## 06 CASE STUDY

# Cosentino Hotels

The entire Cosentino® network is committed to helping you achieve the satisfaction of your customers.

From the quality of our materials and workmanship, to home readiness and customer service, our priority is to provide solutions that add value to your installations and your customers.

All our products meet the stringent requirements of accreditation bodies and our own standards to provide sustainable, ethical and high quality products and services.

## 1. Initial advice

- Samples available (24-hour delivery) for mood boards and inspirational ateliers in the Cosentino City showrooms.
- Commercial advice and detailed study of each element of a project.
- Tailor-made solutions for different applications, adapted to the specific design and functional requirements of a project.

## 2. Personalisation and comprehensive service

- Centralised corporate relationship, single point of contact.
- Dedicated regional and local sales managers.
- Exclusive purchasing conditions.
- Development of exclusive custom colours and finishes.
- Worldwide availability and delivery guaranteed.
- 360° comprehensive service: commercial, project management and after-sales service.

## 3. Technical proposal and quotation

- Advice on regulations, certificates and eco-labels.
- Preparation of technical proposals with the support of our in-house technical office (architects and engineers).
- Rapid preparation of personalised quotes (<48h).

## 4. Project visualisation

- Real samples in various formats.
- Participation in Mock Up Rooms.

## 5. Production and quality control

- Communication between customer and factory via assigned project manager.
- Communication and coordination with third parties (shopfitters, buffet specialists, façade designers, etc.).
- 100% in-house production and manufacturing.
- Strict internal quality control.

## 6. Logistics

- Own international logistics network.
- Presence on 5 continents.
- Guaranteed deadlines.

## 7. Execution and support

- Setting delivery schedules. Assured supply.
- Advice and training provided by our own staff.
- Obtaining certificates.
- Supply of manuals and technical documentation.

## 8. Warranties and after-sales service

- 25-year warranty for Dekton and Silestone products and 10-year warranty for manufactured products.
- Warranty and claims management by Cosentino.
- Local service through the international network of the Cosentino Quality Department.

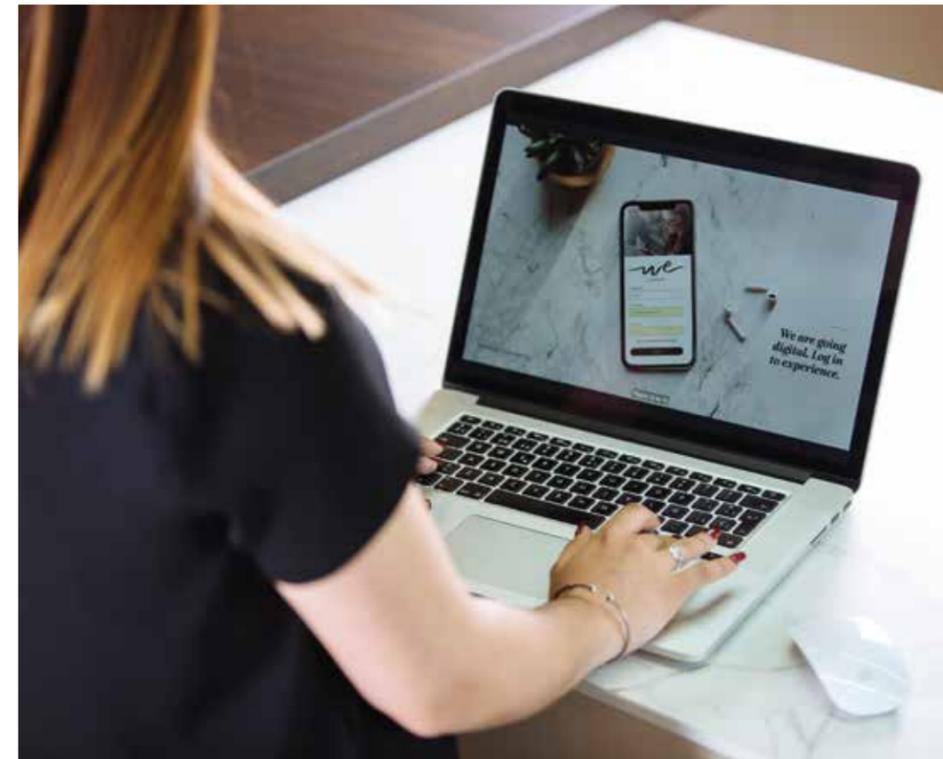

## Cosentino City

Our Cosentino City concept provides the architect with a relevant meeting point where they can get to know our brands in a unique experiential environment.

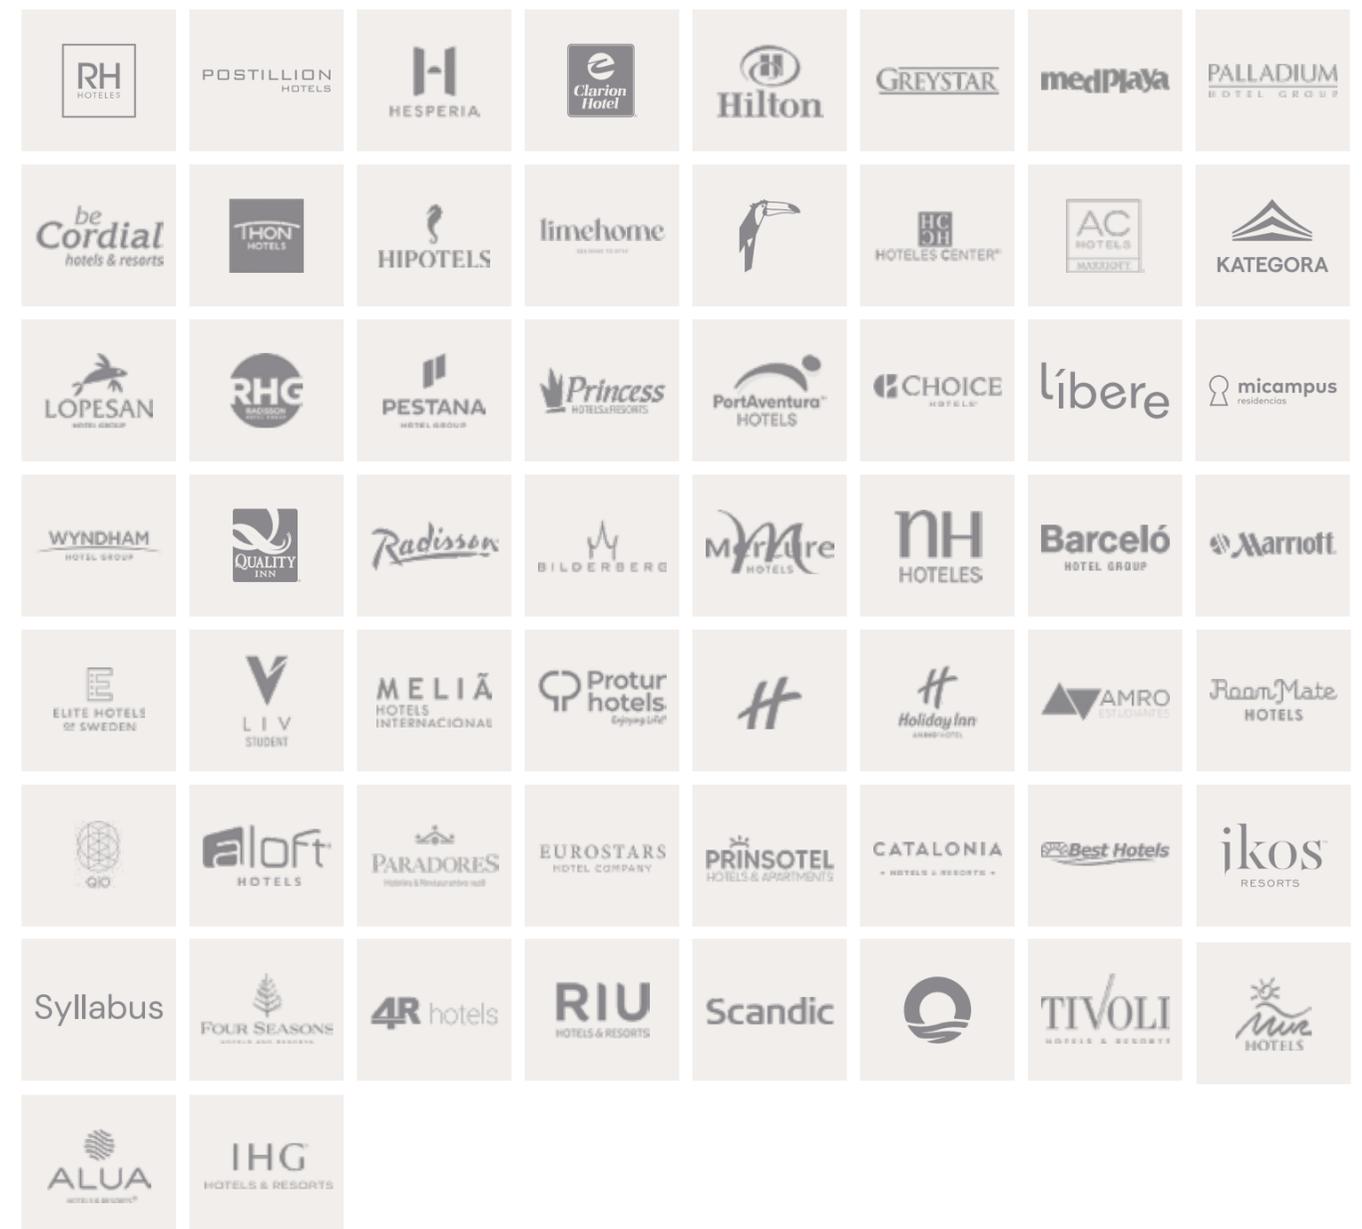

## A global company.

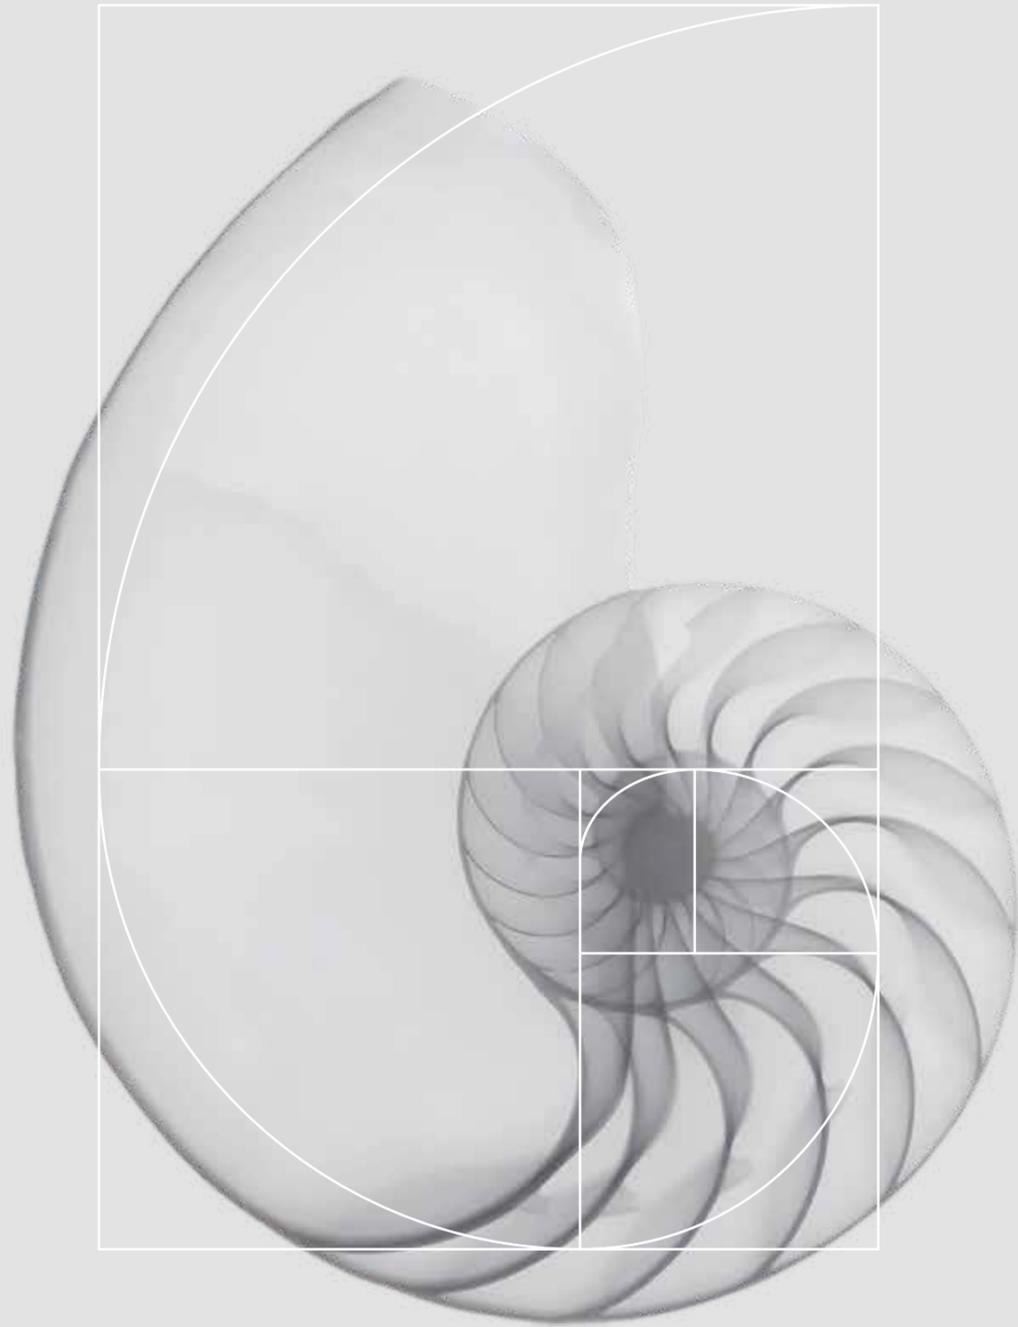

Cosentino® is a leading global company, and as such we have distribution centres all over the world and carry out projects of any size and scope, consolidating our experience in international projects with prestigious hotel chains such as Hilton, Meliá, Radisson, Alua, Crowne, Catalonia, Best, NH, Palladium or Marriott.

## Cosentino digital universe

The Cosentino® Digital Platform is an ever-growing hub of services designed to facilitate the work of professionals and provide them with traceability of their transactions, inspiration for relevant projects, technical application data to support project specification, construction solutions, etc.

Corporate purpose

## Meaningful Design to Inspire People's Lives

Nature provides us with beauty and inspiration. The golden ratio is found in leaves, shells, people and everything we design and create. We turn to nature to create a healthy life for the present and the future. A life with soul.

Designs with soul to inspire  
people's lives.

We are Cosentino

### silestone®

The ultimate mineral Hybriq surface

Silestone® is a hybrid surface made of minerals and recycled materials designed to bring colour and texture to interior spaces.

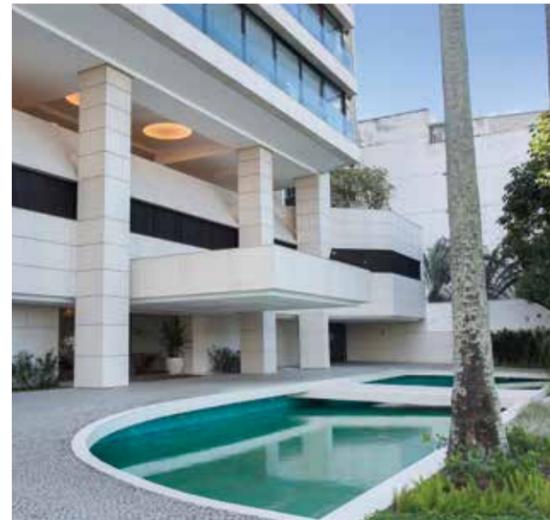

Our mission is to provide comprehensive architectural and design solutions.

The versatility of our surfaces offers professionals a wide range of applications in any indoor or outdoor environment.

### DEKTON®

The ultra-compact stone

Dekton® has all the technical features demanded of a highly resistant surface suitable for all types of interior and exterior design projects.

## Sustainability

Sustainability is a cross-cutting theme for the company, which has an impact on its business model and value proposition.

At Cosentino® we approach sustainability as a collective commitment that stems from the individual involvement of those that are part of Cosentino.

Our continuous improvement efforts involve a constant analysis of our entire value chain – from the procurement of raw materials to the delivery of end products to the customer.

### Waste reuse system

Our waste reuse system allows us to recover 45% of the waste we generate. We promote cradle-to-grave circularity through projects such as Circularity and Reborn.

### More sustainable products with the best possible impact

We are committed to creating more sustainable products that minimise waste and carbon emissions. Dekton® and Silestone® are the best evidence that we are achieving this and delivering it to our customers. Both brands are EPD certified and, in addition, Dekton is a carbon neutral and zero waste product throughout its entire life cycle.

### We reduce our carbon footprint

We calculate and monitor our organisational carbon footprint. In 2022, we achieved a reduction of -12.8% compared to 2018.

### We reuse water

Our Wastewater Reclamation Plant (ERAR), which allows us to recover 600,000 m3 of water per year, enables us to meet the challenge of water circularity.

### We optimise our logistic routes

We promote the optimisation of logistic routes, increasing the number of sea routes.

### Self-consumption photovoltaic plant

We have invested €15 million in our photovoltaic plant, the largest ground-mounted self-consumption photovoltaic plant in Spain and a benchmark in Europe.

# Dekton

by Cosentino

## Innovation in design

Dekton® is a sophisticated blend of more than 20 minerals extracted from nature. Its production process is the result of years of learning and inspiration in the manufacture of glass, cutting-edge porcelain tiles and quartz surfaces.

Thanks to electron microscopy we can see the very low porosity of the material, the result of Dekton's exclusive sintering and ultra-compaction process. In fact, its very low porosity and the fact that it is free from micro-defects that cause stresses or weak points are the most distinctive features of Dekton.

### Sinterized Particle Technology

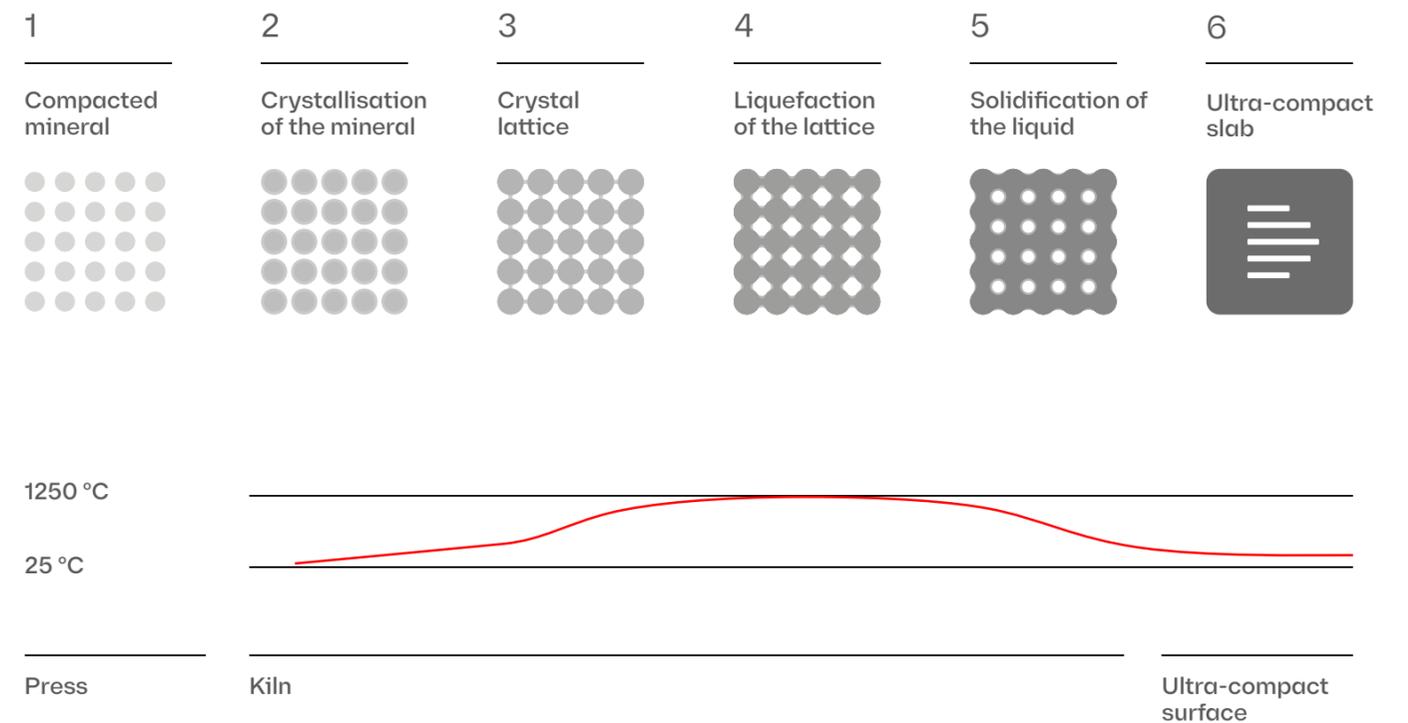

Dekton® uses in its manufacturing the exclusive TSP technology, capable of sintering mineral particles, causing them to bond, change and compact their internal structure. A unique and innovative technological process that represents an accelerated version of the metamorphic change that natural stone undergoes when subjected to high temperatures and pressure over thousands of years.

