this space, the designer used Dekton Aura 15, in its large format version, to create a strong center table of extraordinary dimensions.

Perfect match with dining room tables

If there is one place where Dekton's properties can be enjoyed, it is in dining room tables, and if they're XXL, even more.

The designer chooses the structure of the table and the chairs that will accompany the Dekton color that will be on the structure amidst infinite finishes, depending on the style

You can opt for a continuous 3 meter surface with a thickness of 4, 8, or 12 mm and even select the slab and cut so that the veining, texture, and finish are perfect.

→ Table top, dehton kelya

→ Table top, dehton kelya

Indoor & Outdoor

Another advantage of Dekton table cladding is that it works for both interior and exterior. Its high resistance to UV rays and changes in temperature make it the perfect material for outdoor furniture, avoiding degradation over time.

→ Table top, Dekton Aura 15

**Continuous veining
composition**

La luminosidad y la neutralidad de tono de Dekton Aura se vierten sobre un lienzo personalizado, caracterizado por una fluida continuidad de veta entre las distintas piezas que componen la mesa.

**Total adaptability for
modular systems**

The lightness of Dekton in its 4, 8, and 12 mm formats allows it to adapt to modular systems or table extensions and create compositions of high esthetic and functional value.

→ Table top, Dekton Trilium

→ Table top, Silestone Eternal Statuario

**Ideal for
work spaces**

The properties of Dekton and Silestone make these materials the perfect choice for work spaces. With their endless possibilities in terms of finishes and designs, they add a deco touch to these spaces and create attractive and functional tables suitable to work from home.
