Corporate purpose

# Meaningful Design to Inspire People's Lives

## Meaningful

We strive to live in harmony and responsibility with nature and the environment in which we live. To practice a philosophy of life that is coherent and reasonable.

## Design

We live and create spaces with character, pleasant homes and environments for healthy living.

## to Inspire

We inspire and get inspired to create beautiful and functional designs that come to life.

## People's

People are at the heart of our business and we aim to improve their lives and contribute to their well-being.

## Lives

There is only one life and it can be lived in many different ways. That is why our products are designed to adapt to and anticipate the real needs of society.

We are Cosentino

# Certifications

Cosentino is deeply committed to exceeding the needs of our customers and suppliers with respect for the environment through responsible resource management, guaranteeing innovation and continuous improvement of our processes, products, and services globally.

## Cosentino

- ISO 9001

# Cosentino House Builders Guide

The entire Cosentino network is committed to helping you accomplish the key objective of producing satisfied Buyers.

From quality materials and workmanship to home readiness and customer service, our focus is on providing solutions that add value to your Buyers and your homes.

All our products are bound and comply with strict regulations imposed by authorising bodies and our own exacting demands to provide sustainable, ethical, quality products and service.

## Material Availability

Full control over the supply chain. Vertically integrated. From manufacturing to distribution to in some cases, countertop fabrication and installation.

## Clear Pricing and Stability

Colours and price groups tailored to specific projects.

## Quality and on-time Installation

Cosentino has the largest network of trained and certified Fabricators in the country. Products are always in stock and ready to meet production cycles.

## Low Maintenance Products

Cosentino products are virtually maintenance free surfaces.

→ Cosentino City Barcelona / Atelier LAB

## Product Warranty

Silestone and Dekton offer a 25-Year Transferrable Warranty and Sensa a 15-Year Warranty.

## Local Support to Regional Customers

Our large team of Sales Managers can visit all sites to offer full training.

## Added Product Value for your Buyers

Reassures your Buyers with an unexpected level of product protection.

- Creates real differentiation for your homes around the kitchen and bathroom
- Provides your Buyers with a countertop choice that adds more value over regular stone.

## Enhanced Buyer Satisfaction

The entire Cosentino network is committed to helping you accomplish the key objective of producing satisfied Buyers. From quality materials and workmanship to home readiness and customer service, our focus is on providing solutions that add value to your Buyers and your homes.

### Quality Point of Sale Materials

Small and larger samples are available through this programme along with literature designed to educate your Buyers on the features, benefits and overall value of owning Cosentino products. Sample boards can be made to your specific requirements.

### Marketing Support

Programme of free material for show houses is available.

Ask for details.

### Easy Warranty Registration

It's simple to register once for the whole project no matter how large and then hand over the warranty details along with the rest of the new-owner pack to your customer on completion.

### Homeowner Care Program

Reliable service after move-in is essential to a builder who wants to enhance Buyer satisfaction. Dekton, Silestone and Sensa offer a Homeowner Care Program and product warranties. Our entire network of Certified Cosentino Installers are committed to servicing your Buyers and providing reliable service after the sale.

### Product and Process Training

Educating the Buyer on the value of Cosentino brands is also critical to your sales success. To help accomplish this, training is focused on the specific product and installation process. The goal of the training is to equip your staff with the ability to properly present, select, order and care for the chosen product.

### Ensured Availability, Preferred Delivery

On-time completion and homereadiness are important to you and your Buyers. To maintain our installation commitments, our network of approved Fabricators are encouraged to keep a standard line of colours in stock for efficient turnaround.

### Grow Sales with the Leader

With the largest production and stock capacity in the quartz surfacing industry and the largest network of trained, certified quartz surfacing installers, building with Cosentino products means better home readiness for you and your Buyers.

### Certified assurance

All our products are bound and comply with strict regulations imposed by authorising bodies and our own exacting demands to provide sustainable, ethical, quality product and service.

→ Cosentino City Lisboa

Get inspired

→ Cosentino City Barcelona

## COSENTINO CITY

# Cosentino City

Live the Cosentino DNA with a multifunctional space to create connections.

Cosentino puts at your disposal the network of Cosentino Cities in over a dozen cities across the world. They were created as meeting places for inspiration and creativity, for interior designers and architects to find everything they need from Cosentino.

**In our design and inspiration showrooms you will have access to:**

### Personalized Visits

Arrange visits and meetings with your customers to show them Cosentino's innovative surfaces and products in a unique space.

### New digital services

Use our augmented reality digital services to help your clients visualize their projects.

### Experience Zones

A space to experiment with materials, textures, and surface patterns, combining them to create new design possibilities at our Atelier Lab.

### Expert Advice

Finding the right design solution for any type of application, through experimentation and combination of Cosentino's most innovative brands, such as Silestone, Dekton and Sensa by Cosentino.

### Events and Speakers

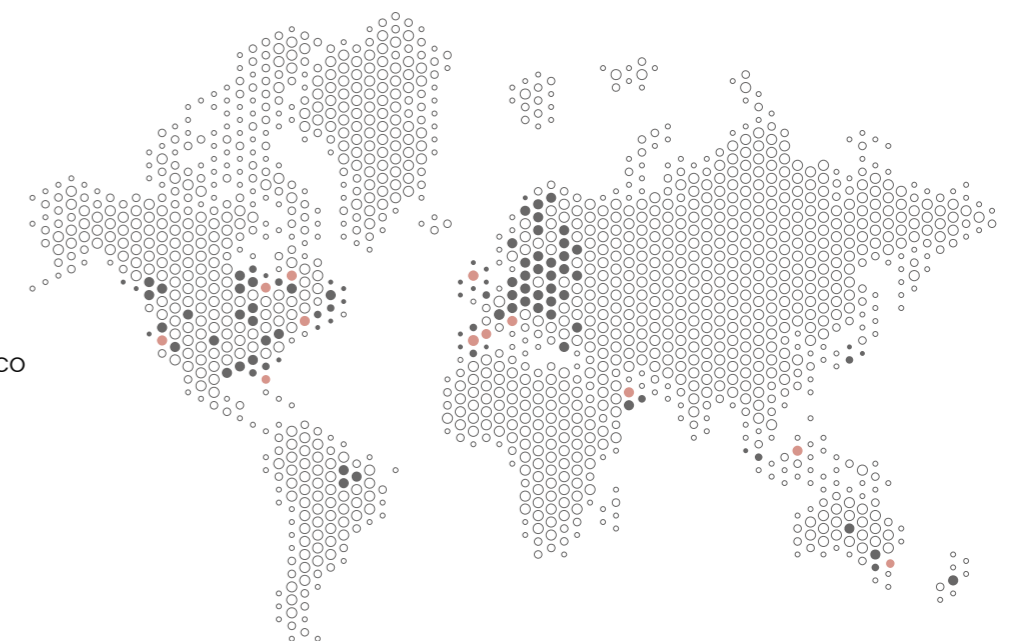

Learn and be inspired by our continuous programs of activities, speakers, and encounters with media specialized on design, architecture, culture, and creativity.

## Digital Slab

Cosentino Digital Slab allows the visualization of all Cosentino products in a giant 4K 80" vertical screen.

This way, you'll be able to see the product closely resembling their original format and visualize hundreds of slabs with the swipe of a finger.

An amazing tool to experience the potential of Cosentino products.

## Atelier Lab

A space to experiment with materials, textures, and surface patterns, combining them to create new design possibilities.

→ Cosentino City Barcelona

## Exhibition of facade system

In our Cities you will experience a selection of the most interesting facades and buildings created by prestigious architects.

The fixation system and projects details can be explored through an interactive screen.

# Sustainability

At Cosentino, we approach sustainability as a collective commitment that stems from the individual involvement of those that are a part of Cosentino.

Our continuous improvement efforts involve constant analysis of our entire value chain - from the acquisition of raw materials to the delivery of the final product of consumers.

We are firmly aligned with the United Nations' 2030 Agenda. As a global leader in the manufacturing and distribution of innovative surfaces from our headquarters in Almería Spain, we are committed to driving the path towards local and global sustainability.

→ Olives in Cosentino industrial park.

→ LED lighting throughout the Cosentino industrial park.

→ Photovoltaic installations at Cosentino

## Energy

Energy efficiency and the use of renewable energy sources are the two key elements of our strategy to minimize the impact of our activities.

100% of our energy consumption comes from renewable energy sources.

