

Quality and Environment Policy

Senior management establishes the company policy in relation to Quality and Environmental Management, and takes the necessary measures to ensure that this policy is understood, implemented and followed at all levels of the organisation.

Cosentino, S.A will communicate the Quality and Environmental Management policy to its employees and make it available to all parties concerned.

Senior management at COSENTINO, a company whose business activities include the:

- Design, Manufacture, Processing, Marketing and Distribution of Quartz Surfaces**
- Design, Manufacture, Processing, Marketing and Distribution of Natural Stone Products**
- Design, Manufacture, Processing, Marketing and Distribution of Ultra-compact Surfaces**
- Design, Manufacture, Processing, Marketing and Distribution of Recycled Surfaces**

Confirms its commitment to Integrated Management by establishing and publishing the following policy for the System:

To strive for the maximum satisfaction of all stakeholders, both internal and external, as a guarantee of continuity for our company, its growth and sustainable development.

To continuously improve of our processes and products within an effective Management System, which helps us to work more efficiently without compromising our sustainable development.

To open up new markets and to grow our presence in existing ones, supporting our approach through Marketing and Research.

To fulfil our own requirements and those of our stakeholders, seeking to inspire loyalty and satisfaction among our interest groups.

To ensure compliance with the legislation and regulations in force that apply to our area of business, pushing for stricter demands to be established therein, as well as the requirements of the market and society.

To consider environmental factors in the planning and development of our business and the goal of continuously optimising and improving the company's performance in its field, promoting the efficient and rational use of resources and adopting procedures to control environmental aspects.

To establish environmental objectives and goals, setting up collaborative programmes in order to achieve this, and thereby continuously improving with regards to environmental performance.

To adopt the necessary measures to prevent the possible contamination of the land, atmosphere or water, incorporating the most suitable management systems for the waste generated to ensure that operations are sustainable and respect the environment.

To promote the involvement and awareness of the workforce in relation to protecting and respecting the environment in order to ensure the success of the Environmental Management System, and our commitment to continuous improvement.

To boost the Company's knowledge and expertise in the areas of Design and Development, anticipating the innovations and technological changes demanded by the market and Environmental Management.

To promote the company brand through our Integrated Management System and research, development and innovation activities.
