We are Cosentino

Corporate Purpose

Inspiring people through innovative and sustainable spaces.

Mission

To be a leading company that responsibly imagines and anticipates, with its customers, high value and innovative surfaces for the architectural and design world.

Vision

Lead the global surfacing market by offering innovative architectural solutions that provide design, value and inspiration to our customers' lives.

Safety First

Certifications

Cosentino has an unwavering commitment and respect for the environment and demonstrates this through responsible resource management, guaranteeing a commitment to innovation and continuous improvement of our processes, products, and services on a global scale.

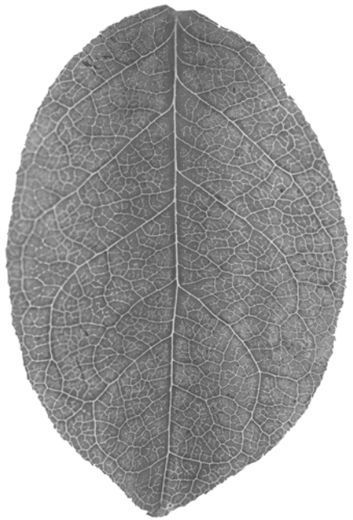
Collective Commitment

Cosentino Sustainibility

At Cosentino®, we approach sustainability as a collective commitment that stems from the individual involvement of those that are a part of Cosentino®.

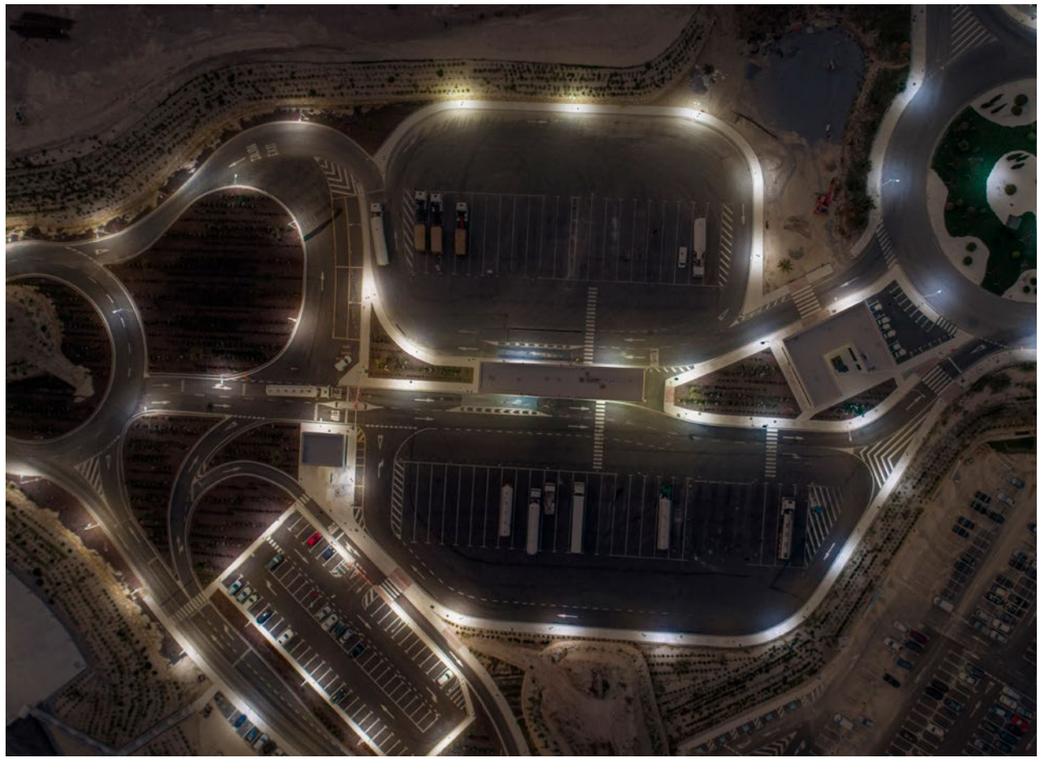
Our continuous improvement efforts involve constant analysis of our entire value chain - from the acquisition of raw materials to the delivery of the final product to consumers.