In the span of a few hours, Dekton® emulates what nature takes thousands of years to create, thanks to the exclusive TSP technology.

- The kiln is 180 metres long.
- Temperature reaches approximately 1250°C.
- The total process time depends on the thickness of the slab (about 4 hours).

### Façade and cladding safety

To enhance safety in ventilated façades and interior claddings, it is possible to place a safety mesh on the back of the Dekton® slab. This is a 300 gr/m<sup>2</sup> fibreglass mesh specially developed to prevent falls due to breakage and bonded to the slab with epoxy resin. Safety is one of Cosentino's main concerns.

# Dekton Slim

High aesthetic value and performance in vertical cladding and furnishings.

## Minimum thickness of 4 mm → Large format and performance

Dekton® Slim is the new, large format surface with an ultra-thin 4 mm thickness that offers unlimited design options and incredible ease of installation and transport. Ideal for bathroom and kitchen floors and walls, as well as all types of furniture.

### 01 → Large format and minimum number of joints

Its large format measuring 3,200 mm x 1,440 mm covers large surfaces, avoiding a large number of joints and in turn, dirt.

### 02 → Easy installation

Thanks to its light format with an array of possibilities, everything just got a lot simpler. Its reduced thickness means it can be cut quickly and adjustments can be made on-site with tools for ceramic tiles.

### 03 → Limitless design

Dekton® Slim is easy to assemble and can be cut to measure. It can be adapted to all spaces.

### 04 → Highly resistant to moisture

Ideal for bathrooms, Dekton® Slim offers cladding that is ultra-resistant to humidity and stains. A high-performance product that does not require any maintenance other than a damp cloth.

**DEKTON® SLIM**  
Designed by COSENTINO

Cosentino® offers Customer Service. Ask all the questions and get all the advice you need to obtain exactly what you want from the new Dekton® Slim.

Find your nearest Cosentino® Centre at [www.cosentino.com](http://www.cosentino.com)

### 01 → Bathroom Cladding

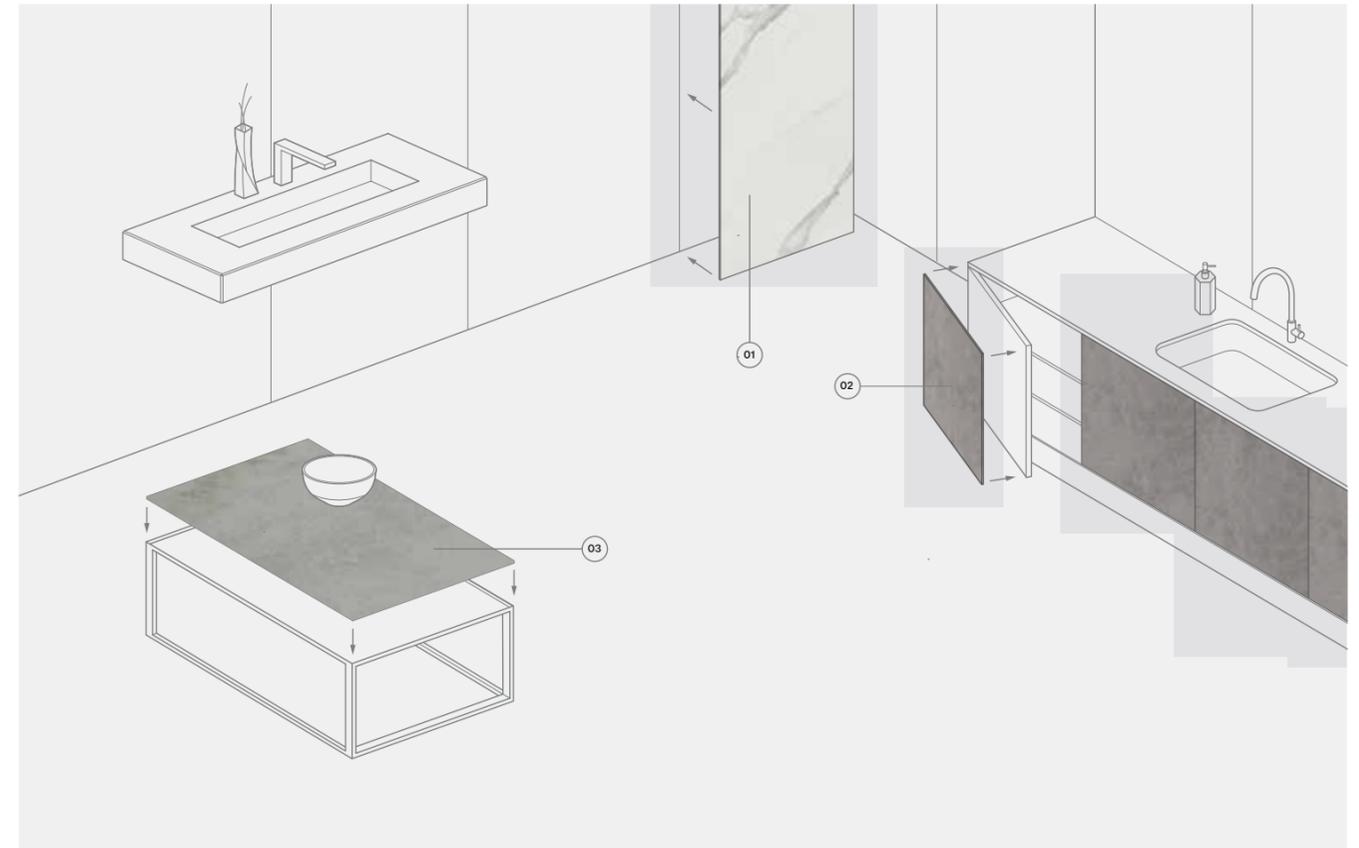

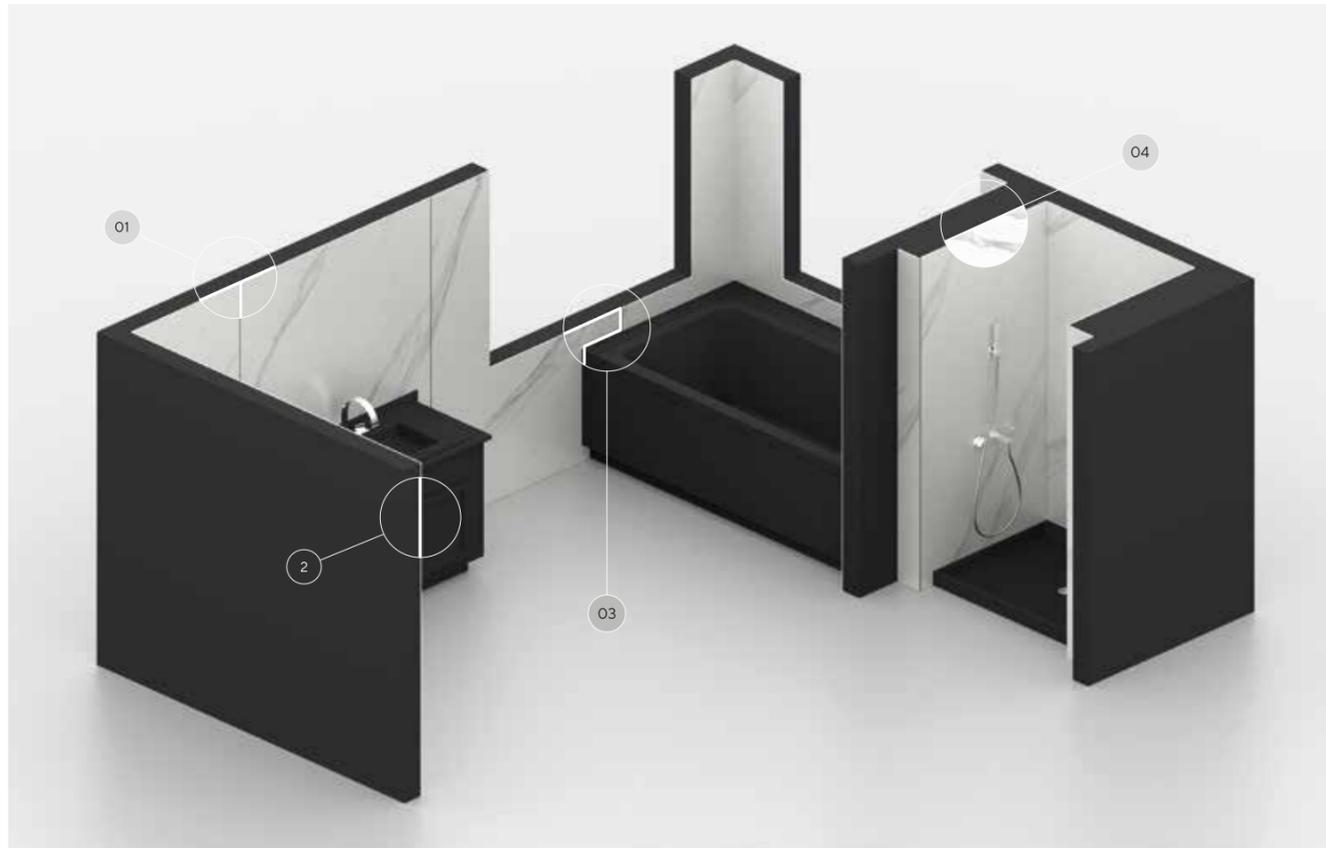

Maximum resistance against humidity with minimal joints.

### 02 → Kitchen Cladding

Lighter in thickness, endless in possibilities

### 03 → Furniture Cladding

# Silestone®

by Cosentino®

The ultimate mineral Hybriq surface

Silestone® is a hybrid surface made of minerals and recycled materials designed to bring colour and texture to interior spaces.

## Silestone® Advantages

Silestone® is extremely durable in kitchens, bathrooms and other spaces exposed to constant activity and use. In addition, it offers an unlimited range of colours and textures.

Silestone® has many advantages, including low maintenance, high resistance to stains and scratches, and a low fluid absorption rate. This resistance to fluids and its minimal joints make Silestone® the ideal solution for places where liquids are present. Silestone® is hard-wearing and allows prolonged use over time to last a lifetime.

The properties of Silestone® are the result of constant years of innovation that guarantee maximum hygiene and safety.

### Moisture resistance.

Silestone® is a non-porous surface that is highly resistant to water absorption, moisture, stains, make-up and other everyday products, ensuring both hygiene and ease of cleaning.

### Durability and low maintenance.

Silestone® is highly resistant to the scratches, shocks and knocks that occur in daily bathroom use, so it requires minimal maintenance.

### Minimal joints. Total integration.

Thanks to its different formats, Silestone® creates total continuity in the bathroom with infinite and personalised surfaces. Integrity® washbasins also allow you to create an integrated space with no visible joints.

# Sensa

by Cosentino®

## Protected natural stone surface

Sensa by Cosentino® is a premium, maintenance-free natural stone brought to you by Cosentino®, a world leader in the natural stone industry.

Sensa by Cosentino® is treated with a revolutionary stain-resistant treatment called SenGuard, and comes with a 15-year warranty against stains.

SENSA  
15 YEARS  
WARRANTY

SENSA  
by COSENTINO®

## Sensa by Cosentino® Treatment

Cosentino® applies an invisible, long-lasting treatment to quartzite and granite, which is chemically integrated into the material allowing it to breathe. This technology increases its powerful natural properties and prolongs its life.

The process changes the surface tension of the stone, enabling the material itself to prevent liquids such as water, coffee or oil from penetrating it.

SENSA  
by COSENTINO®

Normal

## Applications

### Sensa kitchen worktops. Stain-proof natural beauty

Enjoy the design, durability and resistance of natural stone without worrying about stains. Sensa by Cosentino® quartzites and granites are treated with a revolutionary stain-resistant treatment that will protect your countertop and keep it looking as good as new.

## Textures

### Uniques shapes for one-of-a-kind surfaces

The colours and textures of Sensa by Cosentino® features the patient and whimsical design of nature. Each of the seven shades available has a texture that produces different effects and sensations: suede, polished or caresse.

# Outdoors

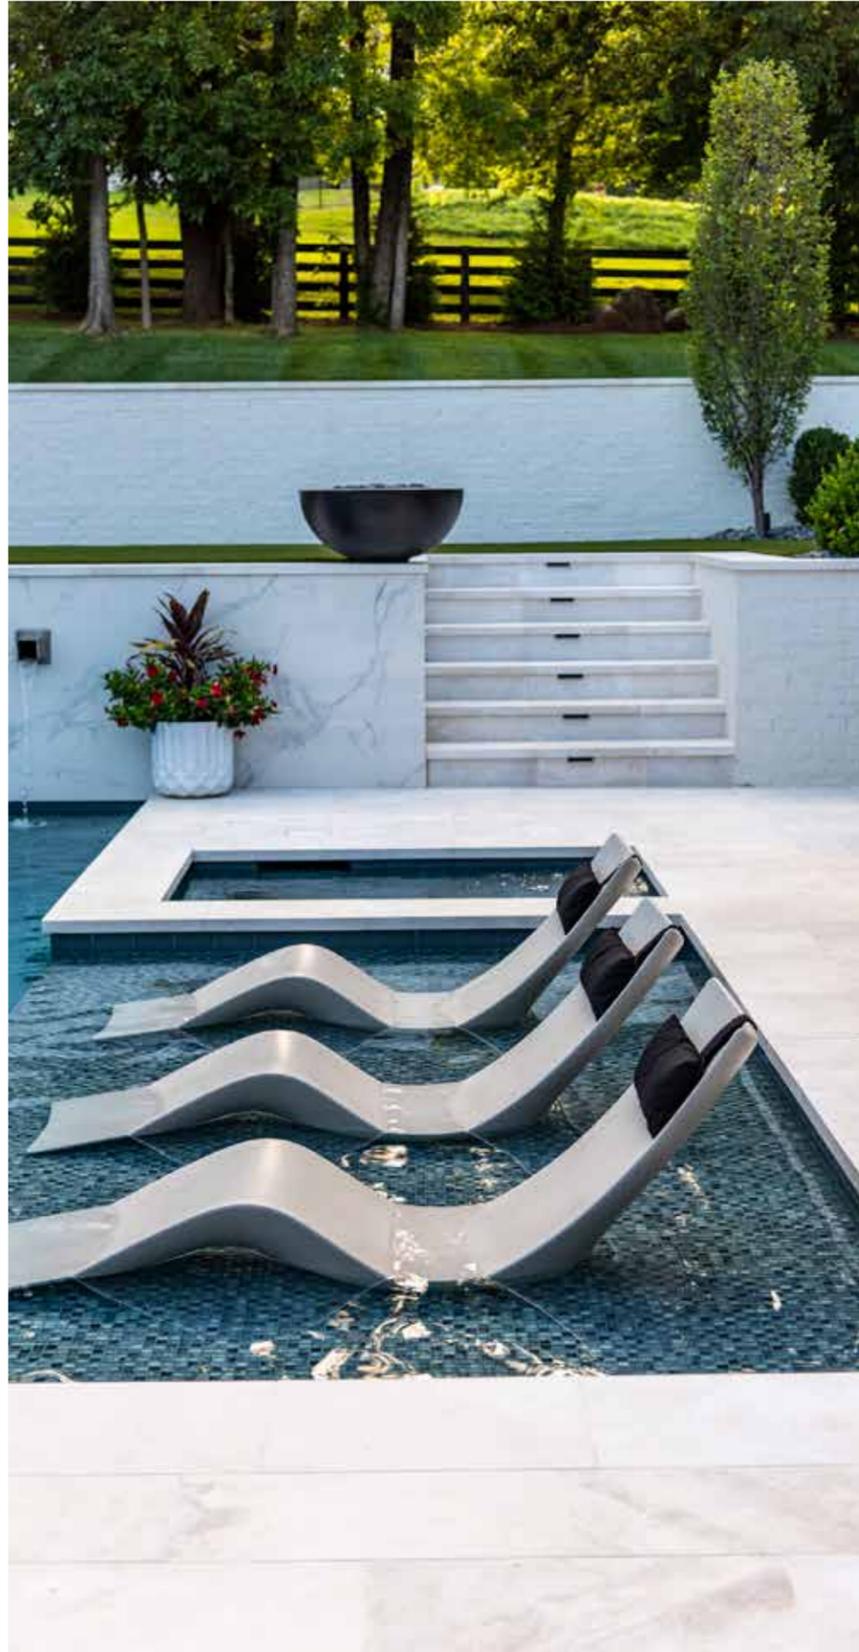

Continuous and durable outdoor spaces. Revolutionise your outdoor spaces so that the façade, porch and garden reflect your hotel's unique style.

# Outdoors

01/  
Outdoors

→ Swimming pool cladding  
Dekton® Natura

**Summerville**  
South Carolina, USA

—  
*Architecture/Design*  
Rondo Pools

**Idyllic and perfect for summer time, this backyard oasis is the definition of luxury and relaxation.**

Its owner, from the swimming pool company Rondo Pools, wanted to achieve the best possible design for his home and chose Dekton Natura to create a stunning front that looks like marble but is maintenance free and perfectly resistant to water, temperature changes and UV rays.

### Spanish Court Hotel 5 ★ Kingston, Jamaica

—  
Architecture/Design  
Antrobus + Ramirez Interior Design

Renovated in 2019, this Caribbean hotel is in perfect dialogue with the beauty of its surroundings. Almost 9,000 m<sup>2</sup> of Dekton surfaces were used in its design. Among the various applications in which Dekton was used, the outdoor flooring around the swimming pool stands out for its Dekton Edora cladding, which gives the space a natural and welcoming character.

→ Exterior  
Dekton Edora

### Hipotels Playa de Palma 5 ★ Mallorca, Spain

—  
Architecture/Design  
Morro & Serra

The ventilated façade of this 5-star beach side hotel features Dekton Edora, a warm colour that is ideal for an avant-garde style and perfectly resists the erosion of sand and salt from the beach.

→ Façade  
Dekton® Edora

## The Carlton Gardens Melbourne, Australia

—  
Architecture/Design  
Darin Bradbury, MINT Design

Carlton Gardens is a beautiful green area in Melbourne (Australia) listed as a UNESCO World Heritage Site. This is the venue for the Melbourne International Garden & Flower Show, an annual event which in 2023 featured the Aurum space, designed by MINT Design. In the words of its designers, "a sophisticated, glamorous and sexy garden for drinking champagne." To achieve this effect, Dekton Bergen was chosen as the surface for the table tops where the champagne would be served, providing both design and weather resistance.

→ Table top  
Dekton® Bergen

**Rafa Nadal Academy  
by Movistar**  
Mallorca, Spain

—  
[Architecture/Design](#)  
David Iglesias

The Rafa Nadal Academy by Movistar opened its doors in 2016 with the aim of becoming an international reference centre for the world of tennis. The architectural project has a surface area of more than 24,000 m<sup>2</sup> and impressive facilities with more than 40,000 m<sup>2</sup> of Dekton surfaces that bring innovation to the complex. Outside, the façades of the two buildings and several swimming pools also feature Dekton surfaces, creating an innovative concept.

→ Swimming pool  
Dekton® Keon

→ Façade  
Dekton® customised blue

→ Façade  
Dekton® Strato

## LD Sevilla Hotel Seville, Spain

—  
Architecture/Design  
VAU Architecture

### Ventilated façade that resists erosion and salt.

Located in the north of the Andalusian capital, this hotel designed by VAU Architecture features 3,100 m<sup>2</sup> of Dekton surfaces. The material has been used in a variety of applications, such as the façade, where the Dekton Keon slabs create a truly bespoke skin for the hotel, and the outdoor bar top, where Dekton Sirius creates a contrast thanks to its deep and elegant black shade, reinforcing the identity of the design.

→ Façade  
Dekton® Keon

→ Bar top front  
Dekton® Sirius

**ART Las Palmas 4**  
★ holiday homes  
Las Palmas, Spain

—  
Architecture/Design  
Pablo Romero Mur/Vicente Boissier  
Dominguez

The attractive façade of the Art Las Palmas building serves as a showcase for this hotel in Gran Canaria with 48 luxury flats and duplexes. Inspired by White Limestone, the warm white of Dekton Aeris and the blue of the balconies create an attractive and unique concept in perfect dialogue with the sea.

→ Façade  
Dekton® Aeris

# Communal Areas

Spaces to share and socialise with other travellers. Spaces to inspire feelings.