On the other hand, the constant improvement of our processes and machinery allows us to reach a high level of energy efficiency, which translates in an 8% decrease of our electrical consumption in our production processes.

## Water

Since our inception, we have valued the importance and understood the challenges of proper water management.

It has motivated us to implement a sustainable use policy maximizing the efficient use of water resources in the different production processes.

We use cutting-edge technology to achieve 99% recycled water in all our processes in the Cosentino Industrial Park.

In addition, we use 100% of the surplus water to irrigate green areas.

## Materials

We are committed to making the most of the materials we work with throughout the value chain.

In recent years we embarked on an ambitious R&D project called "Circularity" to reuse the materials from which we make our products.

Another action is the disruptive Hybriq+® technology that brings about the new generation of Silestone. Hybriq+® incorporates a minimum of 20% recycled materials and is manufactured with 100% renewable energy and 99% recycled water.

# Carbon neutrality: Sustainable design

Cosentino Group considers sustainable development as an essential commitment in the company's growth strategy, with regard to the respect and protection of the environment.

We address aspects related to the efficient use of natural resources, proper waste management, atmospheric emissions, discharges and other potential impacts in order to make sustainable use of natural resources and protect biodiversity and ecosystems.

At Cosentino we are strongly committed to the 2030 Agenda promoted by the United Nations and the Local Action Plan promoted by the Spanish Government.

As a demonstration of our commitment, we have managed to offset the 42,532 tonnes of CO<sub>2</sub> emissions resulting from one year of Dekton production, thus obtaining the Footprint Cradle-to-Grave Labels for the entire product life cycle in 2019 for all Dekton brand products.

In addition, the Sunlit Days series by Silestone is the brand's first collection to achieve this certification.

### We reduce our impact

We are committed to energy efficiency, emissions reduction and sustainable mobility to minimise our impact.

- **Energy efficiency:** it is a priority objective for Cosentino to reduce energy consumption in the production process and in the general group activity, which is why we have managed to obtain 100% of the electricity we use from renewable sources.
- **Emission reduction:** 2.8 million euros have been invested in the implementation of an energy management and monitoring system for the heat systems, which allows heat from the Dekton furnaces to be recovered and used in the dryers, thus reducing emissions.
- **Sustainable mobility:** we have recently joined the 'Plan Sumamos Salud + Economía' under which we have a Mobility Policy that helped us to avoid 230 TCO<sub>2</sub> in 2018.

### We calculate our carbon footprint

It is an external body that verifies the calculation and the results of the carbon footprint that are submitted to the Spanish Ministry for Ecological Transition and Demographic Challenge (MITECO, in Spanish), which is responsible for approving and registering our Footprint, becoming part of the 'Spanish registry of carbon footprint, offsetting and carbon dioxide absorption projects' of the Spanish Climate Change Office (OECC, in Spanish), whose results are made public as an exercise in transparency.

This calculation uses energy and/or fuel consumption data, as well as raw material consumption data collected from all **Group subsidiaries** (Centres, Workshops, Cities, HUBs, HQ, etc.) with a view to offset these emissions.

### CO2 NEUTRAL

#### We offset our emissions

To achieve carbon neutrality in Dekton, at Cosentino **we offset our emissions over the entire product life cycle** (scopes 1+2+3) by investing in GHG emission reduction projects.

For this purpose, we identify those projects that meet the requirements for responsible offsetting and that, in turn, have a strong social dimension that contribute to the achievement of the **Sustainable Development Goals of the UN's 2030 Agenda**.

The project selected to offset the 42,532 tonnes of CO<sub>2</sub> emissions, resulting from one year of Dekton production, has a direct impact on sustainable development by **supporting the local economy, providing training and job opportunities**.

# Dekton

## Innovation applied to design

Dekton is a sophisticated blend of more than 20 minerals extracted from nature. Its production process is the result of years of learning and inspiration in the manufacture of glass, state-of-the-art porcelain and quartz surfaces.

Electron microscopy makes it possible to appreciate the reduced porosity of the material, a consequence of the sintering and ultracompaction process exclusive to Dekton. This reduced porosity and the absence of micro-defects causing stresses or weak points are the distinguishing feature of Dekton.

25  
Year  
Warranty  
DEKTON

→ Countertop and flooring: Dekton VK03 Grigio

→ Countertop, island kitchen and cladding: Dekton TK05 Sabbia/ Countertop and island kitchen: Dekton VK04 Grafite

→ Bath countertop: Dekton Halo  
Cladding: Dekton Slim Zenith  
furniture cladding: Dekton Slim Kreta

## Sintered Particle Technology

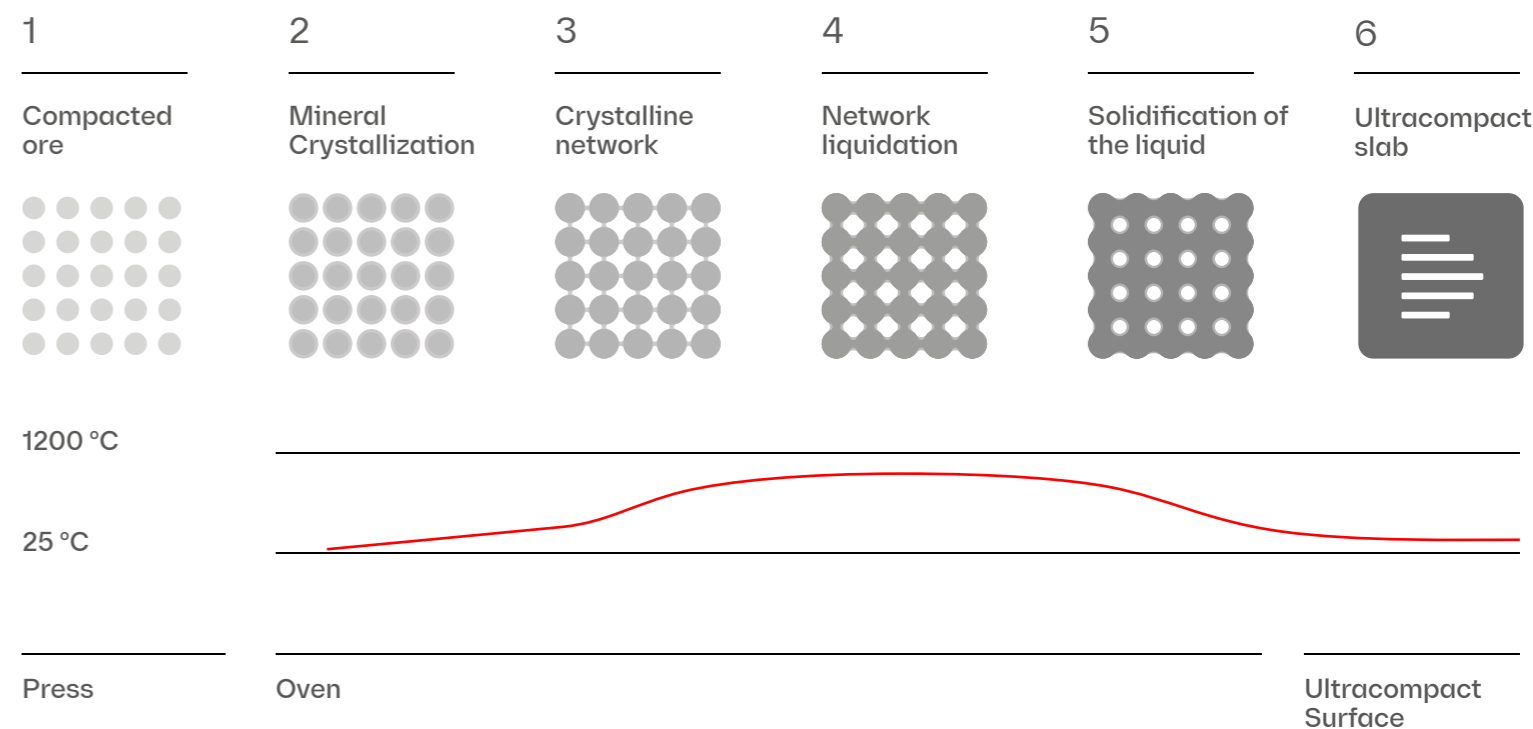

Dekton uses an exclusive SPT in its manufacturing, capable of sintering mineral particles, bonding them together and compacting their internal structure. This innovative technological process mimics and accelerates the processes that natural stone undergoes when exposed to high pressures and temperatures for millennia.

