Cosentino presents a new Dekton color selection for 2020.

The Collection combines four chromatic series, each with their own distinct personality: the natural sensitivity of Chromica, Liquid’s elegance and fluidity (reserved for our most distinguished clients), the daring and provocative colors of Avant-Garde, together with the versatile and diverse tones of Portfolio.

The result is an exclusive palette of colors that combines the latest trends with a range of materials perfect for everyday projects.
Liquid was born out of the collaboration between the Cosentino design team and PATTERNITY. PATTERNITY, a London-based design studio specializing in the creation of motifs and patterns, draws out Dekton®’s potential as an innovative material to the forefront.
Liquid Design

Each tone within this color palette was inspired by elements in their liquid state. Loyal to PATTERNITY and its philosophy, the concept of this collection takes its inspiration from the beauty found in nature, protecting the environment and promoting sustainable design.
Liquid Embers represents the meeting point of fire and liquid in the depths of the Earth. Embers invokes the destructive power of magma. The fusion of matte and shine effects accentuates the blue tones throughout its dark design. This color embodies the alchemy of the elements and gives way to a universal connection. With renewed strength, it channels the concepts of intuition, power and creativity.

A marbled storm of ethereal lightness that celebrates the scientific principles of fluid dynamics. Liquid Sky’s unique features bloom with gray veining on a white background. Its design explores the inertia of gravity and the interaction of elements. What’s more, it pays homage to circular energy and perpetual movement.

Liquid Sky
A celebration of the sobriety and tenderness that life evokes beneath the sea waves. The ocean reflects the natural rhythm of life — the gentle cycle of waves that lap the rocky shore and create new textures on the surface with each movement.
Chromica emerged from the collaboration with the architect and designer, Daniel Germani. This new series was created with the aim of expanding the Dekton color spectrum, incorporating two new must-have shades in sophisticated, chameleon-like matte.
Chromica Design

From north to south, east to west, we’ve captured the most versatile and elegant tones – colors that are able to dress any architectural space, from innovative, ground-breaking projects to classic, minimalist designs.
The profoundness of the green captured by Feroe is perfect for creating spaces that exude life and tranquility, excellent for decorative spaces with an emphasis on nature.

The dark, serene blue of Baltic works perfectly in large public spaces, where it can lend its innate calmness to transitional and fast-paced spaces.
Dekton’s most daring textures

Daring means setting trends, innovating means having an impact and breaking with the norms. Avant-Garde fuses the latest offerings from Dekton’s state-of-the-art collections. Designs with a rich color palette for spaces with a striking personality.

This series has been created for architects and designers who dare with their creations.
**Dekton Helena**

Helena has great richness, perfect balance of gray and white tones, and delicate cracks shine with the depth of onyx— the natural stone that inspired this piece. Its design is greatly appreciated by designers and architects alike thanks to its beauty and luster.

---

**Dekton Khali**

Khali takes inspiration from Patagonia Granite, one of the world’s most sought-after stones due to its unique formation and tones, which could only have been created by Mother Nature herself.

Thanks to our Xgloss technology, the color’s polished finish has a spectacular shine and depth that emphasizes the complex and colorful structure of the stone.

The speckled subtly in intense black, pale gold and coffee brown and the delicate balance of the two prominent formations form an authentic, vanguard color. It’s a unique color in the market that is able to bring impressive design to the most contemporary spaces.
Inspired by the natural Port Laurent stone, we've crafted a unique color that stands out with its complex beauty. Its texture plays with contrasting shades and tones. The gold grain dominates the surface and lends warmth to the cold, dark background, ideal for the most luxurious spaces.
Colors that adapt to our everyday needs

Portfolio brings together five traditional colors that adapt to any type of project. Boasting monochrome sobriety with subtle veining and details that combine versatility with undeniable style.
Dekton Rem

Rem takes inspiration from one of the most elegant white marbles on the market. Thanks to its detailed gray and gold veins, it is able to enhance the sober, almost linear structure of the Calacatta Lincoln itself.

One of the greatest technological innovations of this year is the synchronicity achieved between veining and relief. In Rem, we can appreciate fine veining with subtle relief and natural sensitivity of the highest degree.
Rusted and eroded materials begin to show a personality of their own that is only possible with the passing of time. This essence is captured by the spirit of Milar, a color that plays with industrial grey and earthy tones, making it a versatile and on-trend option.

The tone and texture inherent to slate transform Bromo into a valuable color for designers, making it an interesting ally perfect for a variety of spaces. Its eroded surface and varying tones results in a effortless piece that can be used in almost any project.