Communal areas

# 02/ Communal Areas

### Meliá Hotel 5 ★ Milan, Italy

—  
*Architecture/Design*  
Vittorio Grassi and Álvaro Sans, V&A  
Architects

Style and functionality come together in one of Milan's most historic hotels. Its versatile and spacious communal areas are a combination of natural materials such as marble and wood, green shades and Cosentino surfaces. Specifically, Silestone Eternal Marquina was used for the worktops and several tables in the buffet and bar area.

→ Worktops, furniture, tables  
Silestone® Eternal Marquina

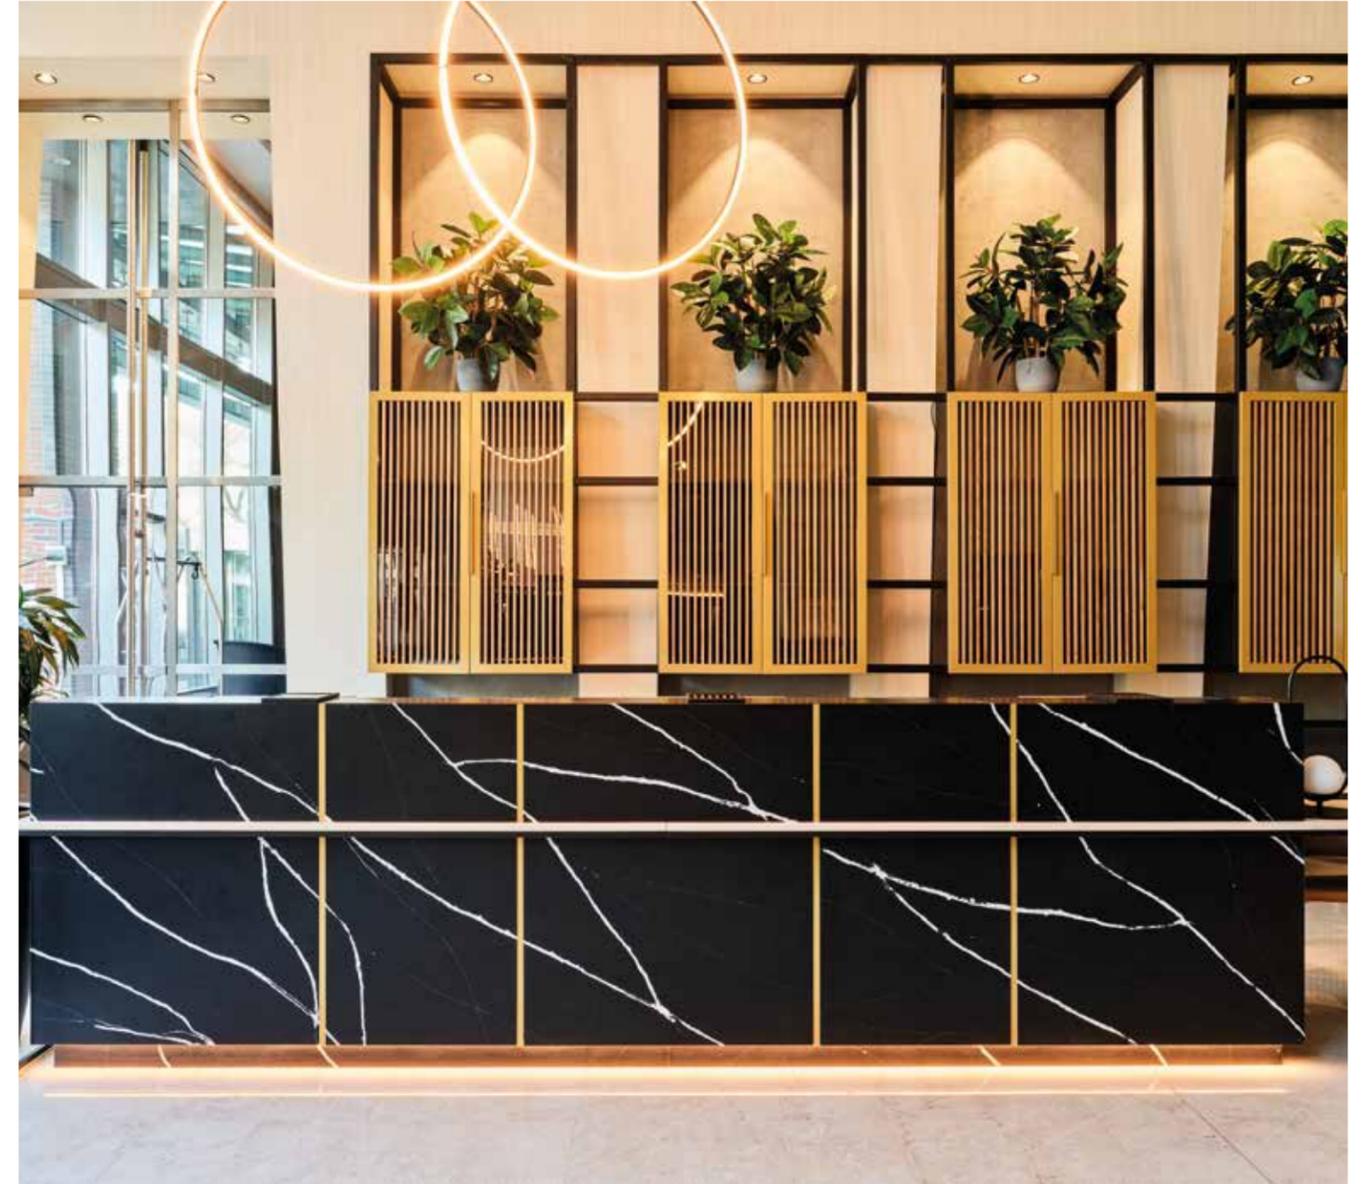

**Mediterráneo Bay  
Hotel & Resort 4 ★**  
Almería, Spain

—  
[Architecture/Design](#)  
ProPlaya

Located in a quiet area on the beachfront of Roquetas de Mar, this hotel has a long history in Almería's tourist offering. The lobby features a welcoming and innovative design with Dekton Dance on the floor, providing warmth and visual continuity to this open and large space.

→ Flooring  
Dekton® Dance

**Crowne Plaza 4 ★**  
Budapest, Hungary

—  
[Architecture/Design](#)  
Tremend Architects

Inspired by the city itself, this hotel proposes a journey full of cultural references. The ground floor is reminiscent of the city's train station, which was designed by the Gustave Eiffel studio in the 19th century. Both the lobby and bar top feature a wide range of materials including wood, steel, glass and Silestone Eternal Marquina, whose powerful white veining elevates the overall character of the design.

→ Claddings  
Silestone® Eternal Marquina

**Radisson Red Madrid  
Atocha 4 ★**  
Madrid, Spain

—  
[Architecture/Design](#)  
Design team from Radisson Hotels

Elegant and bold, the Radisson Red Hotel offers an inspiring and welcoming colour experience. In the lobby, the elegant Silestone Calacatta Gold used for the side table tops creates a perfect dialogue with the hotel's signature bold red.

→ Side tables  
Silestone® Eternal Calacatta Gold

The Silestone Eternal Marquina tables and the bar tops in the lobby, bar and restaurant, clad in Silestone Calacatta Gold, create bright, timeless spaces.

# Restaurant

Reinventing the kitchen: a beautiful and functional space.

Restaurant

# 03/ Restaurant

## Hilton Resort & Spa 5 ★ Świnoujście, Poland

—  
[Architecture/Design](#)  
Zdrojowa Invest

With spectacular views of the Baltic Sea, Poland's first Hilton Resort has 173 luxury rooms and suites and offers a wide range of services, including several restaurants and bars where Silestone surfaces have been used for their high quality and suitability for high traffic areas.

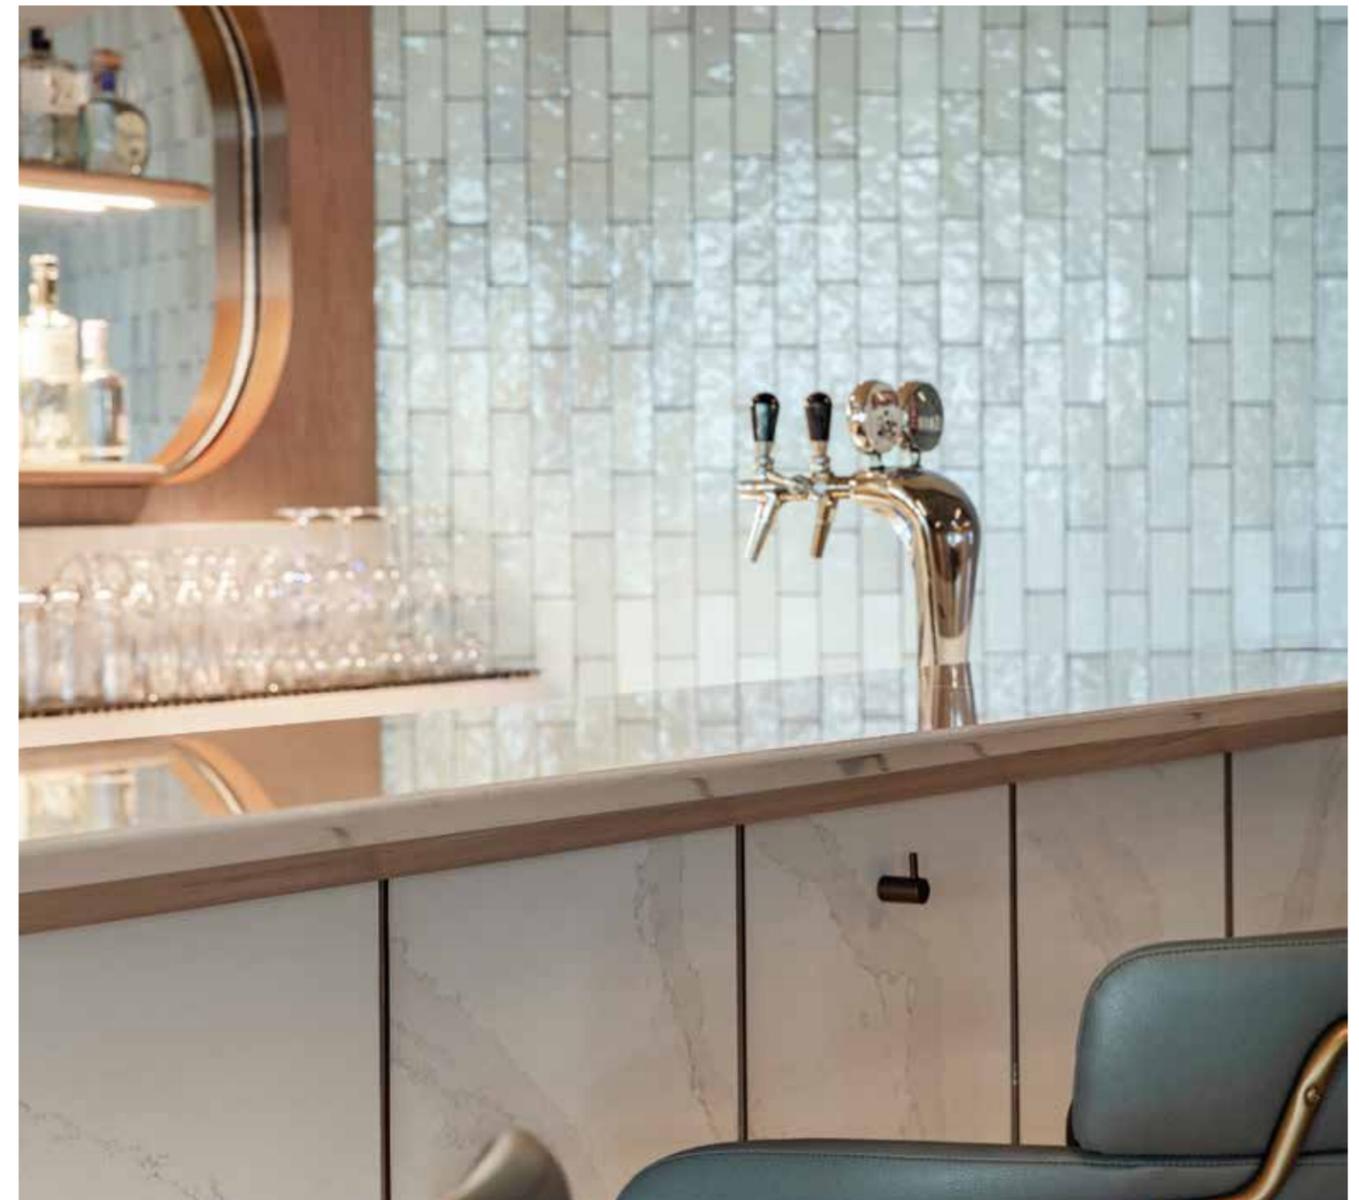

Both the bar top and buffet area feature Silestone Calacatta Gold, a colour with a white background crossed by subtle greyish veins that gives the space a touch of elegance for a sophisticated atmosphere. Bright and timeless, it creates a perfect dialogue with the contemporary style of these areas of the hotel.

→ Bar tops, furniture and cladding  
Silestone® Eternal Calacatta Gold

**Mediterráneo Bay  
Hotel & Resort 4 ★  
Almería, Spain**

—  
[Architecture/Design](#)  
ProPlaya

The colour chosen for the bar top of this Mediterranean-style hotel was Silestone White Zeus Suede, a bright and contemporary shade that perfectly matches the relaxed style of this hotel in Almería.

→ Bar tops  
Silestone® White Zeus

## Van der Valk Hotel 4 ★ Duiven, the Netherlands

—  
Architecture/Design  
Hans Kuijten

Creating a new layout for the bar, with a design based on warm colours and special materials to give it a unique touch, was the wish of the owner of the Van der Valk Hotel Duiven, located in the city of the same name, in The Netherlands.

The result is a space that combines the homely atmosphere of the hotel with an ideal business environment. By using different types of lighting and materials, among which Dekton Khalo – a colour inspired by Patagonia natural stone – stands out, it was possible to create a bar top in the centre of the space that is as beautiful as it is functional.

→ Bar top  
Dekton® Khalo

**The Ritz-Carlton  
Abama 5 ★  
Tenerife, Spain**

—  
*Architecture/Design*  
Gregory Declerk

“La Veranda” is The Ritz-Carlton Abama’s restaurant dedicated to breakfast and pop-up proposals, a place characterised by large buffet counters where the food is beautifully presented and live cooking is performed. A place where all the worktops are made of a single material: Dekton Olimpo, a colour inspired by Carrara marble. The result is a clean, relaxed and elegant atmosphere.

→ Buffet area, bar tops and cladding  
Dekton® Olimpo

## Hotel Hilton Garden 4 ★ Wiener Neustadt, Austria

Architecture/Design  
Jeff van Riel - Zout Ontwerphuis

With its warm design and open layout, the Hilton Garden Inn buffet area responds to a design concept that seeks to connect the interior of the establishment with its urban surroundings. In this sense, the neutral and silky shade of Silestone Kensho, used in combination with pastel-coloured furniture, is the perfect choice.

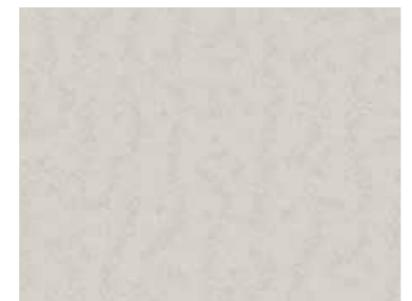

→ Worktop  
Silestone® Kensho

**Scandic CPH  
Strandpark 4 ★  
Kastrup, Denmark**

—  
Architecture / Design  
Koncept

The relaxed and open interior design of this hotel has been achieved by combining natural materials, such as Scandinavian wood, rope and rattan, with durable surfaces. On the buffet countertops, as well as on the tables, Silestone Eco Luna 14 shines, customized for the project.

→ Countertops, bars and table tops  
Silestone® Eco Luna 14

## Crowne Plaza 4 ★ Warsaw, Poland

Architecture/Design  
Tremend Architects

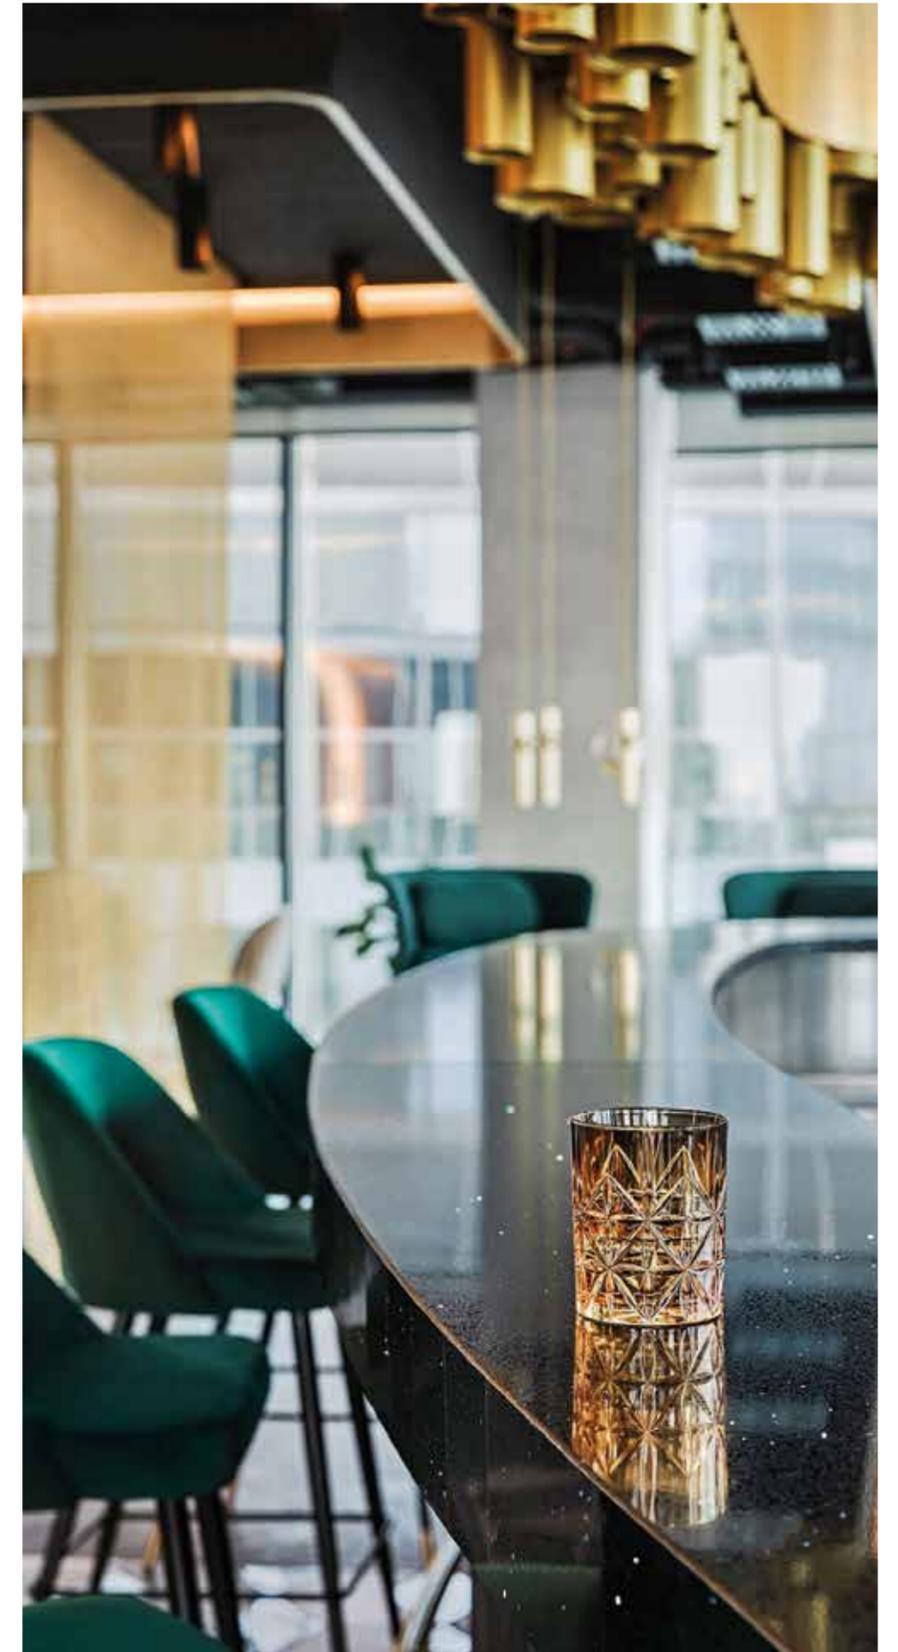

Eclectic, textured communal areas reflecting the bustling city life of Warsaw. And two Silestone colours, Classic Calacatta and Stellar Night, to dress the bar tops in the spectacular lobby and the luxurious Sky Bar on the top floor of the hotel.