Dekton emulates in a few hours what nature takes millennia to do, thanks to the exclusive SPT technology.

- The furnace has a length of 180 metres.
- Temperatures reach approximately 1250°C.
- Total processing time depends on the thickness of the slab (about 4 hours).

## Safety in facades and cladding

In order to reinforce safety in ventilated facades and interior cladding, there is the possibility of adhering a safety mesh behind the Dekton slab, specially developed to prevent falls due to breakage. It is a 300 g/m<sup>2</sup> fiberglass mesh adhered to the material with epoxy resin. Safety is one of Cosentino's main concerns.

## Dekton Product features

Dekton meets all the technical specifications required in a high-resistance surface to materialize any interior and exterior residential design project.

### Low water absorption

The water absorption of Dekton is negligible; therefore, it does not undergo expansion movements.

### High resistance to UV rays

Dekton is highly resistant to ultraviolet light (UV rays) and will not fade or degrade over time in any outdoor application.

### Superior mechanical strength

The wide variety of Dekton thicknesses allows its use in applications where a high wind or impact resistance are a requirement of the project.

### Dimensional stability

The expansion of Dekton is minimal: the panels can be installed with thin joints. These joints will retain their width under all conditions.

### Freeze and thaw resistance

The resistance that Dekton has demonstrated in durability tests under freezing and thawing situations in various conditions proves its high performance.

### Abrasion resistance

Dekton is even more resistant to abrasion than granite and porcelain, being the ideal surface for facades or floors subjected to high activity in commercial applications.

### Fireproof material

Dekton can withstand the highest temperatures without burning, charring, or cracking. The standard European tests EN 13501 y ASTM E84 qualify the ultracompact surface as non-combustible.

### Durable Colour

The control of pigmentation and decoration in the manufacture of Dekton gives the material better colour uniformity for each slab, resulting in a long-lasting product that does not fade over time.

### Resistant to scratches

Dekton is one of the most scratch resistant surfaces on the market today. It has a rating of seven (7/10) on the Mohs scale of mineral hardness.

### Maximum fire and heat resistance

Dekton has been successfully installed in facades located in areas exposed to high temperatures.

### Easy cleaning and minimal maintenance

It is easy to remove Dekton graffiti with standard cleaning products. Reduced maintenance costs.

### Resistance to stains

Dekton is a material that is resistant to stains from different sources so that they will not be permanent.

## Dekton Formats

Adaptable and versatile. In any space.

Dekton offers a variety of standard sizes, custom sizes and thicknesses to meet the functional and creative needs of the designer in any interior or exterior project, no matter how complex.

### Large format

Optimma Format → 260 x 100 cm  
Large format board → 320 x 144 cm

### Other formats

- 106 x 71 cm
- 142 x 106 cm
- 142 x 142 cm
- 142 x 71 cm
- 142 x 79 cm
- 159 x 142 cm
- 159 x 71 cm
- 71 x 71 cm
- Tailor-made formats

### Thicknesses

- 4 mm
- 8 mm
- 12 mm
- 20 mm
- 30 mm

## Dekton Textures

Different Sensations. Richness of Shades.

Dekton comes in different textures so that the only limit is the architect's or designer's imagination: from the finish ultra-glossy, to matte or velvety textured options.

### XGloss

A luminous and dazzling finish achieved by mechanical polishing, without the need for enamels or other materials.

### Matte

The matte texture pursues a natural, shine-free appearance, ideal for achieving a harmonious and timeless finish. Most Dekton products are manufactured with this finish.

### Velvet

Velvet is Dekton's velvety texture. The materials chosen in Velvet create a feeling of warmth and comfort. This texture is perfect in classic colours, with veins.

### Matte or Textured Velvet

Matte or Textured Velvet textures combine the warmth of velvet with the roughness of a textured, imperfect material. It is ideal for emulating a realistic finish, with the advanced features of Dekton.

# Optimma

## New optimized Dekton format

### The ultimate interior cladding solution

The Dekton slab has been optimized with its most common applications in mind to create a new format with improved cost, design, installation and handling. Introducing our first Optimma family format specifically for cladding:

Optimma format 260 cm x 100 cm x 4 mm.

### 260x 100 cm in 4 mm thickness

The slabs are created in 4mm thickness, which gives it a lightness that allows easy handling, and in case of need, it can be easily cut to adapt the product to all spaces.

### Cost Efficiency

The sizes were optimized to the most common coating standards, this allows us to avoid waste, which in turn reduces price.

### Design with Purpose

The board has been created to take advantage of its total height, which makes it much easier to cut it for cladding.

### Easy to Install

The product is smaller and lighter, which makes it easier to use transport and handling. Cutting can be done with simple tools. The edges are already bevelled and the piece is always meshed.

### Design Match

The design has been conceived to place the boards vertically to create a continuous design.

# Rainfloor

## Shower floor

Solution according to the different design trends in the shower area. Combine Dekton with any evacuation system available on the market: grilles in steel, ABS or covered with Dekton itself. An elegant and quality product to give a touch of distinction to the bathroom.

Dekton Grip/Grip+  
Length from 71 to 159 cm  
Width from 71 to 142 cm

# Dekton Slim Protek

High aesthetic value and performance in vertical cladding and furnishings.

## Minimum Thickness of 4mm → Large Format & Performance

### 01 → Large format and minimum number of joints

Its large format of up to 320 x 144 cm covers large surfaces avoiding as much as possible the number of joints and therefore, dirt.

### 02 → Easy installation

Having such a light format, but with so many possibilities, simplifies everything. Its thin thickness allows for quick cutting and on-site adjustments with ceramic tile tools.

### 03 → Design without limits

Dekton Slim Protek is very easy to work with and can be cut to size. It adapts to all spaces.

### 04 → Maximum resistance to humidity

Dekton Slim Protek is the ideal ultra moisture and stain resistant coating for bathrooms. A high performance product that requires no more maintenance than a simple damp cloth.

**DEKTON® SLIM**  
Designed by COSENTINO

At Cosentino we offer personalised Customer Service. Ask as many questions you like and request all the advice you need to ensure you get exactly what you want out of the new Dekton Slim Protek.

Find your nearest Cosentino Centre at [www.cosentino.com](http://www.cosentino.com)

### 01 → Bathroom Cladding

Maximum resistance against humidity with minimal joints.

### 02 → Kitchen Cladding

Reduced thickness, infinite possibilities

### 03 → Furniture Cladding

Reduced thickness, infinite possibilities

Match your style with Dekton

# Dekton Design Match

There are designs that leave their mark. Veins that run along walls and continue on floors and facades with patterns that would be impossible for a natural stone, but not for Dekton.

## Lineal Match

We present a new concept that includes references of the same colour to create a fluid and continuous atmosphere. Focused on large-area flooring and vertical cladding applications.

A new design conceived to position the slabs vertically. The slab is rotated 180° in each of its iterations, thus creating a continuous and harmonious design.

**Dekton Somnia**  
Available in 4, 8, 12 mm and  
Optimma format 260 x 100 x 0.4 cm

**Dekton Trance**  
Available in 4, 8 and 12 mm thicknesses

**Dekton Marina** NEW  
Available in Optimma format  
260 x 100 x 0,4 cm (LM1, LM2 and LM3)

## Book Match

Based on some of our designs, we have created unique, symmetrical and interchangeable references that allow compositions and designs to be made where the veins have continuity between different pieces.

Each piece has a unique combination of numbers and letters to select the patterns that best suit your needs according to colour and available thicknesses.

Material on request, check availability.

**Dekton Awake**  
Available in 4, 8 and 12 mm thicknesses.

**Dekton Lucid and Morpheus**  
Available in 8, 12 mm and  
Optimma format 260 x 100 x 0.4 cm

Ukiyo: The inner texture

New Collection

Dekton  
Ukiyo

Step into a world where time stands still, and the present moment is all that matters.

Experience the beauty of living textures crafted by nature.

Cosentino x Claudia Afshar

A new Dekton collection designed by Claudia Afshar, inspired by the Japanese concept Ukiyo.

Luxury interior design firm, Claudia Afshar Design, is led by this London-born and Los Angeles-based designer. Alongside her talented team and global projects, Afshar creates extraordinary environments that redefine opulence.