We are firmly aligned with the United Nations' 2030 Agenda. As a global leader in the manufacturing and distribution of innovative surfaces from our headquarters in Almeria, Spain, we are committed to driving the path towards local and global sustainability.



→ Olive trees in the Cosentino industrial park

→ LED lighting throughout the Cosentino industrial park



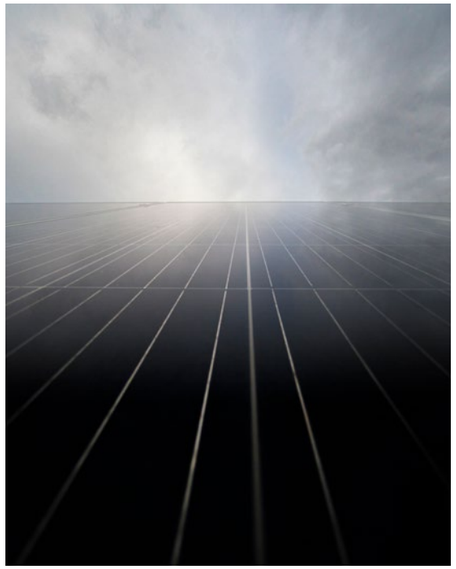
Energy

Energy efficiency and the use of renewable energy sources are the two core elements of our strategy to minimize the impact of our activities.

100% of our energy consumption comes from renewable energy sources, and we aspire to reach 30% energy self-consumption in the coming years.

On the other hand, the constant improvement of our processes and machinery allows us to reach a high level of energy efficiency, which translates into an 8% decrease of our electrical consumption in our production processes.

→ Photovoltaic installations at Cosentino



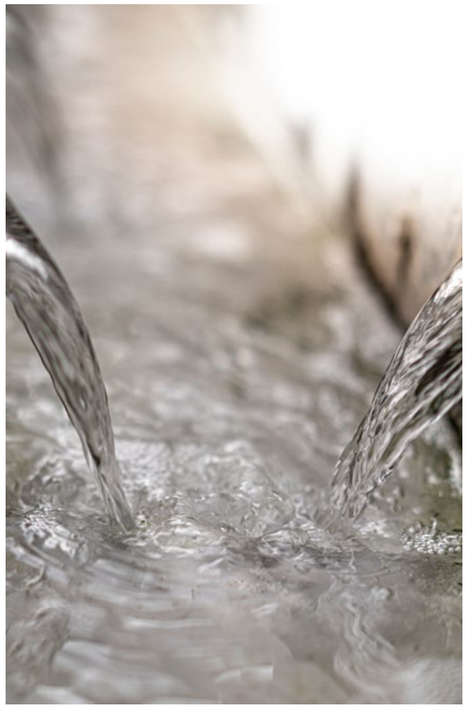
Water

Since our inception, we have valued the importance and understood the challenges of proper water management.

It has motivated us to implement a sustainable use policy maximizing the efficient use of water resources in the different production processes.

We use cutting-edge technology to achieve 99% recycled water in all our processes in the Cosentino Industrial Park.

In addition, we use 100% of the surplus water to irrigate green areas.



Materials

We are committed to making the most of the materials we work with throughout the value chain.

In recent years we embarked on an ambitious R&D project called "Circularity" to reuse the materials from which our products are made.

Another action is the innovative HybriQ+ technology that brings about the new generation of Silestone. HybriQ+ incorporates a minimum of 20% recycled materials and is manufactured with 100% renewable energy and 99% recycled water.

Carbon neutrality: Sustainable design

Cosentino Group is deeply committed to sustainable development in the company's growth strategy, prioritizing respect and protection of the environment.