→ Bar top  
Silestone® Stellar Night

→ Bar top  
Silestone® Classic Calacatta

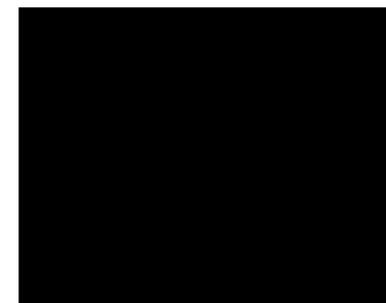

## Britannia Hotel 5 ★ Trondheim, Norway

Architecture/Design  
Heimdala Naturstein AS &  
Heimdahl Natursten

The Britannia Hotel in Trondheim, Norway, first opened its doors in 1870. The Britannia, a landmark and historic site, has undergone numerous refurbishments over the years. The most recent took place in 2019, when it underwent a complete renovation, including the Michelin-starred Speilsalen restaurant.

Seeking a balance between design and durability, the refurbishment team used Dekton in colours Opera and Domoos for those surfaces in constant use by chefs and customers, such as the restaurant countertop and bar, as well as tables and furniture in the buffet area.

→ Table tops and buffet area  
Dekton® Domoos

→ Worktops, bar top and cladding  
Dekton® Opera

### Crowne Plaza 4 ★ Barcelona, Spain

Architecture/Design  
Tremend Architects

The iconic Crowne Plaza Barcelona Hotel underwent a complete renovation in 2021 that included its gastronomic spaces, where Dekton was the material of choice for the bar tops and bespoke tables.

# 01/ Lopesan Costa Meloneras 5 ★

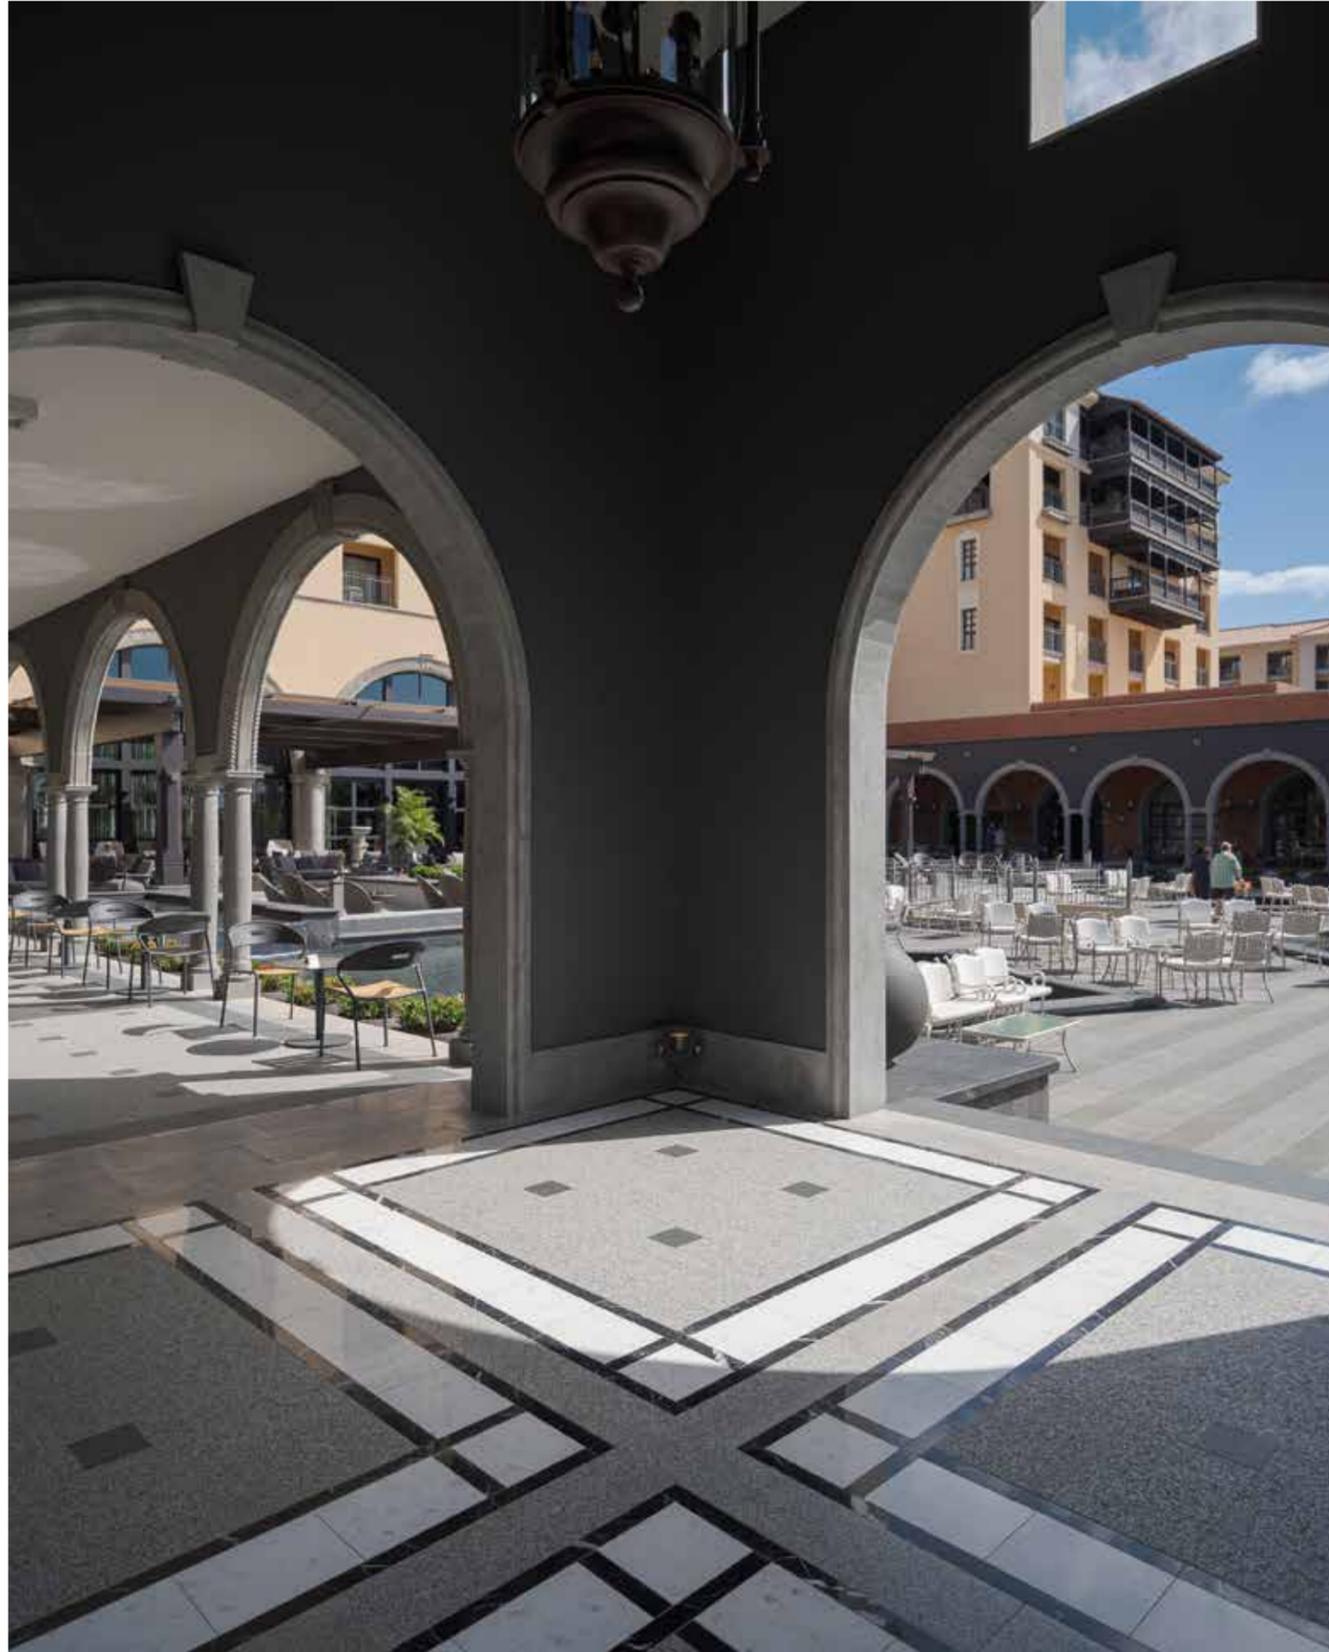

Gran Canaria, Spain

Lopesan Costa Meloneras Hotel is awarded the 'Premio Nacional Macael' Prize.

The 'Premio Nacional Macael' (Spanish Macael National Prize) has been awarded this year by the Fundación Marca Macael (Marca Macael Foundation) to the recently refurbished Lopesan Costa Meloneras Hotel, in recognition of the architectural and aesthetic value of the comprehensive refurbishment carried out in this iconic four-star Resort & Spa located in Las Palmas. In this refurbishment project, undertaken by Juan Francisco García and the Lopesan Hotel Group's own design department, more than 7,000 square metres of marble, granite and ultra-compact Dekton surface have been fitted.

The project stands out for its large scale and its integration into the landscape and the context in which it is located, one of the most exclusive tourist areas on the island of Gran Canaria. Surrounded by the Maspalomas Dunes Nature Reserve and next to its emblematic Boulevard, the Lopesan Costa Meloneras Hotel is updated paying homage to its own history. Opened 20 years ago, with 1,136 rooms, 2,700 beds and more than 70,000 m<sup>2</sup> of outdoor areas, it has become one of the largest hotels in Spain.

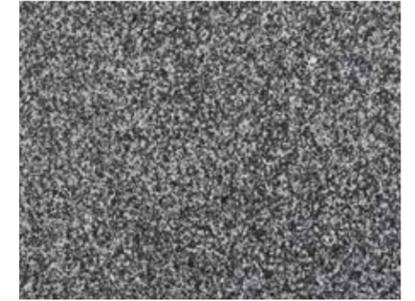

The benefits of stone combined with Dekton® surface

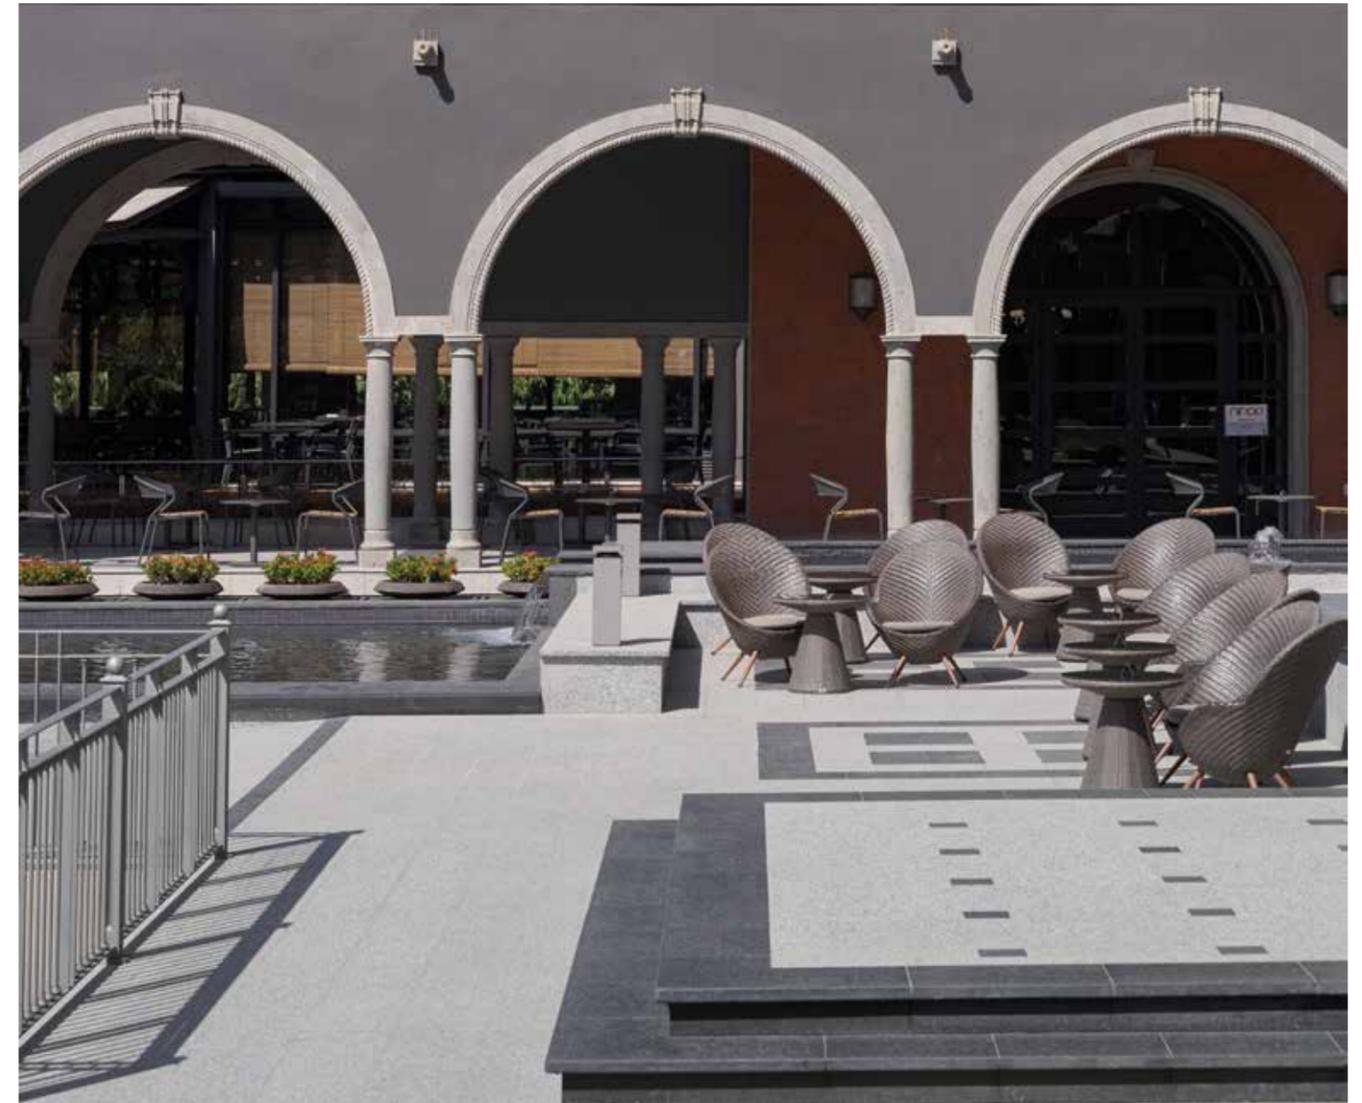

The strength and hardness of the natural stone used in this project blends with the various applications of Cosentino®'s Dekton® surface, providing a number of other technical advantages.

## 02/ Hipotels: Playa de Palma Palace and Gran Playa de Palma 5 ★ Mallorca, Spain

In 2017, the HIPOTELS hotel chain opened two new hotels in Playa de Palma (Palma de Mallorca). Aimed at foreign tourists, the chain's main objective is to offer quality properties in unbeatable locations, with personalised service and facilities that exceed market expectations.

These two new buildings, the four-star Hipotels Gran Playa de Palma and the five-star Hipotels Playa de Palma Palace, represent a major step forward in terms of the tourism, economy and quality of the area.

More than 72,700 m<sup>2</sup> of the ultra-compact surface Dekton® by Cosentino and 1,600 m<sup>2</sup> of Silestone® by Cosentino were used in the construction and launch of the two complexes.

—  
Architecture  
Morro & Serra

Design  
Guillermo Conté Barceló

The two new constructions, the 4-star Hipotels Gran Playa de Palma and the 5-star Hipotels Playa de Palma Palace, represent a great tourist, economic and quality boost for the area.

→ Flooring around the pool  
Dekton® Danacé

For the execution and start-up of both complexes, more than 72,700 m<sup>2</sup> of the ultra-compact Dekton surface and more than 1,600 m<sup>2</sup> of Silestone have been used.

→ Facade  
Dekton® Edora

**Interior and exterior flooring, dry and wet areas.**

The ultra-compact Dekton® surface makes up a large proportion of the flooring in the two hotels, both inside and out. The large format of the Dekton® pieces (320 x 144 cm) has enabled the creation of beautiful, top-quality floors in the rooms, common areas and outdoor pool area.

To ensure colour consistency, Dekton® flooring is used throughout the project in a range of soft, light and grey finishes such as Danae, Blanc Concrete, Sirocco, Edera and Keon.

→ Worktop  
Silestone® White Zeus

→ Flooring and stairs  
Dekton® Danae

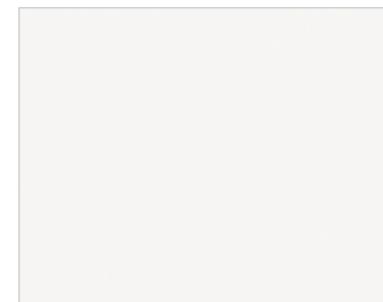

### Reception, buffets and bars: 1,000 m<sup>2</sup> of Silestone

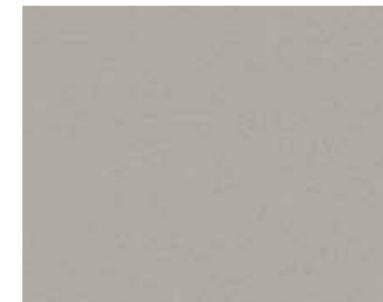

The common areas of both hotels, including bars and dining rooms, are clad in Silestone. The impeccable White Zeus colour is used on worktops and panelling to create an aesthetic of unrivalled beauty. The same tone has been chosen for the spectacular reception area of the four-star hotel, as well as for the various counters located in different parts of the two complexes.

Other Silestone colours with exquisite dark finishes, such as Carbono and Stellar Night, were also chosen to clad various surfaces in the interior of the two hotels.

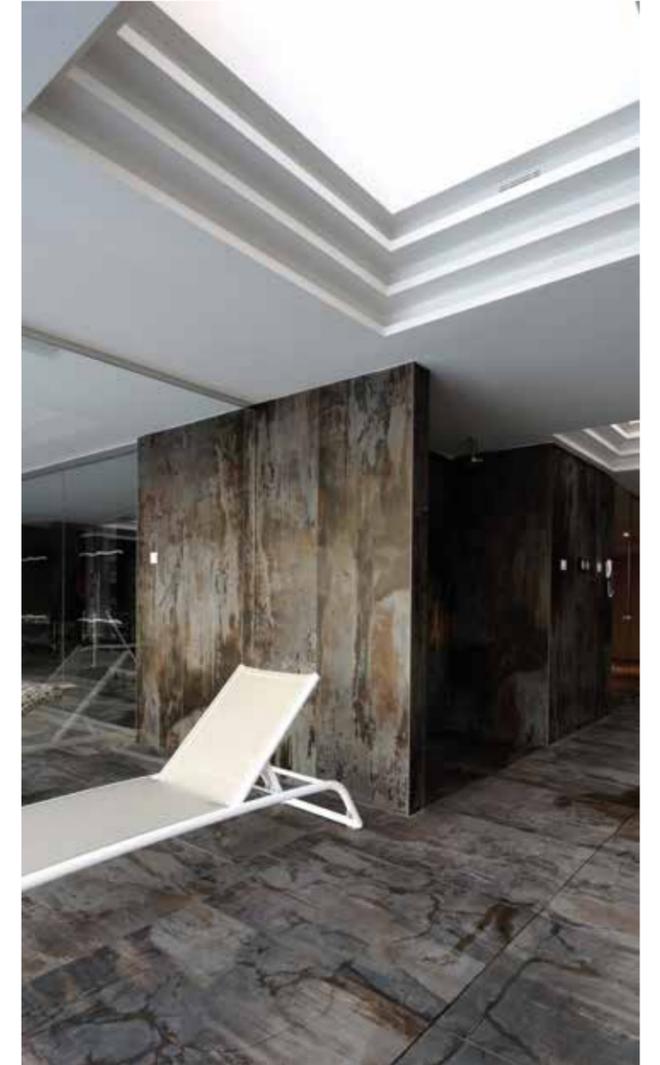

Silestone is the perfect choice for these specific applications thanks to some exceptional features such as easy cleaning and daily maintenance, high impact and scratch resistance and customisation.