Both brands pay meticulous attention to detail and are focused on providing impeccable craftsmanship. Dekton Ukiyo features colour-filled structured patterns that offer a sensory experience.

The inner texture

Two structured patterns available in five colours specially designed for indoor vertical cladding use. Dekton developed textures in collaboration with the designer Claudia Afshar, creating beautiful and unique spaces.

### Disclaimer

This product is especially designed for indoor vertical cladding use. Do not use as a horizontal surface.

There are limitations for use on exterior cladding as stated in the product's User Manual regarding the general applications of Dekton products. Improper use outside the limitations may result in deterioration of the surface appearance of the product.

Claims related to this deterioration of appearance in applications other than the intended use are not covered by the Cosentino Warranty.

For further information, please refer to the Product Specification and User Manual available from your Cosentino sales representative.

Ukiyo GV3

### Rem

Its intricate design with brown and grey veining and hints of gold reflects the linear structure of Calacatta Lincoln marble.

Stone Dekoded

# New Collection

## Pietra Kode

Introducing Pietra Kode: the Italian stones of yesteryear recoded by Dekton for contemporary architecture and design through three series.

We've decoded the stones that dazzled the architects of yesteryear to meet the needs of modern architecture and design. We decipher their molecular structure to recodify it through the exclusive Dekton technology, improving its attributes and transforming it into a high performance ultracompact stone.

Two thousand years ago, the Roman architect Vitruvio developed three principles that have guided the evolution of architecture until present day.

Reformulated and given a new meaning that meets the demands of architecture and design in the future while keeping the code of shared beauty that has evolved through the centuries, connecting classicism and modernity.

### Pietra Kode is a journey through history, timeless architecture and design.

Research is at the core of what we do. Studying behaviors, understanding the demands of the market and always trying to be one step ahead. The question then became: How do we develop a collection that improves upon nature's masterpieces? How do we capture and reinterpret upon all its glorious imperfections? How do we embark on Pietra Kode?

This journey takes us to Italy. Vicenza, Travertino and Ceppo are at the center of this timeless collection. Stones that makes us travel through space and time. Drawing on the very best nature has to offer, Pietra Kode is a collection engrained in Italian classical architecture, with an eye towards the future, one that fits seamlessly into the codes of contemporary design.

Pietra Kode is a versatile tool in the hands of architects and creatives alike. Facades, flooring, bathrooms, kitchens, furniture and many more applications come to life through Dekton's unmatched performance.

**Daniel Germani**

### Beauty, firmness and utility

Principles which make up the DNA of Dekton. But do these canons of classic beauty make sense today? Are they relevant? What about firmness? Are we faced with new environmental challenges that demand a change in material resistance? What was once useful, is it still? Should it also answer concepts such as sustainability to be truly useful?

**VK01 Nebbia**

A creamy white fine-grained base splashed with warm taupe, this versatile colour is ideal for facades, flooring, and any interior or exterior cladding project. It reinterprets the texture of Grigio Alpi, a type of Vicenza stone with macrofossils that has been quarried in Italy since Roman times. Its design makes it especially suited for applications that require continuity in design and edges.

**VK03 Grigio**

A dance of gray shades with warm accents, it perfectly combines with cream and taupe tones as well as woods. VK03 Grigio is inspired by Grigio Alpi stone, a type of Vicenza with macrofossils made popular by Renaissance architect Andrea Palladio, who used it in villas and palaces in the region of Vicenza. Its design makes it especially suited for applications that require continuity in design and edges.

**VK02 Avorio**

In ancient times, silver was considered a gift of nature created by the influence of the moon. This legend lives on in Argentium, a perfect matt grey that can be combined with both warm and cold atmospheres. Its trowelled structure, typical of lime plastering, provides an overwhelming personality to the series.

**VK04 Grafite**

Its dark base, which intermingles black and gray tones and presents cloud-shaped whitish and reddish patches reinterprets the texture of dark, fine-grained limestone. Its design makes it especially suited for applications that require continuity in design and edges.

**TK05 Sabbia**

The veins reinterpret Italian Travertine run through each piece in perfect chaos, filling it with nuances. This attractive chromatic recodification of natural stone maximizes the strength and design of the original, dotting incomparable beauty and resistance, perfect for rustic or natural environments.

**GK07 Ceppo**

The characteristic multiform structure and gray/blue tones of Italian Ceppo di Gré inspire this unique colour. Ideal for both interior and exterior spaces, its atemporal design makes it a perfect choice for classic or modern designs.

**TK06 Marmorio**

It is the quintessential Roman stone. Its porous striped structure gives an elegant, bright and lightweight look to any design and takes its inspiration from Travertino Navona, a natural stone quarried near Tivoli, east of Rome.

# Silestone

The new mineral  
hybriq surface

Silestone is a low-silica mineral surface composed of premium minerals and recycled materials, powered by the revolutionary Hybriq+® technology.

## Silestone advantages

Silestone is extremely durable in kitchens, bathrooms and other spaces exposed to constant activity and use. In addition, it offers an unlimited range of colours and textures.

Silestone has many advantages, including minimal maintenance, high resistance to stains and scratches, and a low fluid absorption rate. This resistance to fluids and its minimal joints make Silestone the ideal solution for places where liquids are present. Silestone is resistant and allows for prolonged enjoyment over time, beyond what is expected.

The properties of Silestone are the result of constant years of innovation that guarantee maximum hygiene and safety.

25 year  
warranty

silestone

### Acid and Scratch Resistant

Silestone has a high level of scratch and scuff resistance, impacts, as well as to external aggressions and acids common in daily kitchen use.

### Impact Resistant

The high impact resistance of Silestone allows the handling of hard objects (pots, pans, trays, etc.) with total peace of mind.

### Stain Resistance

Silestone is a non-porous surface that is highly resistant to stains from coffee, wine, lemon juice, oil, vinegar, makeup and many other everyday products.

## Silestone Formats

Infinite possibilities for indoor applications.

Silestone is available in slabs up to 327 x 159 cm and in 30 x 30 cm, 40 x 40 cm, 60 x 60 cm, 60 x 30 cm and 60x40cm tiles. They are marketed in thicknesses of 12, 20 and 30 mm. In addition, different pieces can be combined to simulate thicker edges.

### Large format

Jumbo Boards → 327 x 159 cm  
Standard Boards → 306 x 140 cm

### Jumbo Slabs

Cosentino offers Silestone slabs in Jumbo format (327 x 159 cm max.). This format allows for the creation of large surfaces with minimal jointing, design versatility, and better hygiene. This way, the slabs' use is optimized and waste minimized.

### Floor format

- 30 x 30 cm
- 40 x 40 cm
- 60 x 60 cm
- 60 x 30 cm
- 60 x 40 cm
- Tailor-made formats

### Thicknesses

- 12 mm
- 20 mm
- 30 mm
- Customised thicknesses by adding different pieces together

## Silestone Textures

Surface sensory perception.

In order to adapt to all styles, Silestone offers different textures for any of its applications. Polished, Suede or Volcano are three possibilities that make your imagination fly and have the countertops, floors or walls with the texture you have always wanted.

### Polished

Extreme gloss, smooth surface to the touch and uniform, intense and consistent colour.

### Suede

A matte appearance that conveys a unique experience to the touch for its beauty and fineness.

### Volcano

Rustic and rough texture, at the same time attractive, soft and pleasant to the touch.

Earthic is more than just a surface

New Collection

**EARTHIC**<sup>®</sup>

BY SILESTONE XM X FORMAFANTASMA

Earthic is not just a product, it is a Cosentino research project on materials and sustainability in collaboration with the iconic studio Formafantasma.

Earthic is a sustainable surface with a maximum of 10% silica, created with an innovative composition and complex production process that is the product of years of R&D. It utilizes a selection of premium minerals, recycled glass, PET, bioresin, and Dekton fragments to reduce the extraction of raw materials, limiting soil erosion and CO<sub>2</sub> emissions. Additionally, it's manufactured with 99% recycled water and 100% certified renewable electric energy.

Earthic incorporates up to 30% recycled components into its eco-conscious surfaces.

**EARTHIC X FORMAFANTASMA**

Formafantasma is a research-based design studio investigating the ecological, historical, political and social forces shaping the design discipline today.

Cosentino has partnered with design visionaries, Formafantasma, to craft a new collection that explores innovative and sustainable material sources.

Formafantasma brings forward a new approach to surface design.