→ Lobby interior cladding  
Silestone® White Zeus

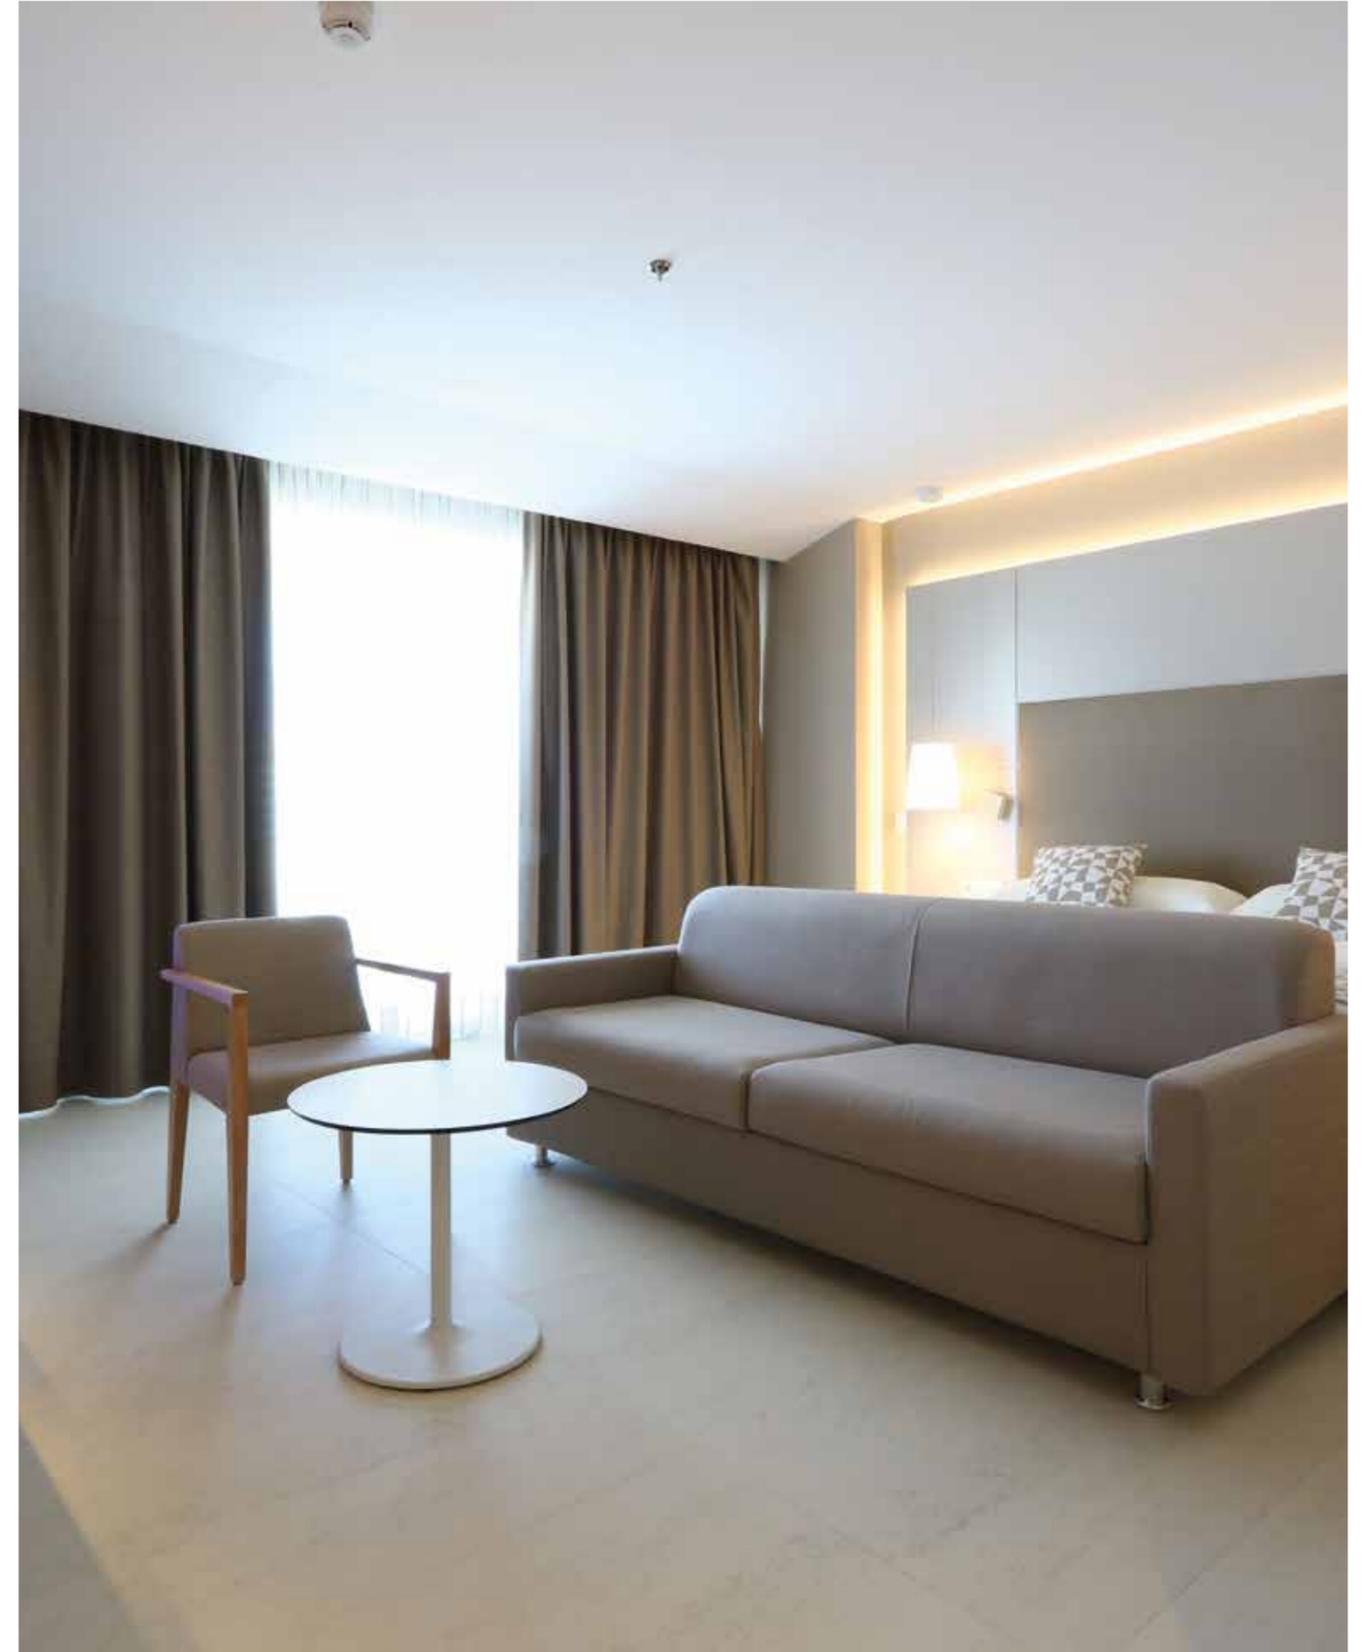

→ Lift flooring  
Dekton® Sirocco

Dekton® Trilium

### Bathroom countertops and integrated washbasin

The en-suite bathrooms feature bespoke Silestone® countertops and twin washbasins

## 03/ Scandic Hamburger Börs Hotel 4 ★

Turku, Finland

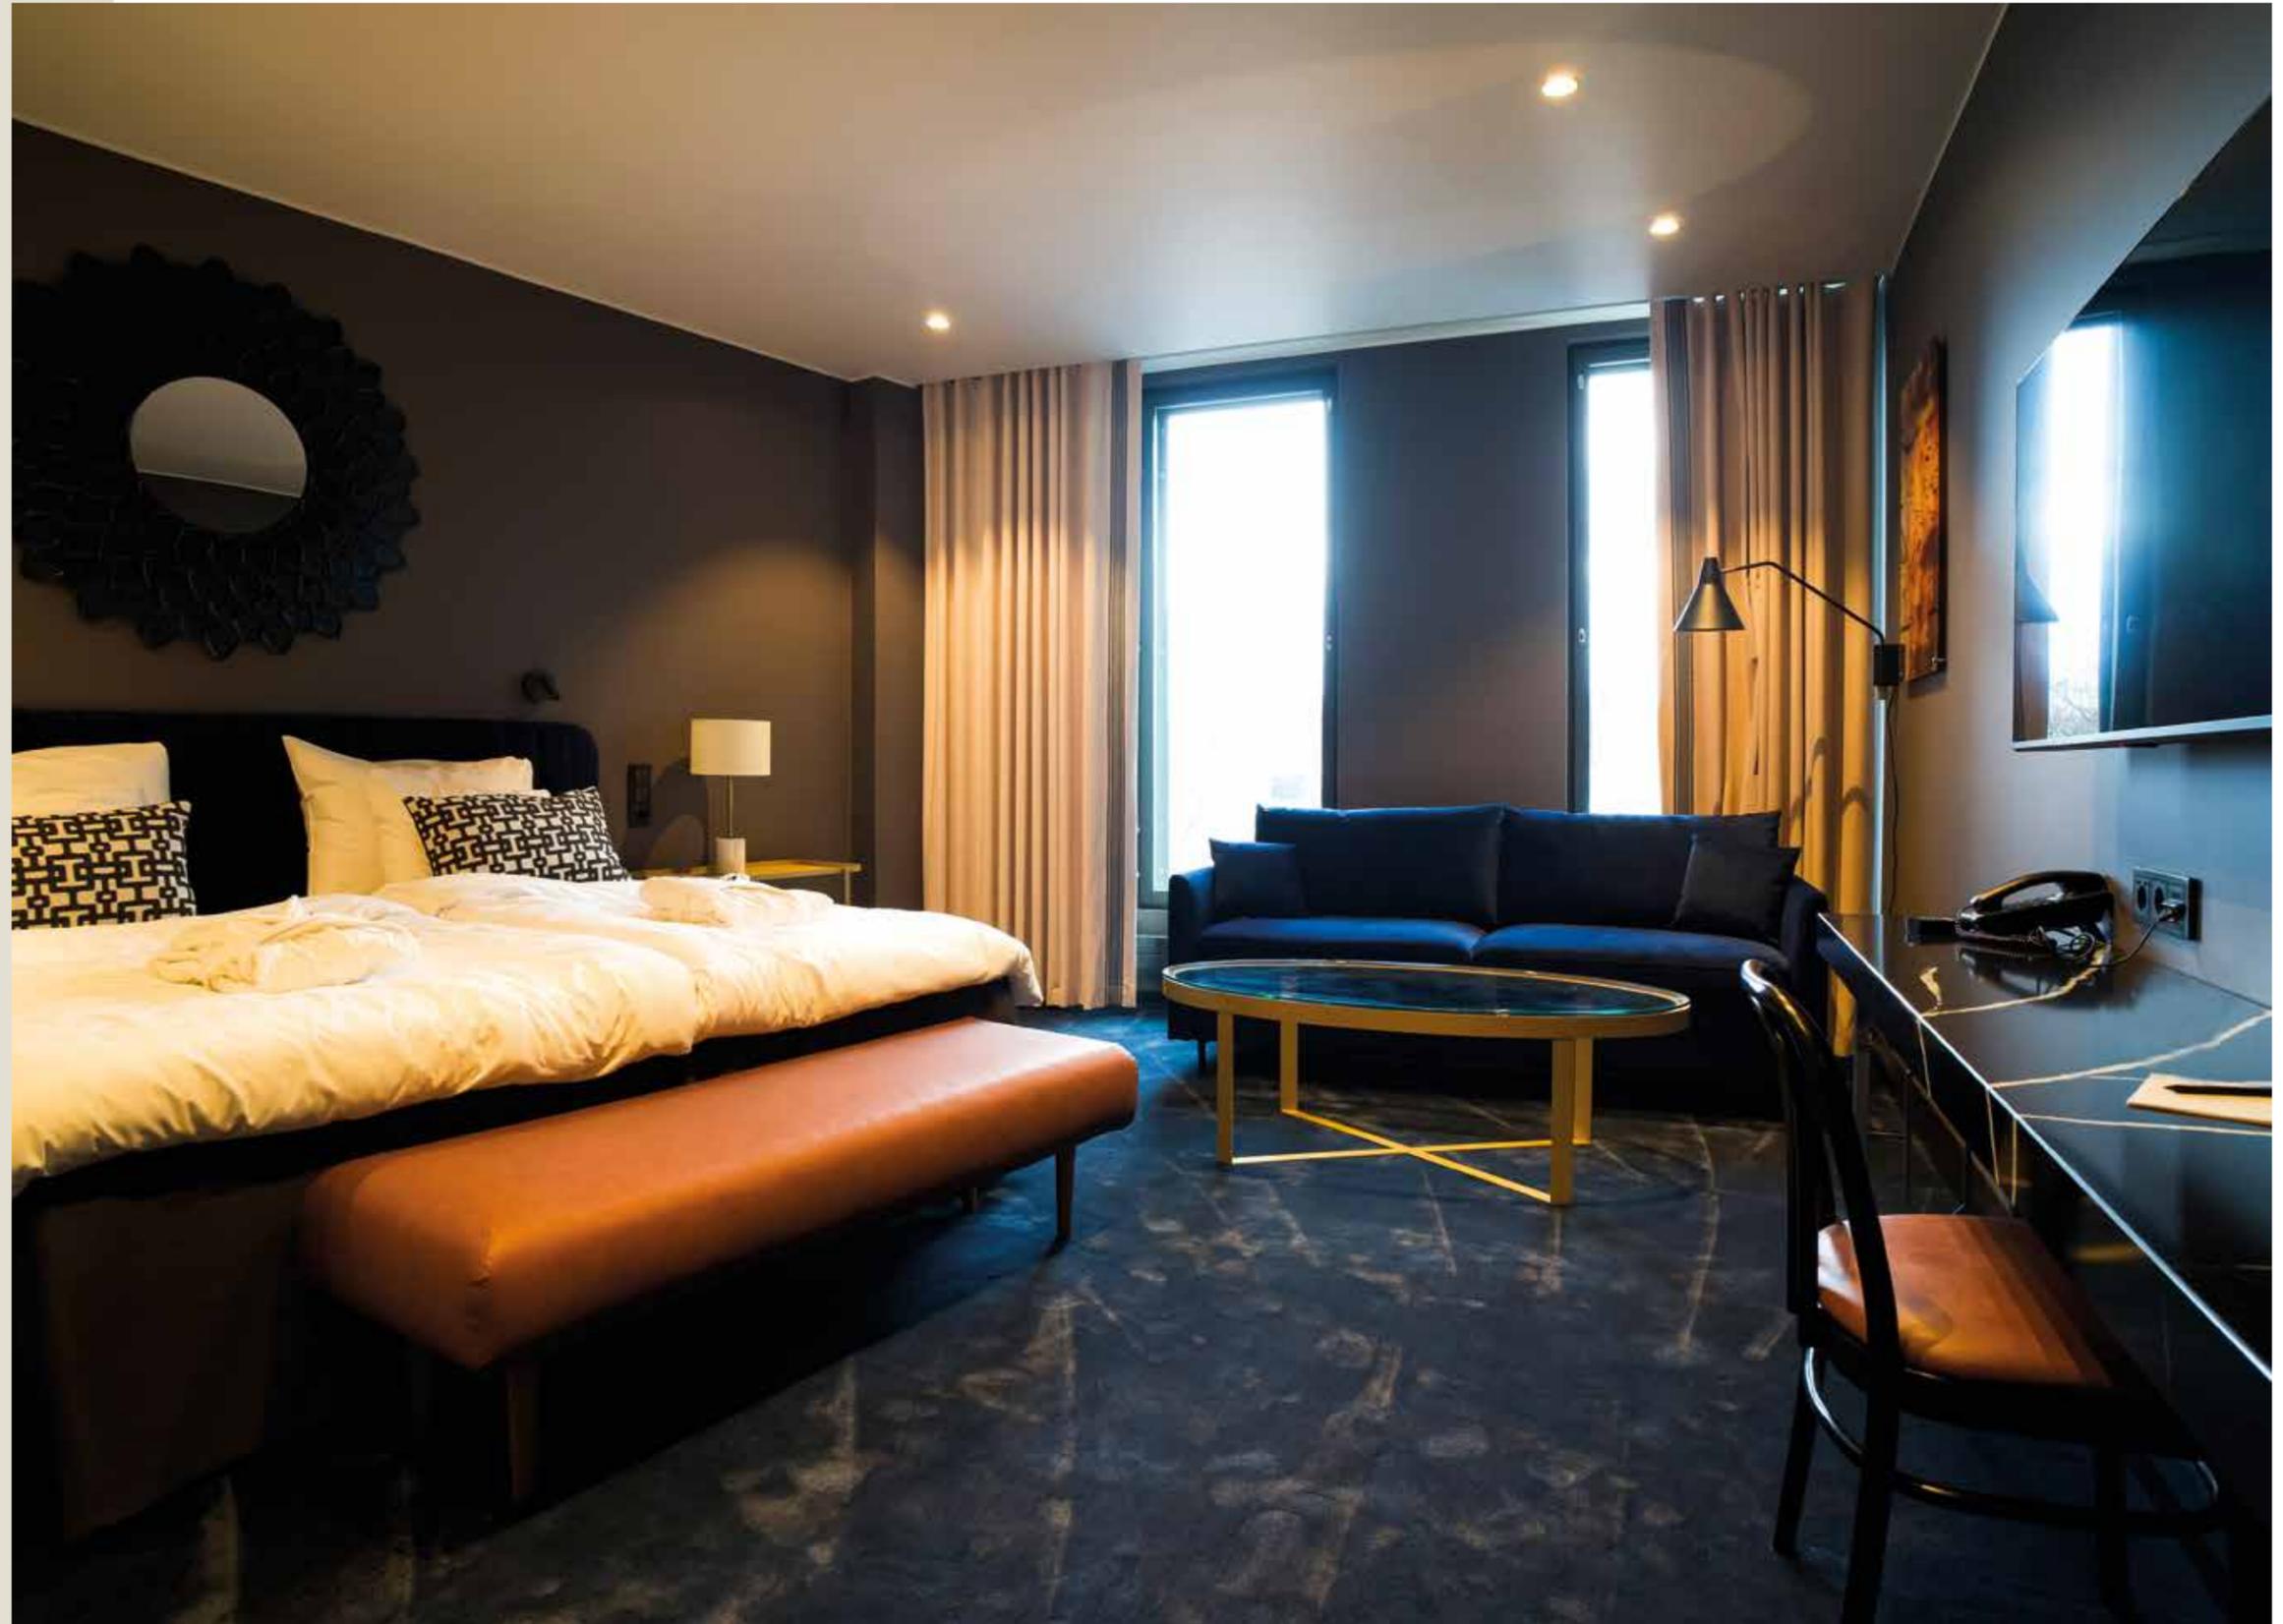

### The third life of a historic hotel in Turku.

The most famous and iconic hotel in Turku, Finland, has been built from scratch after dismantling the old building from the 1970s. This large scale project, managed by YIT construction company and designed by Schauman Architects, has resulted in a new, more energy efficient building equipped with modern technologies.

But not all is gone. The new Scandic Hamburger Börs hotel retains the essence of the original building in its design. The oldest part of the hotel, protected by Finnish heritage legislation, has been restored, and the new building, built over the extension carried out in the 1970s, maintains a historical dialogue with it.

The new building has been designed by Schauman Architects and preserves elements from the early 20th century. Its Más restaurant, located on the ground floor, is accessed through a reception area, a lounge and a spacious foyer. The heated winter garden by the restaurant and the open air terrace next to the rooftop bar complete the common areas. The hotel has 272 rooms and suites in total.

According to Janne Halin of the architecture studio, the project involved a dialogue between several different styles and the main challenge was to adapt the new building to its surrounding architecture. Combining the old with the contemporary while paying homage to the past has been the great challenge of the project.

## Quality materials

Among the materials used in the renovation project, the architecture studio chose Silestone for the worktops and tables in the restaurant and the rooms. Eternal Marquina was the colour chosen for the bar counter, a colour that evokes the Nero Marquina marble, bringing elegance and depth to the space and rounding off the Spanish inspired design of this common area of the hotel. The tables in Eternal Noir, another dramatic shade, complete the atmosphere. Silestone

surfaces are highly resistant to stains, scratches and are easy to maintain, which makes them the ideal material for spaces like this.