# FFROM

DESIGNED BY  
FORMAFANTASMA.

A collection that reflects the material's origin and sourcing as well as the process of transforming recycled materials into something new.

## FFROM 01

A gray surface speckled with white recycled PET fragments creating a subtle yet intricate pattern that draws the eye and adds depth to its composition.

→ Flooring Silestone XM FFROM 03 / Cladding Silestone XM FFROM 01

**FFROM 02**

A darker tone of gray elegantly punctuated with white accents, creating a visually attractive contrast. A shade of gray with a sense of modernity and minimalism.

**FFROM 03**

A mesmerizing yet elegant and antracite background with recycled PET scales scattered across the surface resembles the night sky or a geological specimen.

→ Kitchen island, countertop, cladding and table Silestone XM FFROM 03

# RAW

DESIGNED BY  
COSENTINO STUDIO.

Patterns and colors that capture the material essence in its most authentic state, combined with shapes that express a new aesthetic.

→ Silestone XM RAW G

## RAW A

A color endowed with a soft dark veined pattern over a white background that reveals an intricate design evoking a sense of natural elegance, reminiscent of refined stones found in nature.

→ Kitchen island, countertop and cladding Silestone XM RAW A

**RAW D**

A dark natural rock backdrop provides a mood of tranquility and solid elegance. Diffused streaks of bronze weaves through a charcoal landscape.

**RAW G**

A serene and natural concrete canvas with subtle copper touches intertwined with nebulous veins that add a sense of fluidity.

Veined Patterns. Reborn.

New Collection  
**Le Chic**

Le Chic is a unique collection that redefines a timeless classic. A step forward in veined-patterned surfacing. Emblematic natural stone-inspired aesthetics that bring to life the charm of iconic Parisian & Victorian spaces.

The Silestone Le Chic Collection revisits classic shades through a modern interpretation. New distinctive colours portray a sense of timeless allure with a hint of nostalgia.

Refinement and elegance are recaptured with expressive veins and metallic accents through craftsmanship and innovation. Cream and rich-coloured backgrounds create patterns full of depth.

Discover the collection.  
Embrace Le Chic living.

silestone<sup>XM</sup>  
**LE CHIC**  
COLLECTION

**Eclectic Pearl**

A silver desert infused with light

Flowing streams of delicate tones incrustated with grains like diamonds on jewelry. Eclectic Pearl hypnotizes with delicate veining, texture, and metallic accents across the whole surface.

### Versailles Ivory

Golden veins with majestic character

Versailles Ivory is the warmest tone of the collection. Very subtle two-toned marbling in the background, with gradient effects mesmerize with the flickering lights of its golden sparkle.

→ Kitchen island and table top Silestone XM Eclectic Pearl

**Victorian Silver**

Evocative patterns of pearly rivers

Soft and subtle two-toned marbling in the background, with gradient effects and great depth. The cool background tone blends with its silver and dark gray veins to create an elegant colour that fits seamlessly with warm and cold tones.

**Parisien Bleu**

Reminiscent of the City of Lights

Parisien Blue boasts a deep bluish tone with strong personality and powerful character. Inspired by the shades seen in famous Imperial Roman stones, combined with fine veins in ochre tones.

### Bohemian Flame

A blazing touch of coppery glitter

Bohemian Flame presents subtle sinuous veins with metallic inlays in copper shades. It is inspired by the movement of the golden flows of lava that generate scars on volcanic soil. It is reminiscent of the calmly moving golden flame of candles accentuating tiny metallic pieces.

### Romantic Ash

Deep crystal and silver particles in motion

Large rivers and incrustations of grains in various sizes awaken memories of a milky way visible on a clear starry sky. The accent of blue strengthens the depth of Romantic Ash.

# Sensa

by Cosentino

SENSA  
15  
YEARS  
WARRANTY

SENSA  
by COSENTINO®

## Protected Natural Stone

Sensa by Cosentino is premium maintenance-free natural stone brought to you by Cosentino, a world leader in the natural stone industry.

Sensa by Cosentino is treated with a revolutionary stain protection treatment called SenGuard, and comes with a 15-year stain warranty.

→ Kitchen island, countertop and cladding: Sensa Platino

## Treatment

The long-lasting, chemically-integrating technology allows the material to breathe. This technology enhances its powerful properties.

The process alters the surface tension of the stone causing the material itself to prevent liquids such as water, coffee or oil from penetrating.

SENSA  
by COSENTINO®

Normal

→ Countertop and sink: Sensa Vancouver  
Shower cladding: Sensa Siberia

## Applications

### Sensa kitchen countertops. Natura, stain-proof beauty

Enjoy the design, hardness and resistance of natural stone without fear of stains. Sensa by Cosentino quartzites and granites feature a revolutionary stain-resistant treatment that protects them for the life of your countertop.

## Textures

### Unique shapes for unrepeatable surfaces

The colours and textures of Sensa by Cosentino have the patient and whimsical design of nature. Each of the seven available shades has a texture that produces different effects and sensations: suede, polished or caresse.

# Living rooms

The living room is transformed into a personal and timeless space with Cosentino surfaces; an expression of sophistication and functionality.

Live your space

## Rediscover your home's living space

An integrated solution  
with maximum versatility  
and functionality

Endless personalization  
possibilities

## Limitless customization

Designing a living room with high aesthetic value requires versatile surfaces in a variety of colours, textures, and unique chromatic patterns, such as Dekton and Silestone, which will cover floors, furnitures, cladding, and more, to create an integrated and differential interior design experience.

## Resistance to high traffic

Dekton es una superficie innovadora con un alto nivel de resistencia, capaz de soportar altas temperaturas, rayos ultravioleta y cualquier arañazo. Permanece inalterable ante el desgaste y la abrasión, como resultado del alto tránsito diario de una estancia como el salón.

## Easy installation

Dekton is offered in a Slim format which is light, easy to cut, and adaptable to every space. Its thin thickness of 4 mm allows adjustments to be made during installation, using tools for ceramic tiles.

## Comprehensive solution

The same material for flooring, cladding, and furniture created visual continuity and high aesthetic impact, unifying spaces and increasing their functionality.

## New Dekton Optomma Format

Dekton has been optimized for interior cladding. The Optomma format (260 cm x 100 cm x 4 mm) allows for cost efficiencies, more design possibilities and easy installation and manipulation. The results: impactful cladding and integrated spaces.

## Large format, minimal joints

Dekton Slim's large format up to 320 x 144 cm and thickness of 4 mm allows you to cover large surfaces creating a continuous and homogeneous aesthetic for cladding and furniture. This size reduces the number of joints, easing cleaning and maintenance.

Live your space

## 01/ Living Space

Spaciousness,  
brightness and  
visual continuity

**A single flooring material  
for the whole house**

Goal: to create an attractive continuous  
canvass, without joints, that adds visual unity  
and highlights the greenery and furniture of  
the space.

To achieve this, *Silestone White Zeus* has been  
used, which provides continuity throughout  
the home. The walls and interior woodwork,  
also in the same white colour, help to create a  
bright, calm and balanced space.

## Continuous spaces all in the same material

The pure white of the Silestone flooring contrasts with the warmth of some of the wooden furniture, such as this sideboard and the dining table.

A clean, neutral background highlights the artwork in this loft and the greenery of the home. A beautiful yet practical solution that will stand the test of time.

## Set of horizontal planes

As this is an open-plan area with a split-level living room, the use of the same flooring material, combined with the appropriate use of glass, provides harmony and balance to the space.

→ Flooring  
Silestone White Zeus

## 02/ Living Space

High-rise city  
apartment

### A modern, functional grey canvas

In this city apartment, the interior designer has opted for a light grey **Dekton Keon** cladding in a large square format. The choice of this material is perfect for making the space look bigger and giving it visual continuity.

The grey flooring goes well with the industrial-style furniture and the fabrics of the sofa. All in all, a simple design that will stand the test of time.

→ Flooring  
Dekton Keon

### Tropical wood on a large-format grey background

The coldness of grey and white is balanced by subtle hints of reddish wood in the dining table and chairs, the floor lamp and the sofa legs.

The choice of Dekton Keon flooring is perfect for this practical and stylish city apartment.

## 03/ Living Space

Materials with  
character for  
an eclectic home

### Grey veining is on trend

The vision for this very distinctive home was clear: the owner was looking for a vibrant material with uniqueness so that each piece would be different. Although large-format Dekton Kreta slabs are used to create a continuous space, Dekton Bergen was chosen for the countertop and the side cladding of the furniture, with its grey veining giving a sense of movement.

The same material can be found in the staircase and the skirting board, bringing together the different spaces.

→ Flooring  
Dekton Kreta

## Matte texture

Dekton embraces a velvety texture. The matte finish provides a flat, non-rough surface, which conveys a unique soft and pleasant feel.

Large format Dekton Bento is an ideal solution for flooring in open-plan spaces. It brings visual continuity, neatness and a neutral decoration to combine, as in this case, with wooden wall panelling or white lacquered interior woodwork.

→ Flooring  
by Dekton Bento

## 04/ Living Space

Sophistication  
and mid-  
century style

**Dekton Danae  
throughout the home**

For a classic look, the interior designer for this home opted for designer items such as lamps, armchairs and chairs.

Dekton Danae, a surface inspired by traditional travertine, helps to blend all the spaces and helps to make the furniture stand out.

Thanks to its large format, the result is a continuous floor in a cream, bright and matte tone with hardly any joints.

**A format for every space**

The designer of this home has used large-format Dekton Dance slabs for flooring. This creates a very neutral and uncluttered effect, helping to highlight the designer furniture, such as the Barcelona chair.

The staircase allows for a different format, giving the impression of floating in space.

→ Flooring  
Dekton Dance

## 05/ Living Space

Cladding to  
connect space

**Colour depth and  
fine veining**

Silestone Charcoal Soapstone was selected for the wall cladding of the living room, the island and the kitchen fronts. With its fine white veining, it creates an elegant colour contrast to the ensemble.

## Wall cladding for a niche

The versatility of Silestone allows the slabs to be cut to the desired size and to suit every need. This project features a TV niche, using a

different type of cladding and its own lighting, helping to create a contrast.

A further advantage of Dekton and Silestone wall cladding is that the designer does not need to fit a skirting board.

→ Wall cladding  
Silestone Charcoal Soapstone

## Simplicity and elegance

The combination of these two white and dark grey veined materials results in a simple and elegant look. Wooden pieces of furniture, hemp rope and a set of candles add some warmth to the space.

# Cosentino Bathrooms

Cosentino helps you to rediscover your bathroom through a unique and integrated design concept.

Bathroom Space

Reimagine the most personal space in the home. Create a unique experience in which the most beautiful and functional Cosentino surfaces transform unique, warm, and exclusive spaces.

From wall and floor claddings in different yet perfectly balanced formats, colours and textures, to attractive vanities and shower trays, carefully designed with great attention to detail and simplicity.

Solutions of great aesthetic and functional value to suit every requirement and style of bathroom, which redefine the way in which we experience such a personal space and feeling of well-being.

## Large format

Large format, minimal joints. Tailor-made floors and wall cladding.

Bathrooms are exposed to constant activity. Using a high-quality surface for floors and cladding reduces joints and guarantees hygiene and cleanliness. The strategically placed slabs in XXL make the room look bigger, creating the sensation of a larger bathroom.

## Shower Trays

Shower trays with Dekton Grip/ Grip+ and Silestone: exclusive and integrated designs in the bathroom with limitless customization possibilities.

Cosentino offers an extensive collection of shower trays in the material the architect or designer chooses and adaptable to any space. It is an interesting alternative to the traditional shower that simplifies installation and assembly.

## Sinks

Sinks and countertops with great versatility that adapt to any space. Sophisticated designs with maximum beauty and durability.

Silestone sinks are built with a unique and innovative design able to live up to the most demanding creative proposals. From sinks that integrate into the countertop, to above-countertop options, double bowls...everything is possible with tailor-made fabrication.

## Optimma Format

Dekton Optimma Format. Optimized for interior bathroom cladding: taking full advantage of the space, easy installation, and design continuity in a vertical format.

The Optimma slab format is 260 x 100 cm and 4 mm thick, able to meet any vertical cladding need creating a continuous design, taking advantage of the full height with easy installation and minimum waste.

## Total Integration

Total aesthetic integration and visual continuity. The same material for your entire bathroom: floor, cladding, shower tray, and vanity.

A single surface applied to every component of the bathroom allows for complete esthetic homogeneity, creating harmony, balance, and amplitude.

## Colours and textures

New collections of innovative, on trend colours and textures, to create bathroom spaces full of originality and impact.

Innovative Silestone and Dekton surfaces possess a wide variety of solid and veined colours, unique chromatic pantones, and sensory textures to rediscover bathroom spaces.

## 01/ Bathroom Space

In this bathroom with a pure design and straight lines, natural light takes on a material dimension.

The play of light and shadow accentuates the contrast created by the subtle combination of two very similar, but at the same time very different Dekton colours: VK03 Grigio, a colour inspired by Grigio Alpi natural stone, and VK04 Grafite, a colour that reinterprets dark limestones.

The difference in colour between these two shades of grey helps to create contrasts between light and dark full of intentionality, as in the lintels of the window arches or in the transition space between the water area and the bedroom. VK04 Grafite also helps to accentuate the powerful beauty of the Reflection washbasin by enclosing it in a monolithic pedestal with a free-standing tap.

The almost zero porosity of Dekton ensures that this design will remain unaltered over time. The same applies to the Exelis shower tray, which is made from Silestone.

## 02/ Bathroom Space

A spacious and practical bathroom that is dressed with elegance and minimalism.

Light tones predominate in this space, in counterpoint with some dark-colored elements, thus creating a harmonious and unique combination.

Silestone Eclectic Pearl, applied to walls, countertops and Simplicity washbasins, features a cream background and delicate silver veins.

This design is part of the brand's latest collection, Le Chic, which aims to revive marbled patterns, providing bright touches. The shower tray is also one of the models from the Silestone Kador Suite bathroom collection completely adapted to the rest of the space.

## 03/ Bathroom Space

Inspired by the timeless beauty of Travertine marble, this bathroom reinterprets the concept of Roman baths to create a modern space with relaxed lines.

③

④

TK05 Sabbia was also used for the Silence washbasin, achieving total integration, while the simplicity of Silestone Exelis was chosen for the shower tray.

Thanks to the use of two totally different patterns based on the same stone, the sense of spaciousness is enhanced.

The colour chosen for the walls was Dekton TK06 Marmorio, a recoding of Travertino Navona, the stone out of which ancient Rome was built. Its distinctive parallel lines add solemnity to the whole.

As for the flooring and washbasin area, the colour chosen was Dekton TK05 Sabbia, a stylised version of Travertine characterised by a strong horizontality and veining that maximises the expressiveness of natural stone while giving it the highest performance of ultra-compact stone.

## 04/ Bathroom Space

Industrial  
Style

Industrial style  
and sophisticated  
touches: a bathroom  
to enjoy functionally  
and aesthetically.

With dark colors in all its applications, this space has Silestone in the wall covering, countertop and sink. Bohemian Flame, one of the designs from the brand's latest collection, designed to redefine timeless classics, is chosen for the creation of this uniquely designed bathroom.

The veins that intersect the dark background are inspired by the movement of golden lava flows that create scars in the volcanic soil.

The flooring, for its part, has been covered with Sirius, one of the dark classics of the ultra-compact Dekton stone.

The shower tray installed is the Silestone Wakka Brim model and the washbasin is Silestone Armony. Both complete an environment that demonstrates the versatility and visual continuity of all Cosentino products.

# 05/ Bathroom Space

The simplicity of Vicenza stone and the purity of Dekton's large format design come together in VK03 Grigio and VK01 Nebbia.

Both contribute to creating a Japandi-style bathroom where the warmth of the rich taupe grey range of VK03 Grigio combines with the wooden elements and creates a contrast with the creamy base dotted with spots of VK01 Nebbia, the colour used for the countertop and the integrated Dekton Silence washbasin. The shower tray features the Exelis model by Silestone, in large format. This surface has very low porosity, which reduces daily maintenance and improves hygiene in the bathroom.

## 06/ Bathroom Space

A combination of black and white dominates this urban style bathroom with city views.

The elegance in this bathroom comes from the elevated design pieces used, such as the golden taps, the black freestanding bathtub and the striking front vanity unit supporting the geometrically shaped Dekton Silence washbasins.

These elements create a dialogue with the contemporary feel of Dekton Neural, whose design provides a strong sense of continuity. Its fine, pale veins run through its marbled background in light cream tones, creating an enveloping effect.