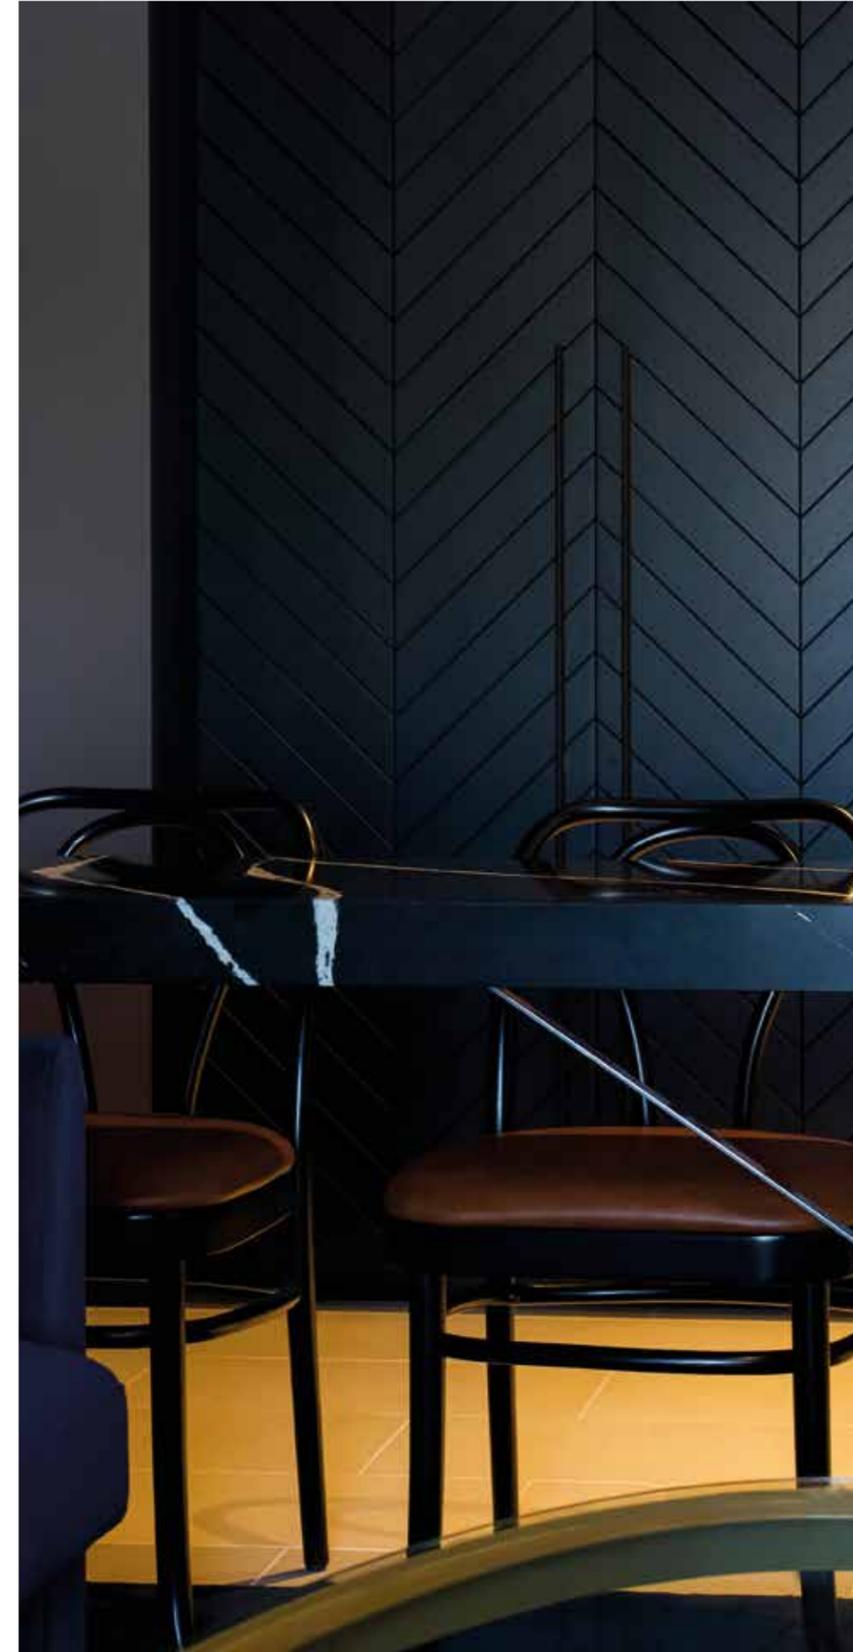

→ Worktops  
Silestone® Eternal Marquina

→ Tables  
Silestone® Eternal Calacatta Gold

## Charming rooms

The hotel's cosy rooms feature an elegant interior design. From the luxurious suite with beautiful arched windows to the standard rooms, they all offer an atmosphere in which the hotel's history and contemporary comforts come together. "The interior design of the rooms features a neo-Scandinavian style that uses warmer colours to create a relaxed and pleasant atmosphere, replacing traditional styles based on light and simple colours," says interior architect Jaakko Puro.

→ Tables  
Silestone® Eternal Noir

## 04/ Mayorazgo Hotel 4 ★

Madrid, Spain

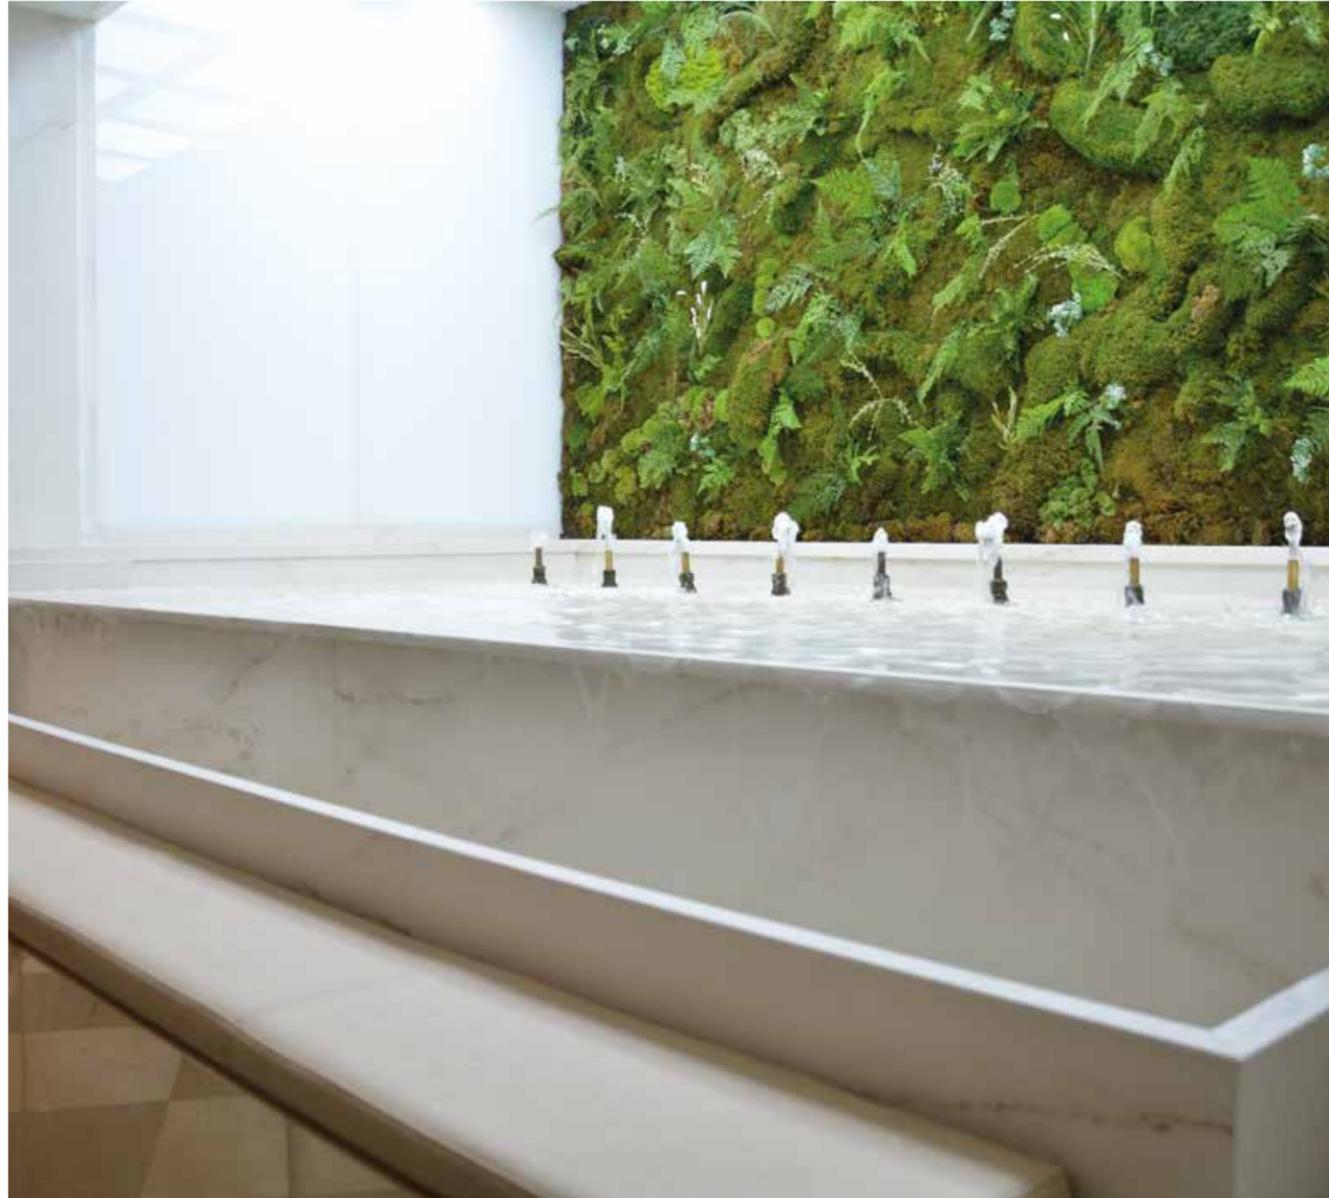

Madrid's most traditional hotel gets a makeover with Dekton.

The refurbishment and updating of the Mayorazgo hotel was completed in February 2021. This traditional and genuine hotel, the "most Madrid-like hotel", according to the hotel's website, is located in the heart of Gran Vía, in central Madrid. Those responsible for the project, including the hotel director Manuel A. Ruiz and project developer Francisco Sánchez from Axis 4 Diseño y Gestión, were tasked with preserving the spirit of the hotel and its distinctive Madrid style while at the same time bringing it up to date with a more modern look. Furthermore, functionality and the ability to adapt to the theme of the hotel had to be paramount in the choice of materials.

After evaluating other options available on the market, the project managers opted for the Dekton surface in a variety of finishes. Safety, hygiene and durability were key factors in their choice. A hotel is a semi-public space, subject to high traffic and strict regulations that require working with the most reliable suppliers.

Four Dekton finishes for the Mayorazgo hotel: Dekton Dove in 159 x 142 cm format for the lounge floor and staircase; Dekton Entzo for the walls of the main lounge; Dekton Laurent for the restaurant tables and bar; and Dekton Rem for the fountain in the hotel lobby.

**Materials from the Natural Collection**

The finishes chosen for the refurbishment belong to Dekton's Natural Collection and are inspired by classic marbles. The architect chose Dekton Dove, a beige and highly textured material, as a base, and then incorporated two veined surfaces, Dekton Entzo and Dekton Rem, for a very elegant result. As a counterpoint to this, the architect chose Dekton Laurent for the restaurant tables and bar. It is an almost black finish, with very subtle veins in earth tones.

But perhaps the most eye-catching feature of the refurbishment is the stunning fountain that greets guests at the hotel's lobby. Located next to the reception desk, it features a well-tended vertical garden and is the perfect prelude to what is to come. The freshness, the sound of water and the elegance of Dekton Rem turn the lobby of the Mayorazgo hotel into an improvised paradise for the tired tourist suffering the heat of the Madrid summer.

→ Lobby fountain  
Dekton® Rem

→ Lounge walls  
Dekton® Entzo

The counterpoint is provided by the material selected for the restaurant tables and bar: Dekton Laurent. It is an almost black finish, with a very subtle grain in earth tones.

→ Flooring  
Dekton® Danae

## 05/ Crowne Plaza Hotel 4 ★

Warsaw, Poland

Respect for nature,  
in every detail.

Crowne Plaza - The Warsaw HUB had its opening in November 2020. This modern, multi-functional hub in the centre of Warsaw, the capital of Poland, is an outstanding building and an eye-catcher. Two skyscrapers, connected by a bridge, are a place for conference centres, relaxation zones, hotels and offices. It is also the place for the first hotel from the Crowne Plaza chain in Poland. The interior design was entrusted to the Warsaw-based studio Tremend, which has experience of similar projects.

The main theme in the interiors of the Crowne Plaza is the Vistula River and its unique wild nature. Respect for nature is expressed not only in this clear reference to the river, but also in the conscious choice of materials. The common areas are clad in materials including Silestone by Cosentino, a company that is constantly developing its circular economy model. On top of that, Cosentino surfaces are characterised by exceptional durability and resistance to wear and tear.

“We chose Silestone because, first and foremost, we want to cooperate with producers who respect the natural environment. Besides, this material fits perfectly into our main theme. The veins on the slabs are reminiscent of a river, which is at the centre of our project,” explains architect Magdalena Federowicz-Boule, CEO of Tremend.

### A chromatic gallery to recreate any atmosphere

The common areas are a reflection of the bustling city life. They are full of colour and eclectic. They are characterised by a wealth of textures, finishes and exceptional attention to detail – there are no random decorative elements here. Instead, we will see beautifully crafted bars – from the spectacular lobby bar, clad in white Silestone Classic Calacatta and ‘crowned’ with an impressive copper-coloured frame, to the restaurant bars and the Sky Bar on the top floor of the hotel. This luxurious space is completed by a sparkling black bar in Silestone Stellar Night.

The furniture is also striking, with soft leathers and pleasant fabrics combined with a subtle pattern on the sturdy tables. The black Silestone Eternal Noir used for the worktops is a perfect match for the warm brown of the seats and the old gold of the lamps and furniture details. The conference centre, on the other hand, has been kept in the lifestyle spirit. It evokes associations with a modern command centre, filled with new technology but cosy at the same time.

→ Bars, furniture and cladding  
Silestone Eternal® Calacatta Gold

→ Worktops  
Silestone® Eternal Noir

→ Bar top  
Silestone® Stellar Night

### Cosentino, more than a supplier

The interior of the hotel uses the highest quality materials to reflect the metropolitan character of the location and meet the expectations of guests from around the world. Designer lighting, lots of natural greenery and carefully selected furniture all combine to create a modern space that will appeal to everyone. One of the consistent elements that can be found in many spaces is the tables by NAP. Their minimalist design is enhanced by a variety of veined Silestone table tops.

“Our adventure with Cosentino began with this great adaptation of the Crowne Plaza interiors. We were pleasantly surprised by the quality of all the products, as well as the company’s communication and service. Our orders were delivered on time and in the agreed configurations. We will certainly be using Silestone and Dekton worktops in our future designs,” says Mikołaj Wielowiejski, Sales Director at NAP.

→ Washbasins  
Silestone® Eternal Marquina

## 06/ Hard Rock Hotel 4 ★

Madrid, Spain

### A customised design rich in textures

Located in the so-called Art Triangle, opposite the Museo Nacional Centro de Arte Reina Sofía (Queen Sofia National Museum Art Centre), the hotel's design unsurprisingly pays homage to Madrid's most popular and musical side. Vibrant colours and a modern concept run throughout the rooms, suites and common areas, where different shades of Dekton and Silestone have been used for wall claddings, fittings and furnishings.

"We were surprised by the versatility of the materials and finishes, so we also used them for furniture, fittings and different equipment in a wide variety of thicknesses," says Rockwell Group, the architecture studio responsible for the design of the new Hard Rock Hotel in Madrid.

**An example of many applications**

“We worked with Cosentino to create customised solutions for the interior spaces of the Hard Rock Hotel Madrid, such as anti-slip finishes, large format tiles, cement look for the outdoor spaces and a unique, customised, terrazzo-look finish for the room showers and some of the furniture, which is a main feature of the design”, say the architects. Specifically, Silestone was used for the cladding of bathrooms, worktops and table tops in the suites and for the bar worktops and table

tops in the common areas. As for Dekton, it was used to clad the countertops of the bathrooms on the main floor, as well as for the flooring, steps and the swimming pool.