①

②

To create contrast and separate the different spaces, the walls of the shower area - which features a [Silestone Exelis](#) shower tray -, are clad in [Dekton Somnia](#), a black colour with brown and white veins.

## 07/ Bathroom Space

The stone that has shaped contemporary Milan has become one of the main trends in decoration.

Both residential and commercial spaces surrender to the beauty of Ceppo di Gré, whose whimsical structure features large, attractive grey and blue patches.

The new GK07 Ceppo redefines this beautiful pattern to give it greater visual strength and the technical features of the ultra-compact Dekton stone. Large format slabs allow for a more seamless design, with fewer joints.

This finish, used on floors and skirting boards, is combined with VK04 Grafite, another of the colours from Dekton's new collection, Pietra Kode. To create a contrast with the stone tones, two Silestone designs were chosen: the shower tray features the Exelis model; while the Marie TOP L was the model chosen for the countertop washbasin.

- 4→ Shower tray  
Silestone Exelis

## 08/ Bathroom Space

The updated classic style of this luxurious bathroom is expressed in every detail.

The use of light, neutral colours, contemporary touches such as black taps and a sophisticated texture inspired by natural stone create a space that exudes a quiet elegance. To maximise the light, the surfaces, furniture and Marie TOP L washbasins feature light colours.

Used on the washbasin area, floor and walls, Dekton Awake shines in its own light and elevates the tone of the entire room. Its design inspired by Paonazzo stone gives an elevated look with its thick veins in shades of light grey, terracotta cream and subtle blues. To define the wet area, such as the bathtub and shower floor – perfectly integrated thanks to the use of Dekton Rainfloor –, the colour chosen was Dekton Nacre, a more neutral tone that contributes to creating a more relaxed space.

# Cosentino Exterior Spaces

Redesign your  
outdoor spaces to  
include porches and  
terraces that blend  
in with your home.

Exterior Space

## Customization without limits

Open spaces with freedom for inspiring, designing with a unique purpose: personalizing your outdoors spaces

## Easy installation

Dekton is very lightweight, easy-to-cut and adaptable format.

## Resistance to high traffic

It is unaffected by wear and tear typical in high-traffic areas such as living rooms.

## Dekton outdoor countertop

Dekton outdoor countertop is resistant and durable. Innovative surfaces turn into functional and beautiful countertops.

## 01/ Exterior Space

Redesign your outdoor spaces to include porches and terraces that blend in with your home

### Beautifully continuous and durable outdoor spaces

Outdoor areas such as porches, terraces or gardens have become the most precious spaces of the home. In the past, outdoor materials required annual maintenance and often lacked proper care. In addition to this, there was always a visible gap between indoor and outdoor flooring.

Dekton redefines the experience of enjoying outdoor spaces by creating uninterrupted floors that continue inside. The exterior and interior become continuous, with almost no joints or maintenance, and will remain unaltered over time.

→ Flooring  
Dekton Aeris

Dekton Blanc Concrete is a material from the Tech Collection that features an interesting combination of beige and grey with a concrete-inspired look. It works very well on outdoor floors thanks to its 320 x 144 cm format. It can be fitted to a staircase, swimming pool, outside covered area, etc., and it can continue inside the home.

Dekton Grip+ prevents slipping in outdoor areas when walking barefoot. In addition, it is highly resistant to stains, UV rays and temperature changes

### Outdoor spaces with a concrete look

A large-format natural foundation connects the porch or terrace with the living room; the material has the look and feel of concrete, but without its disadvantages – the end result is spectacular! The designer can find all these advantages in Tech and Industrial collections by Dekton.

## 02/ Exterior Space

Sand and white  
expanses with  
Mediterranean  
character

### Visual continuity

In this project, the architect designed a Mediterranean and up to date house with cubic volumes and modern floor plans.

The Mediterranean style can be seen in the white walls, reminiscent of the whitewashed houses of southern Spain, and in the continuous large-format floor that evokes the seaside. A warm, durable and practical material that connects the terrace, porch and bathroom spaces.

→ Flooring  
Dekton Danae

**The warmth of Dekton Danae**

Dekton Danae from Natural Collection is a timeless material that blends perfectly into any space. Its limestone beige tone is reminiscent of sand.

It is available in 320 x 144 cm format, making it the perfect choice for flooring.

There are 5 thicknesses (4, 8, 12, 20 and 30 mm); ideal for countertops, furniture and wall cladding both indoors and outdoors.

## 03/ Exterior Space

Inspiring outdoor spaces that associate with local materials

### Functionality with a rustic touch

In this porch and garden project, the interior designer has renovated a house with practical and technologically efficient materials. This stylish renovation includes the use of [Dekton Kreta](#) for the flooring and the replacement of the original windows with large glass windows.

These modern finishes fit perfectly with the stone masonry walls, terracotta pots and rattan chairs – all traditional materials with a rustic touch.

→ Flooring  
Dekton Kreta

**Floor and large-format table with the same code: Dekton Kreta**

Dekton Kreta was selected for the outdoor flooring of this house, a grey part of the Industrial Collection that mimics cement.

Even though it is available in 320 x 144 cm format, the designer opted for a more reduced format to leave visible joints reminiscent of a checkerboard

The same material was used to create the large 4 meter table, which created a monolithic, robust, and potent effect.

## 04/ Exterior Space

XXL format for  
large surfaces  
which stand out  
in your home

**Porch and terrace  
in a single finish**

One of the challenges of this project was to successfully integrate the outdoor space with the rest of the house.

To do this, Dekton Dance 320 x 144 cm slabs have been laid vertically with continuous joints that are barely visible.

The use of the large format in this layout gives a sense of depth, welcoming you into the home while connecting the outdoor and indoor spaces.

→ Flooring  
Dekton Danae

### Endless possibilities in any outdoor space

In addition to the unique properties of the material that make it ideal for outdoor applications, the different beige shades of Dekton Danae also make it a very beautiful choice.

The large-format flooring on the two floors of the house connect and blend both spaces seamlessly with an elegant and timeless visual appearance.

## 05/ Exterior Space

A kitchen with character  
that breathes fresh air

### Black and sandy tones

When working in such a beautiful environment, surrounded by water and greenery, a designer should go for simple shapes and honest materials so as not to compete with the landscape. This is the case of this outdoor kitchen, "hanging" over a white sandy wetland and roofed with bamboo canes. The chosen materials -concrete for the structure of the bar, table and bench, and Dekton Kelya for all the countertops- offer a raw, stark and elegant finish, without pretension.

The colour palette ranges from earth to black tones so as not to outshine the greenish blue of the wetland. The result is an outdoor kitchen with barbecue, very attractive and with excellent performance to withstand the sun's rays and temperature changes typical of the outdoors.

### Countertop and extra large table

The focal point of the project is the extraordinary countertop in Dekton Kelya, with large dimensions and a 10cm strip. This countertop connects the cooking and dining areas, creating a social space to share and enjoy while cooking. A brutalist and functional style that responds to the demands of a client who loves cooking without renouncing the beauty of a finish like Kelya.

→ Dekton Kelya

# Cosentino Kitchens

Reinventing the  
kitchen to make it the  
heart of the home.

Kitchen Space

It's been a long time since the kitchen was a forgotten room in the darkest part of the house. The kitchen is now a key space that can integrate with the living-dining room and share the same design.

## Integration within the space

The kitchen as a living space connected to the rest of the house. Total integration of the countertop with the living room cladding or floor

## Kitchen countertop and island

Thousands of households all over the world have trusted Cosentino to provide them with a kitchen that is not only functional and beautiful, but also plays a key role in the daily lives of their families. We offer a wide range of colours and textures, so you're sure to find your perfect countertop.

## Kitchen flooring and cladding

In this so-called "reconversion" process, the island plays a major role, as it serves as a connecting element between the two environments as well as a meeting place in the home. In this project, the interior designer built the entire design around the island.

## Kitchen sinks

The sink is a crucial feature within the room: it must guarantee resilience, safety, and hygiene. At Cosentino we use a low-porosity material which can withstand impact, high temperatures, and frequent exposure to water and grease.

### Find your style: colours that combine with everything

For choosing the textures and colours that could fit better with your kitchen, it is key that you know the designs available. Maximise it with the unlimited variety of materials, formats and colours that Cosentino offers you.