→ Bars, furniture and cladding  
Silestone® Blanco Orion

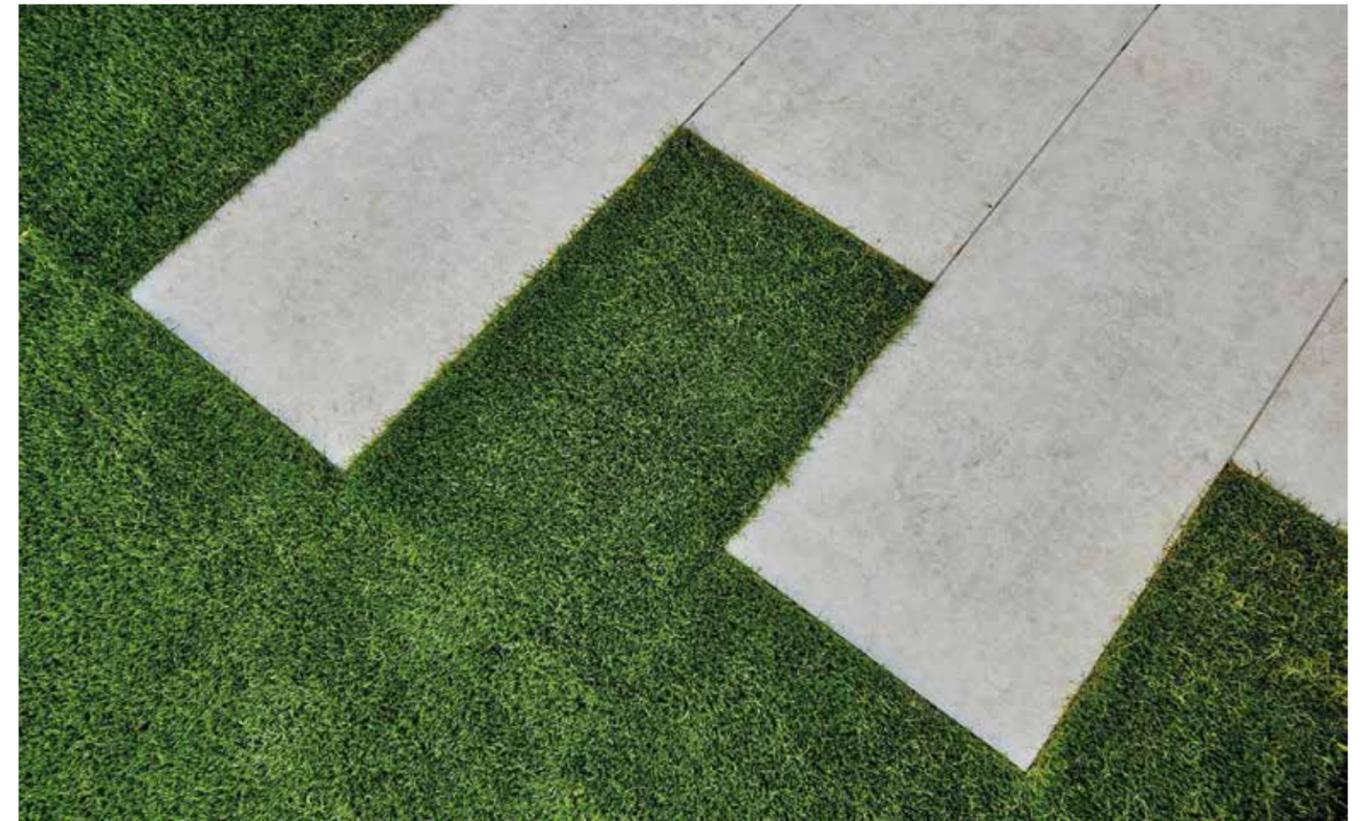

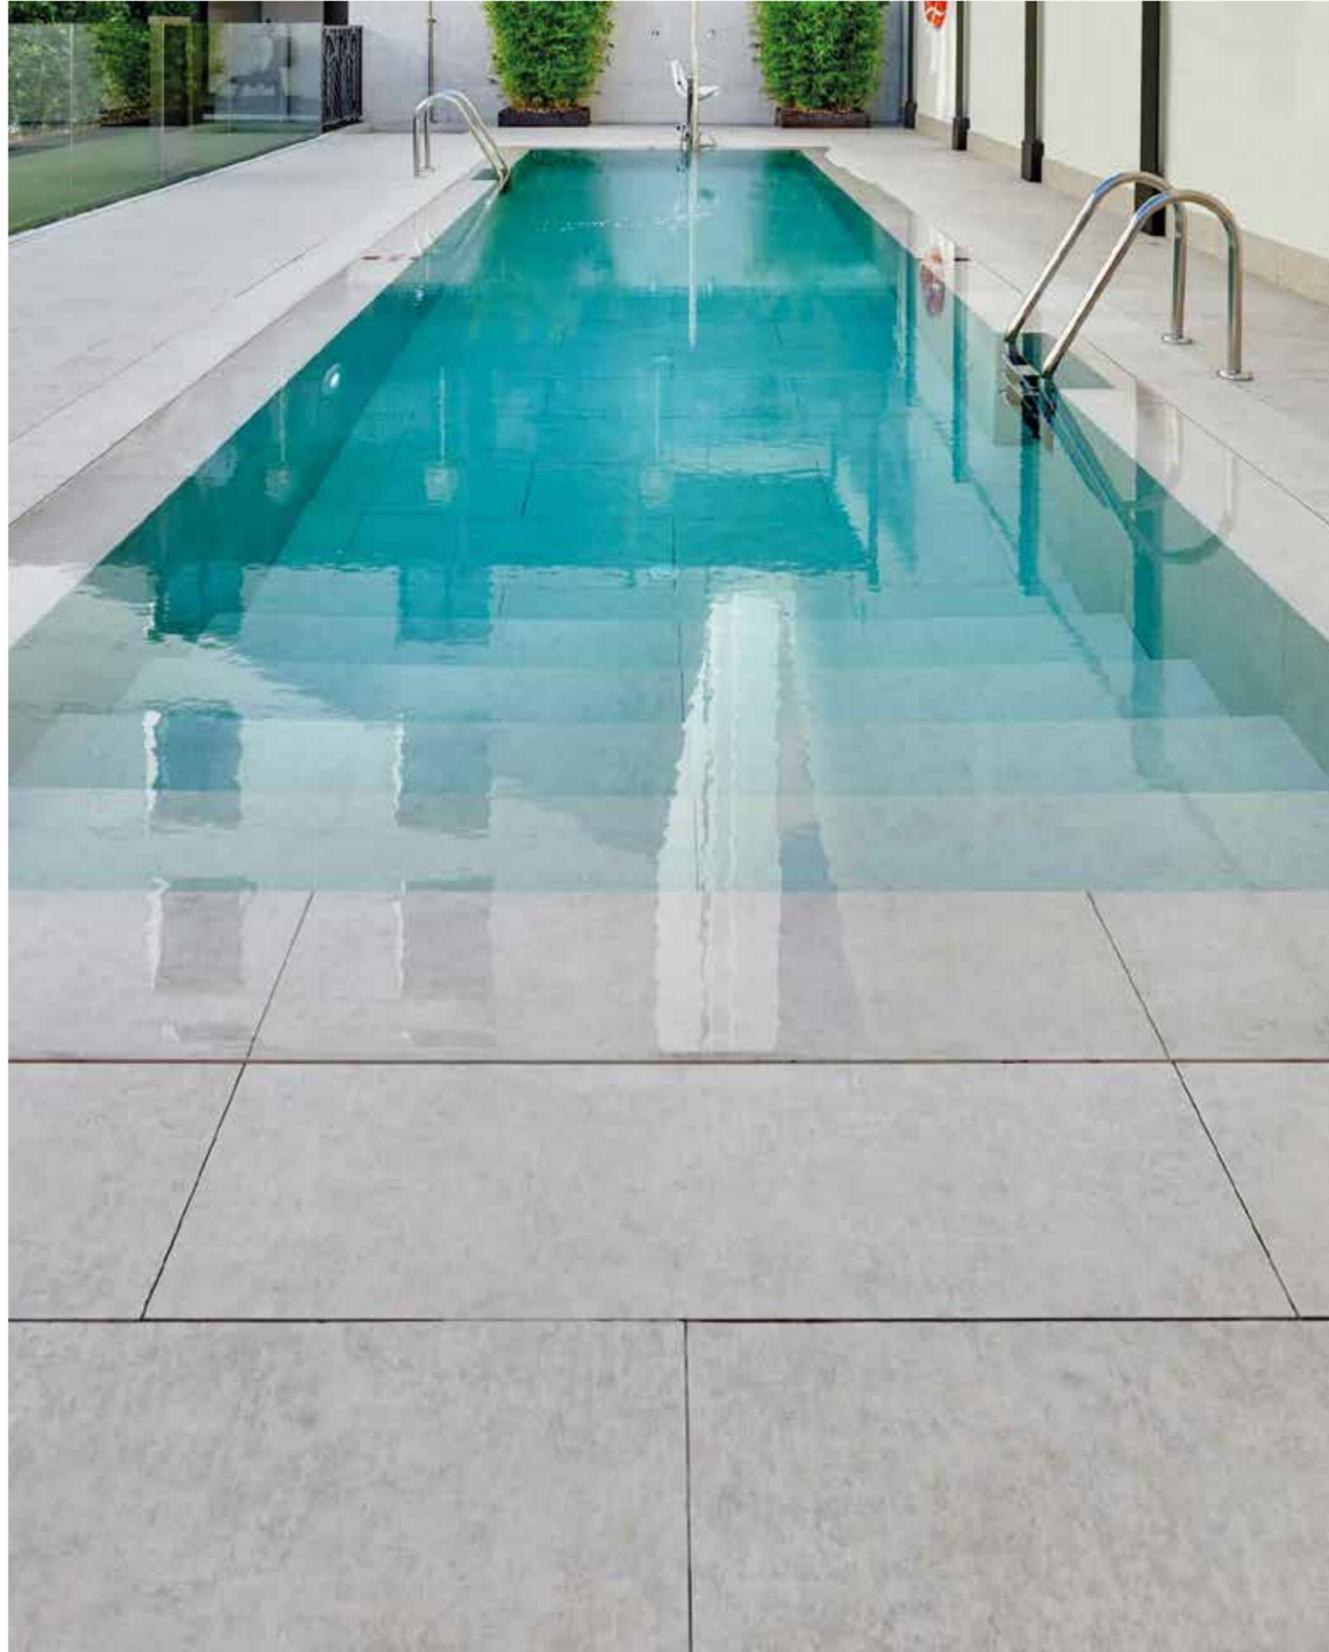

→ Countertops, flooring and cladding  
Dekton® Lunar

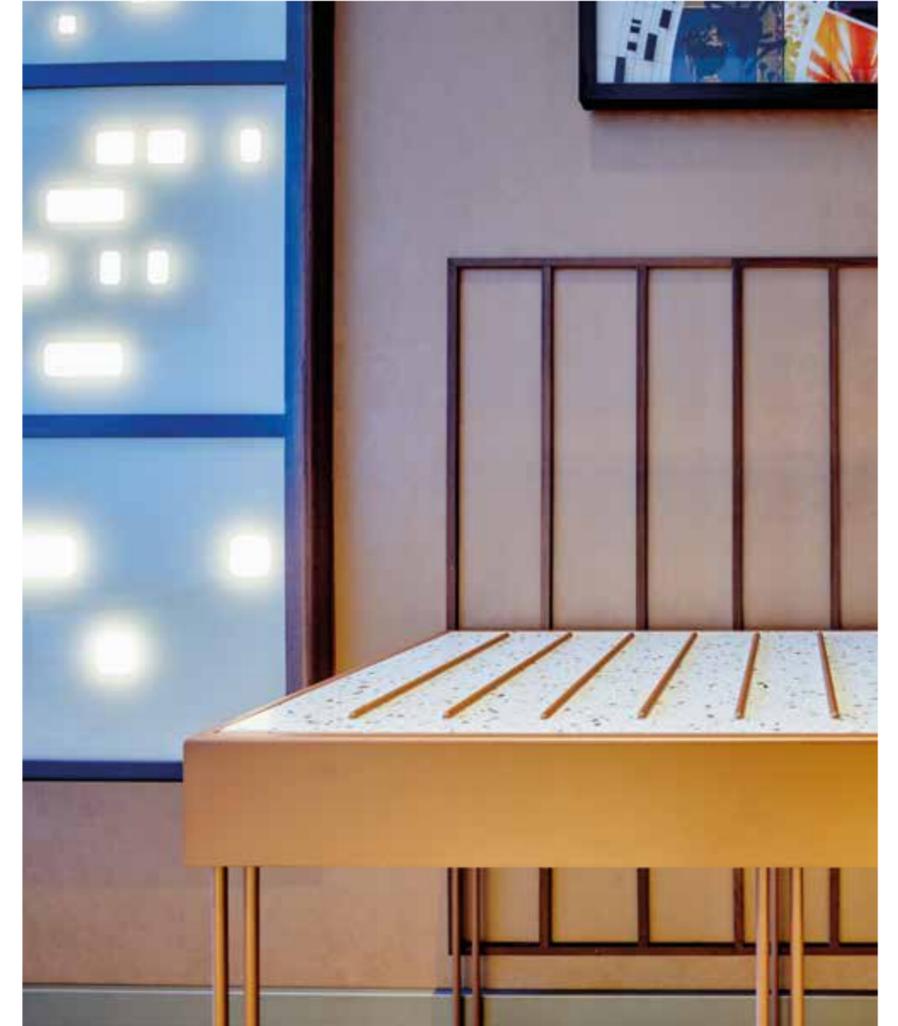

→ Bars, furniture and cladding  
Silestone® Coral Clay

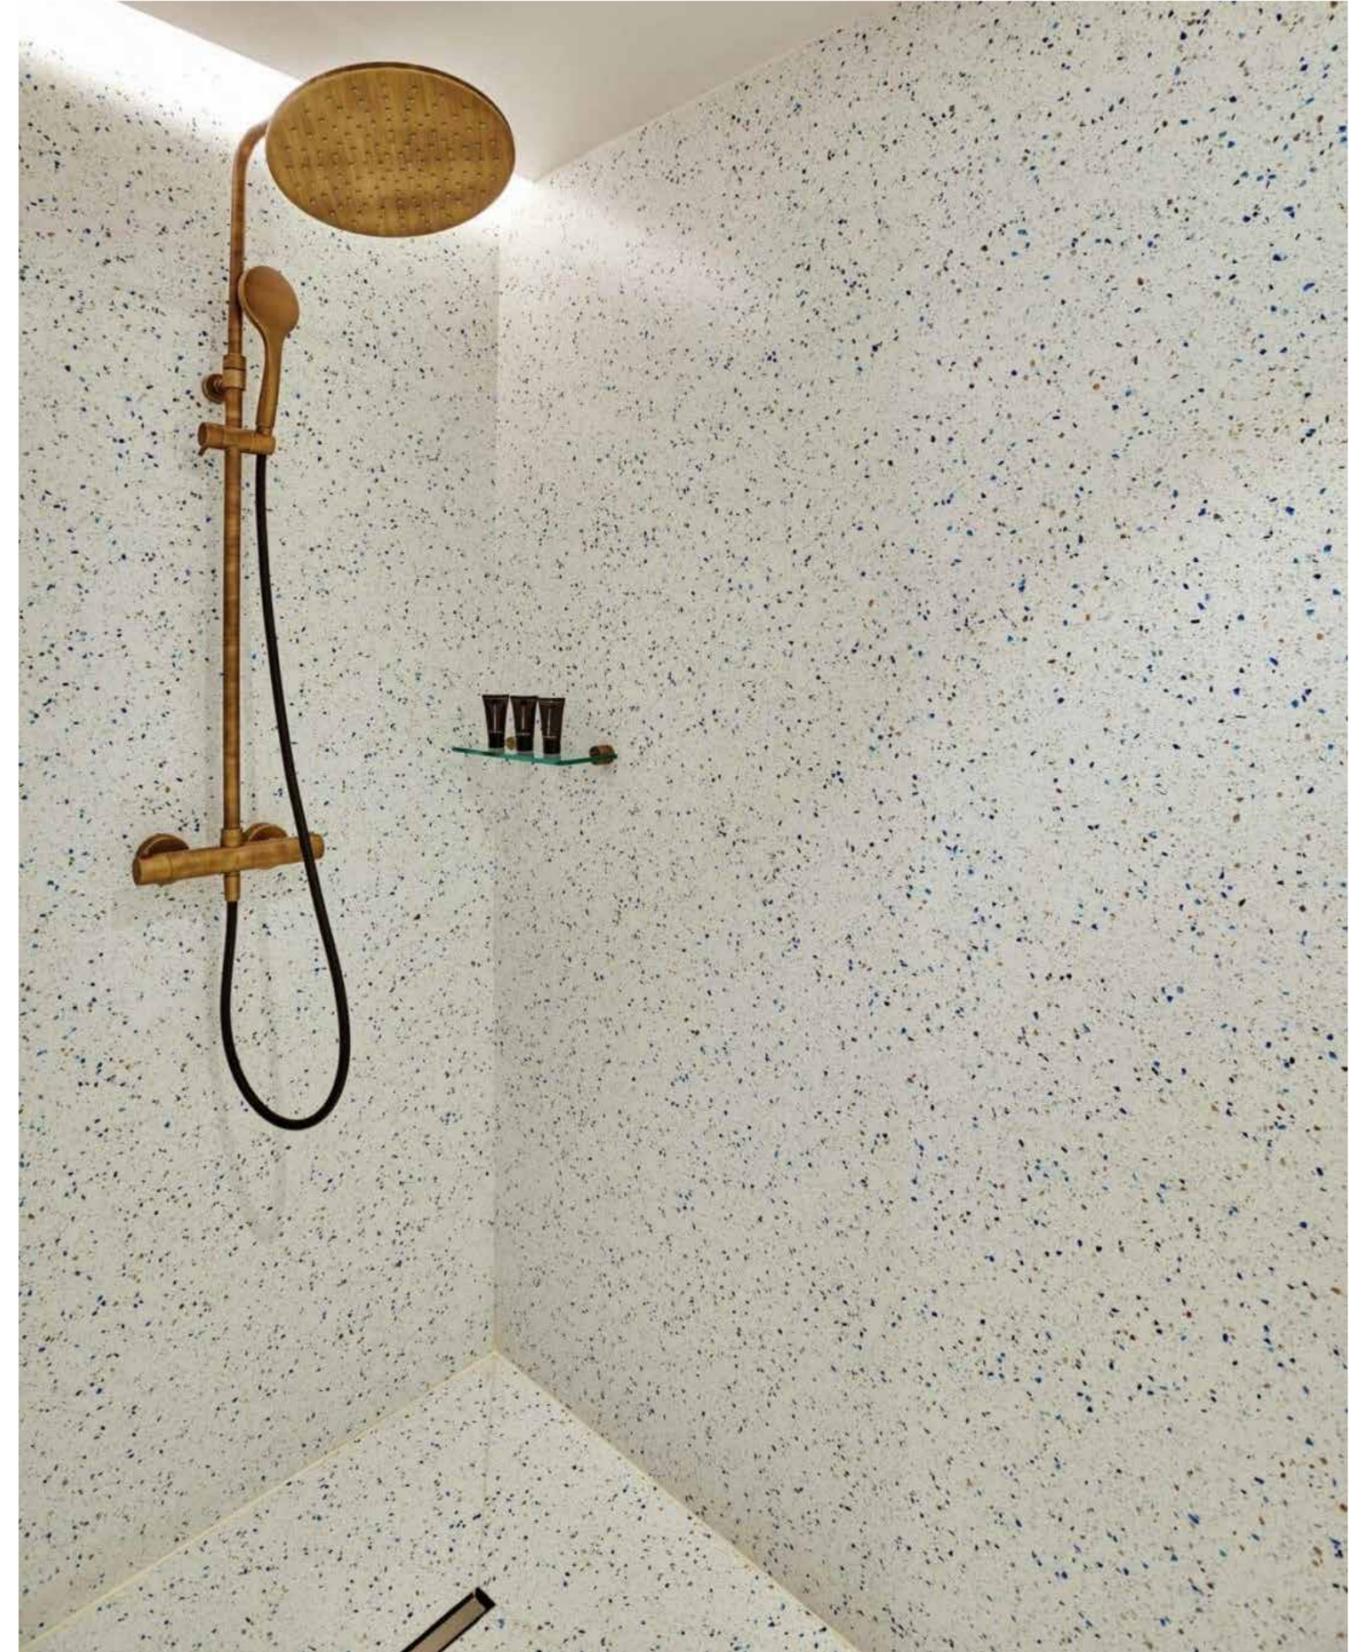

### Quality solutions

The chemistry between the studio and Cosentino was immediate and allowed Rockwell Group to meet the schedule and expectations of the customer, ASG Iberia. "Cosentino's technical team was a constant source of support, as they studied the project from the beginning. They provided solutions in terms of quality and design", explains the studio. Everything was taken care of in detail, creating personalised spaces that give the hotel its own identity, "such as the custom tile finish in the rooms that offered a durable solution with a beautiful design," they say.

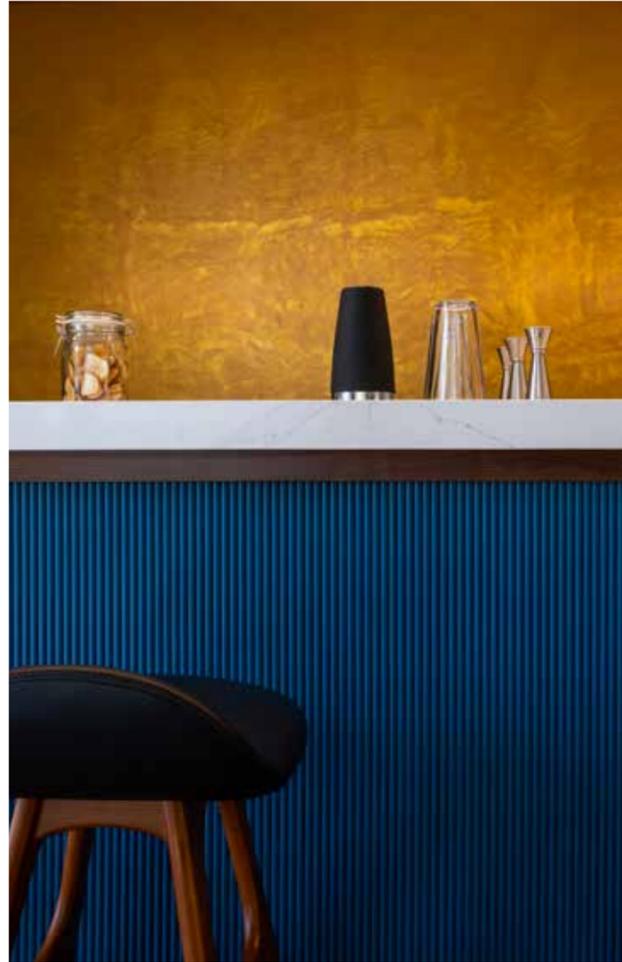

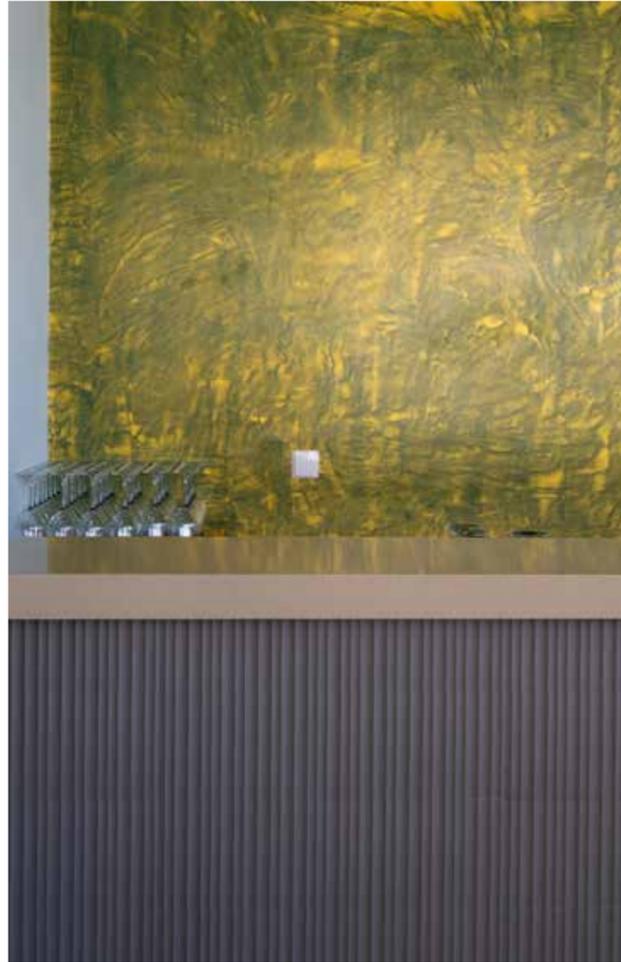

## 07/ Sines Sea View Hotel 4 ★

Sines, Portugal

A business and leisure hotel that reflects the sea breeze through its materials.

Born in the wake of the Port of Sines industrial project in Portugal, the Sines Sea View Hotel has been designed to respond to the need for a business and leisure space in the area. Its owners, of Ukrainian origin, saw the opportunity and the need to provide Sines – a city that hosts major events, including the Festival Músicas do Mundo (World Music Festival) and numerous international sporting events – with such a venue. “The seasonal nature of tourism also dictated the need for the hotel to serve the local population, and it was precisely this diversity of needs that guided our choices in terms of interior design,” explain its designers, Pedro Araújo and Vitor Martins, founding partners of Luxdesign, the studio in charge of the project.