# Silestone Integrity Sinks

## Full array of products

Without joints, cracks, or limits. Integrity wants to unite your kitchen with surfaces don't have an ending or beginning. Integrity brings a sense of unity and perfect integration with the rest of the elements on your countertop. A single piece available in a range of Silestone colours, so your kitchen is endless.

Silestone Integrity offers all the features include that has made of Silestone the best product of the market: high scratch resistance, durability and of course the highest performance in terms of design.

 Available in a wide variety of colours

## 01/ Kitchen Space

Reinventing the kitchen to make it the heart of the home

**Connecting the kitchen and living room.**

Gone are the days when the kitchen was a forgotten room in the darkest part of the house. The kitchen is now a key space that can integrate with the living-dining room and share the same design.

In this so-called “reconversion” process, the island plays a major role, as it serves as a connecting element between the two environments as well as a meeting place in the home. In this project, the interior designer built the entire design around the island.

### Island in a classic material

Although this kitchen has a distinctly modern look, the designer has opted for a classic material for the countertop: Silestone Calacatta Gold in a polished finish. The use of a 5 centimeter strip and the diagonal cut on the front side bring modernity and style to a material reminiscent of ancient marble.

→ Kitchen countertop  
Silestone Calacatta Gold, Polished finish

## 02/ Kitchen Space

Islands that turn  
into dining tables

### **Kitchen table and wall cladding in the same material**

In this project, the brown tones of dark wood and the black cladding in Dekton Domoos used on tables and walls, coexist in perfect harmony.

The island, with a built-in sink, is more than just an island. It turns into a genuine dining table of substantial proportions. The bioethanol fireplace serves as a divider between the kitchen and the living area.

The result is an elegant, well-balanced and warm space. The use of large-format cladding, 320 x 144 cm, creates the illusion of an uninterrupted, jointless surface that gives depth to the room, whilst ensuring easy maintenance and cleaning.

The touch of darkness is provided by Dekton Domoos, a beautiful material from the Solid Collection in a matte finish, perfect for lovers of sobriety. On the other hand, chocolate brown is used on the leather high chairs and the fireplace mantel.

→ Kitchen countertop  
Dekton Domoos

## 03/ Kitchen Space

Kitchen in Calacatta  
Gold and wood.  
Classic Scandy

**Wall, countertop and island  
in the same material**

The success of this project lies mainly in the use of a beautiful and timeless material reminiscent of ancient marble: Silestone Calacatta Gold. This white surface with grey veins is used for the front cladding -featuring built-in extractor fan and alcoves-, countertop and island, thus achieving a beautiful combination of classic and modern.

In contrast to the coolness of the white and the effect of the marble, the cabinets, floor and seating around the island are all in honey-coloured wood. Finally, the designer wanted to give the kitchen a deco touch. To this end, they used black on both sides of the kitchen: on the left, the door casing is clad in Silestone Et Marquina; on the right, the large window features an industrial-looking profile.

### Monolithic islands

The beauty of this project lies in the perfect symmetry between the cooking area, with its built-in extractor fan, and the large, monolithic island. All of this, clad in the same classic, timeless, beautiful material: [Silestone Calacatta Gold](#).

→ Kitchen countertop  
Silestone Calacatta Gold, Polished finish

## 04/ Kitchen Space

A stunning  
work surface  
for keen cooks

**A kitchen full  
of character**

In this urban style home with concrete ceilings, the aim was to create a warm, welcoming kitchen where the pleasure of cooking can be enjoyed with friends. Gardening and cooking are the two passions of the owner of this home.

With this in mind, the interior designer planned a cozy kitchen in wood, with a very pleasant living area and a stunning island with a cooking area perfect for cooking for guests.

As for the owner's second great passion, gardening, is reflected in the plants hanging from the ceiling - as if it were an urban garden - and in the many others scattered throughout the rest of the kitchen. Wood and plants meet for a very personal kitchen

### A stunning island in white

Silestone White Zeus was the colour chosen to clad this extra-large island with integrated hob and sink.

In this kitchen, all the attention is focused on the island thanks to its impressive, glossy finish.

→ Countertop  
Silestone White Zeus

## 05/ Kitchen Space

Reinventing the kitchen to make it the heart of the home

### Cubic lines and a play of planes

For this kitchen design, the owner wanted a tidy and functional space that would blend harmoniously with the classic style of their living room furniture. Based on that request, the designer planned a large white island with an integrated sink and cooking area.

A robust, horizontal surface in Dekton Sirius outlines the bar and then continues along the wall, helping to enlarge the space. The steel cooker hood in a double-cube design above the hob finishes off the room. The result is a kitchen carefully designed, in which nothing has been left to chance.

→ Island  
Dekton Bergen (XGloss)

### The island as a sculpture

To bring some movement and character to this kitchen, the designer chose Dekton Bergen in polished finish for the island. This material, from the Stonika XGloss Collection, is inspired by Portobello stone.

### A stunning black bar

In this kitchen, Dekton Sirius bar extends across the island and then continues along the wall. This black textured colour, without veins, contrasts beautifully with the traditional colour of Dekton X-Gloss Bergen.

Furthermore, Dekton Sirius blends in perfectly with other appliances such as taps, ceiling lamps and stools, also in black.

→ Island, Dekton Sirius

# Furniture

Surfaces integrated with  
unique and timeless  
furniture design

## **Dekton, the furniture's skin**

It's on-trend to use the same cladding on the kitchen or bathroom countertop to clad drawers and wardrobes. This allows you to achieve continuous and clean surfaces where joints disappear, creating a monolithic effect.

This decor trend is only possible with the technological evolution of materials. 8 mm and 12 mm thicknesses are ideal for tables and coffee tables. The slim 4 mm thickness format allows kitchen and bathroom furniture cladding, and also answer the creative restlessness of the designer: table tops for the interior and exterior completely personalized and exclusive.

# Furniture

Unprecedented durability and design

Cosentino surfaces redefine furniture thanks to their versatility, durability, and beauty

Dekton Slim Protek, 4 mm thickness makes it an incredibly easy material to work with. Its light weight and properties make it the ideal solution to clad all types of furniture and adapt to any aesthetic proposal: in white and gold, in black and chrome...

Dekton Slim Protek has all the advantages and properties of Dekton, high resistance to scratches and stains.

→ Kitchen furniture cladding Dekton Slim Protek Zenith

## Ideal for cladding wardrobe doors and kitchens

Dekton Slim Protek Zenith and Dekton Slim Protek Opera were the two tones chosen to hide these drawers under the stairs or on the front of the kitchen. The result is a camouflaged surface of this practical storage solution, without compromising the aesthetic of the space.

→ Kitchen furniture cladding Dekton Slim Protek Opera

→ Kitchen furniture cladding Dekton Slim Protek Kreta

### Cabinets integrated into the island

Dekton Slim Protek is the perfect solution to clad drawers in the kitchen island, achieving a monolithic effect.

For this industrial project, the designer chose Dekton Trilium: a finish inspired by volcanic rock with a touch of oxidation, which adds great character to the space.

Once again, Slim's 4 mm thickness allows the creation of an island totally integrated with drawers.

### Unique and marked veins in small surfaces

With Sensa by Cosentino the designer can run with his most creative ideas and choose natural materials with pronounced veining, such as the colour Orinoco.

Sensa by Cosentino is protected natural stone. The designer can choose the part of the stone they want for their design. This has a particular quality: there will never be a table like this one.

### Large cubic blocks

Dekton allows you to clad large furniture pieces as if they were blocks of stone straight out of the quarry. In this space, the designer used [Dekton Aura 22](#), in its large format version, to create a strong center table of extraordinary dimensions.

### Indoor & Outdoor

Another advantage of Dekton table cladding is that it works for both interior and exterior. Its high resistance to UV rays and changes in temperature make it the perfect material for outdoor furniture, avoiding degradation over time.

### Continuous veining composition

La luminosidad y la neutralidad de tono de Dekton Aura 22 se vierten sobre un lienzo personalizado, caracterizado por una fluida continuidad de veta entre las distintas piezas que componen la mesa.

### Total adaptability for modular systems

The lightness of Dekton in its 4, 8, and 12 mm formats allows it to adapt to modular systems or table extensions and create compositions of high esthetic and functional value.

### Ideal for work spaces

The properties of Dekton and Silestone make these materials the perfect choice for work spaces. With their endless possibilities in terms of finishes and designs, they add a deco touch to these spaces and create attractive and functional tables suitable to work from home.