### A colourful and harmonious hotel

This time, the designers have put all their efforts into creating a hotel with an emotional atmosphere and in close connection with its context. To achieve this, they chose a colour scheme in bright blues and greens, and an eclectic and powerful combination of materials. "The colours chosen are related to the place and the project, to the moods. The Italian school teaches not to be afraid of using colour, to be bold. Colour is essential to life, and we are not afraid to be bold in its combination," they say.

→ Bar tops  
Silestone® Coral Clay

→ Bar tops  
Silestone® Ethereal Glow

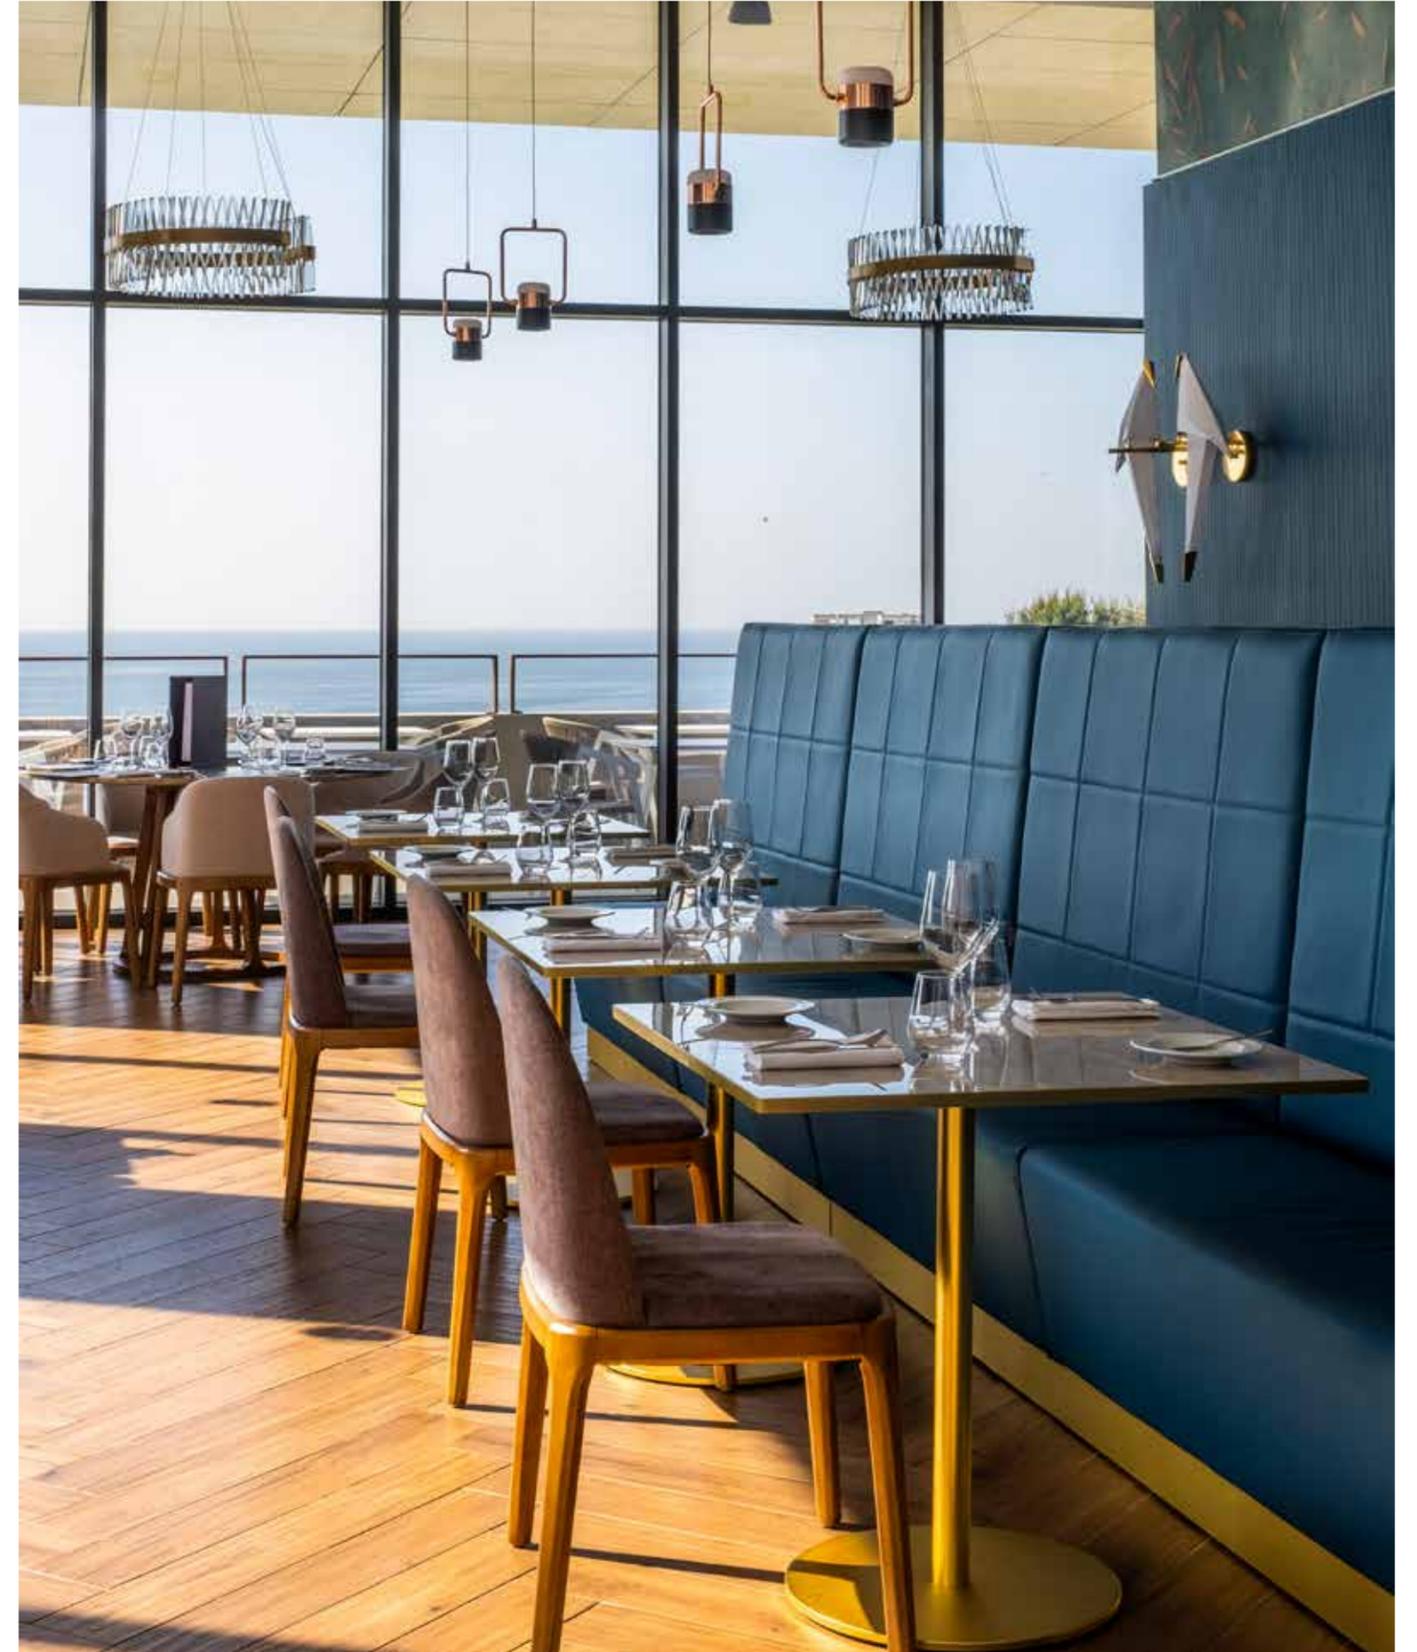

→ Bar tops  
Silestone® Rougui

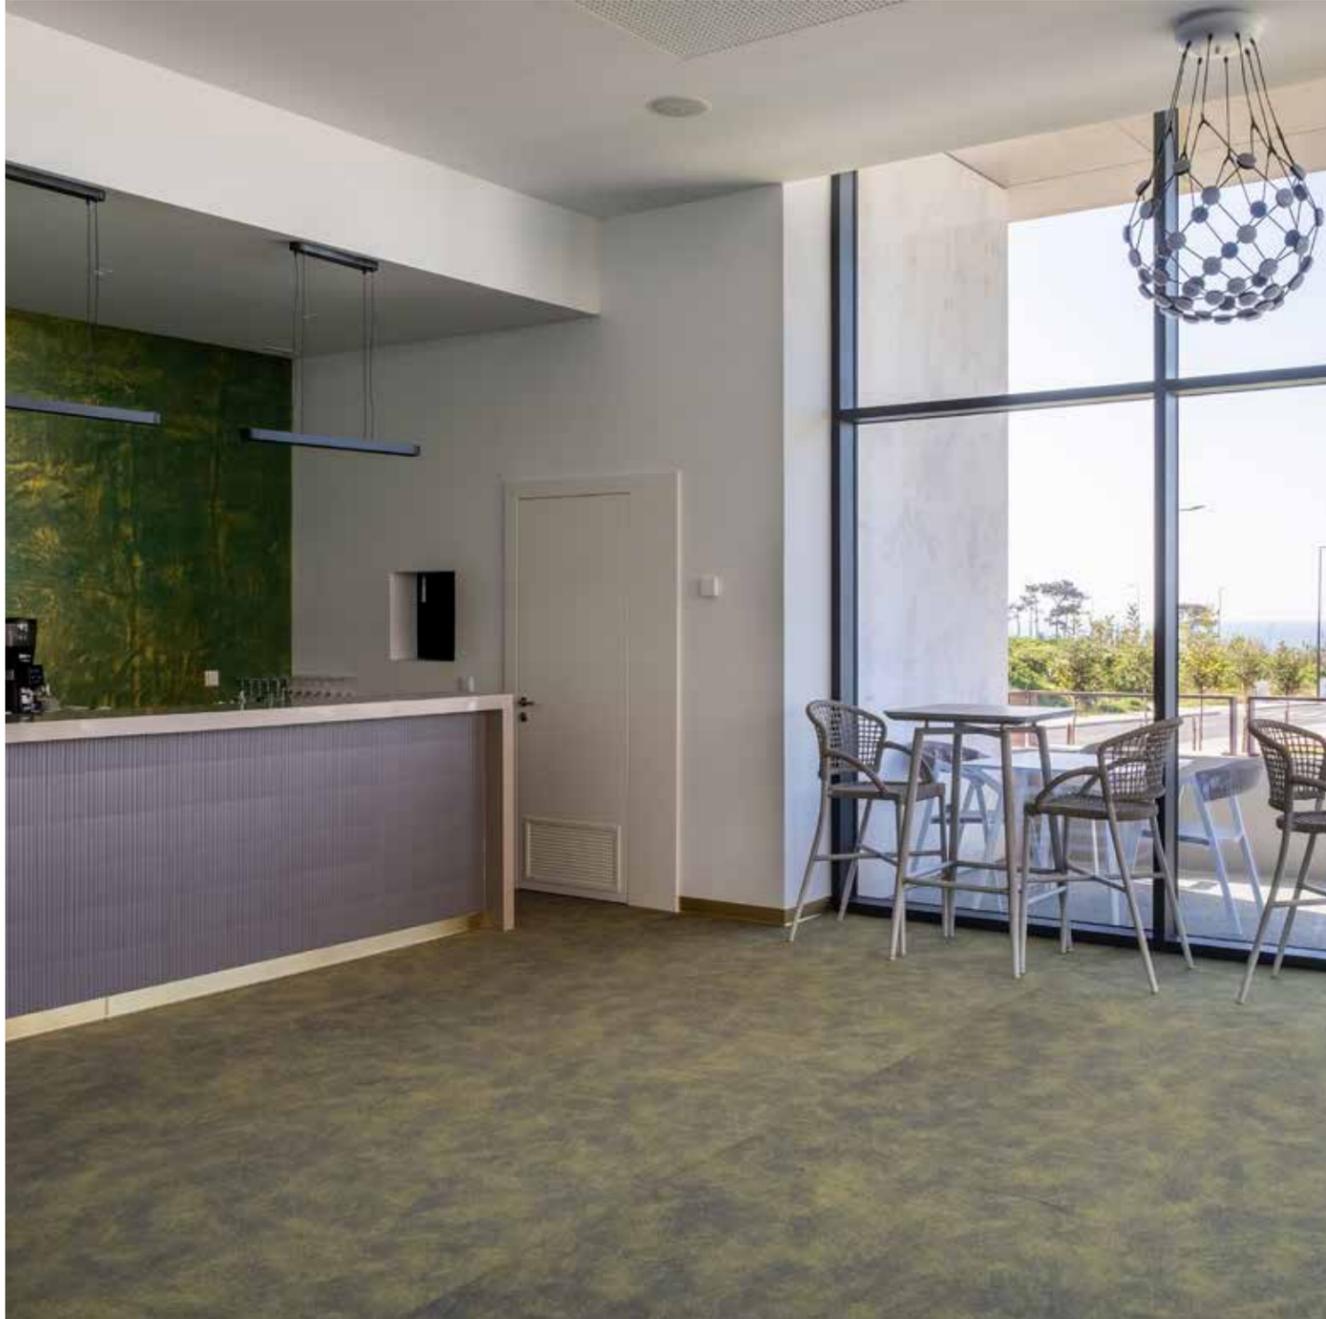

→ Bathrooms  
Dekton® Laurent

→ Table tops  
Dekton® Arga

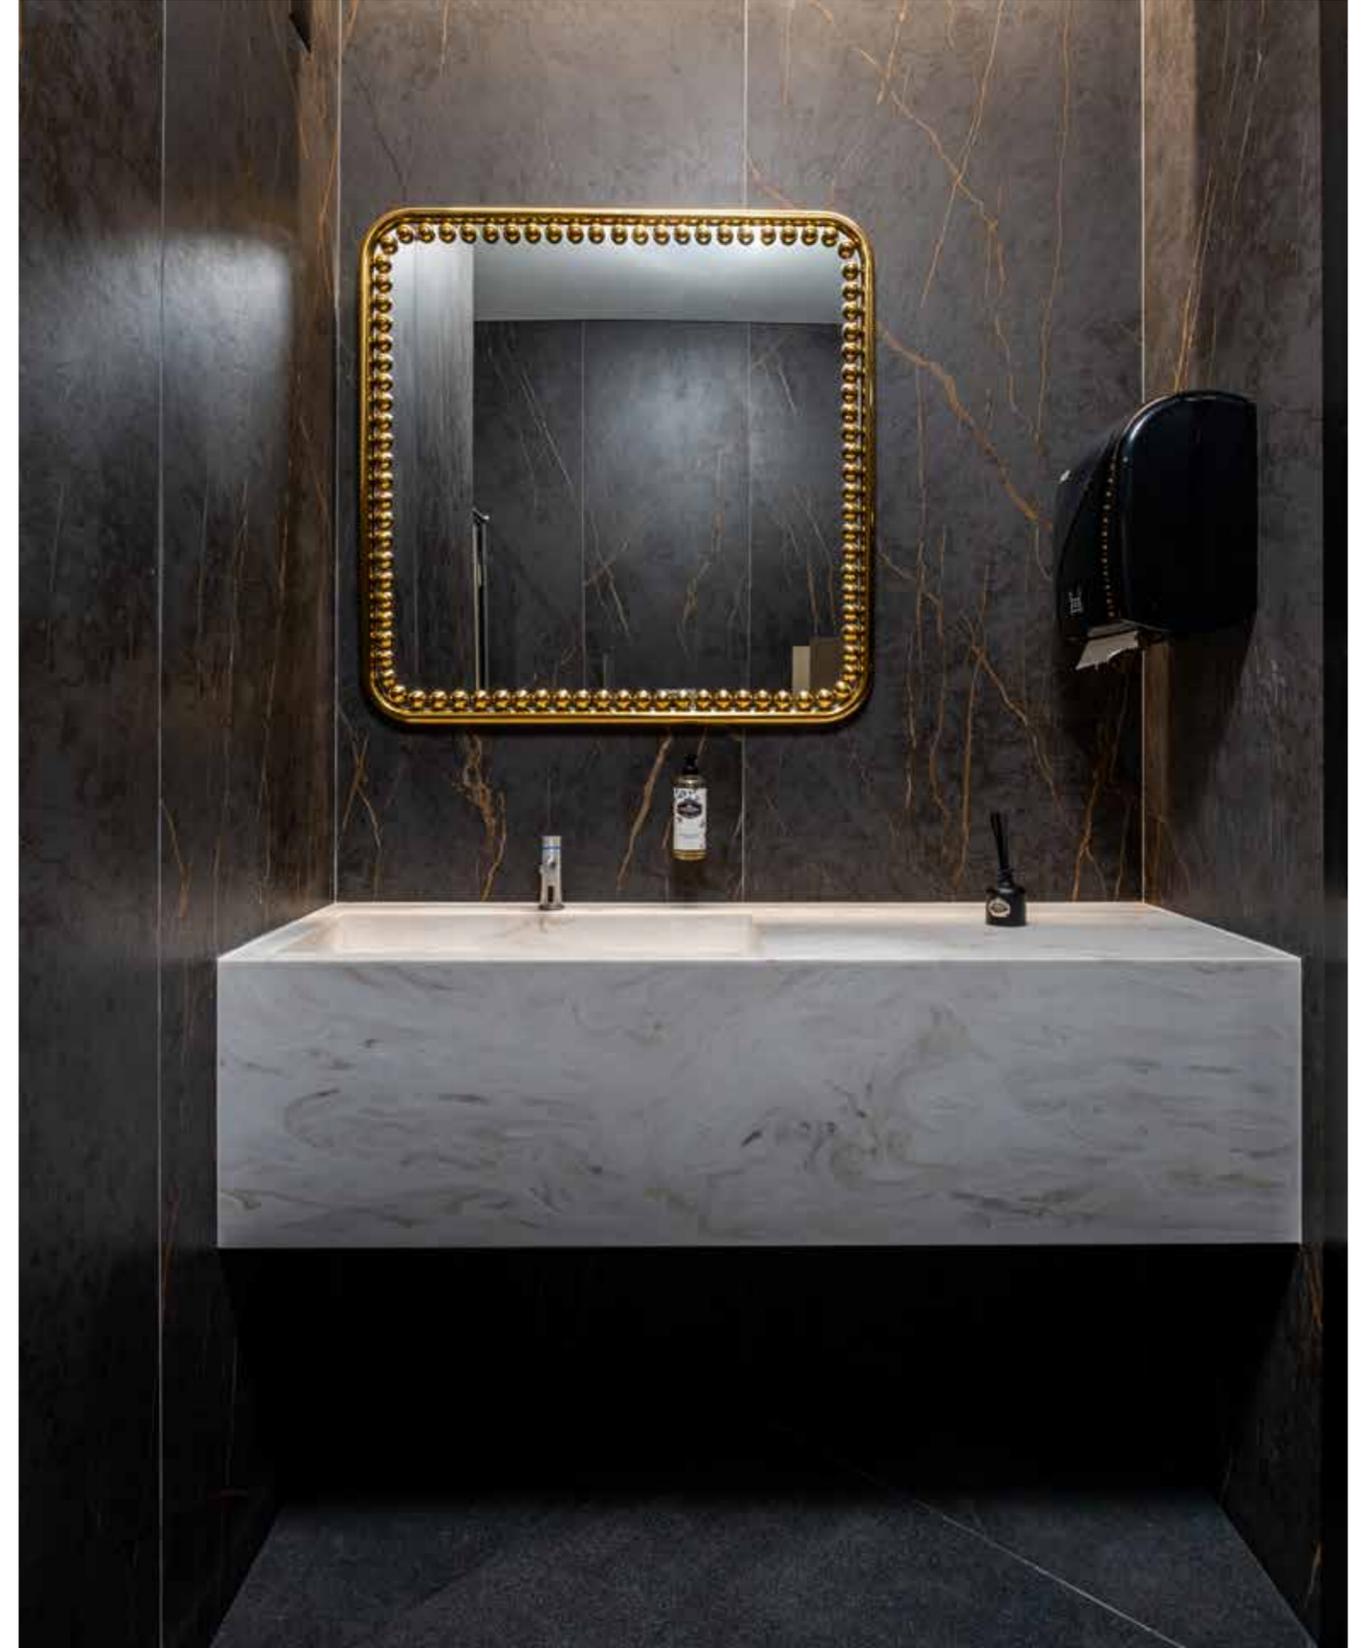

**A project full of versatile spaces and creative solutions**

In terms of materials, the designer also has his own preferences. "Wood and stone are the materials that can never be missing in our projects," they say. And they also show a predilection for Dekton and Silestone. "Because of their similarity with natural products, easy maintenance

and strength, which provide peace of mind to the customer, the choice of Cosentino materials is always present," they say.