We address aspects related to the efficient use of natural resources, proper waste management, atmospheric emissions, discharges and other potential impacts in order to make sustainable use of natural resources and protect biodiversity and ecosystems.

At Cosentino we are strongly committed to the 2030 Agenda promoted by the United Nations and the Local Action Plan promoted by the Spanish Government.

As a demonstration of our commitment, we have managed to offset the 42,532 tons of CO2 emissions resulting from one year of Dekton® production, thus obtaining the Zero Carbon Footprint label for the entire product life cycle in 2019 for all Dekton® products.

In addition, the Sunlit Days series by Silestone® is the brand's first collection to achieve the carbon neutral certification.

We calculate our carbon footprint

It is an external body that verifies the calculation and the results of the carbon footprint that is submitted to the Spanish Ministry for Ecological Transition and Demographic Challenge (MITECO, in Spanish), which is responsible for approving and registering our footprint, becoming part of the '**Spanish registry of carbon footprint, offsetting and carbon dioxide absorption projects**' of the Spanish Climate Change Office (OECC, in Spanish), whose results are made public as an exercise in transparency.

This calculation uses energy and/or fuel consumption data, as well as raw material consumption data collected from all **Group subsidiaries** (Centres, Workshops, Cities, HUBs, HQ, etc.) with a view to offset these emissions.

We reduce our impact

We are committed to energy efficiency, emissions reduction and sustainable mobility to minimize our impact.

- **Energy efficiency:** it is a priority for Cosentino to reduce energy consumption in the production process and in the general group activity, which is why we have managed to obtain 100% of the electricity we use from renewable sources.
- **Emission reduction:** 2.8 million euros have been invested in the implementation of an energy management and monitoring system for the heat systems, which allows heat from the Dekton® furnaces to be recovered and used in the dryers, thus reducing emissions.
- **Sustainable mobility:** we have recently joined the 'Plan Sumamos Salud + Economía' under which we have a Mobility Policy that helped us to avoid 230 TCO_2 in 2018.

We offset our emissions

To achieve carbon neutrality in Dekton®, at Cosentino **we offset our emissions over the entire product life cycle** (scopes 1+2+3) by investing in GHG emission reduction projects.

For this purpose, we identify those projects that meet the requirements for responsible offsetting and that, in turn, have a strong social dimension that contribute to the achievement of the **Sustainable Development Goals of the UN's 2030 Agenda.**

The project selected to offset the 42,532 tons of CO_2 emissions, resulting from one year of Dekton® production, has a direct impact on sustainable development by **supporting the local economy, providing training and job opportunities.**

What is HybriQ+ Technology

HybriQ+ is a pioneering and patent registered technology from Cosentino® developed for the manufacturing of the new Silestone®.

A new high-performance blend of premium minerals and recycled materials produced through a sustainable manufacturing process, with 99% recycled water and electric energy from renewable sources.

Dekton®

by Cosentino®

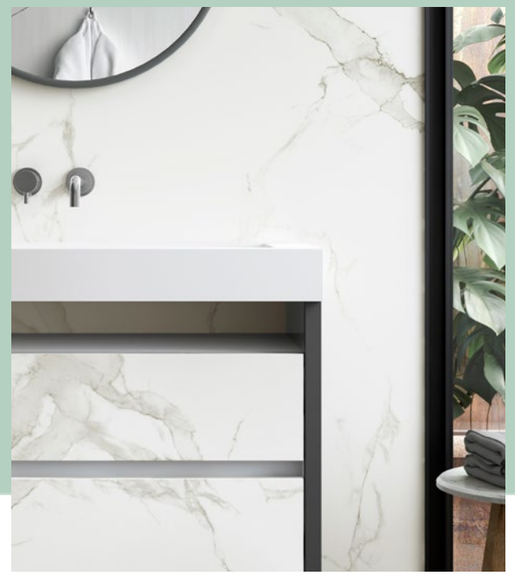
25 Year Warranty DEKTON

DEKTON® Designed by COSENTINO

Innovative design.

Dekton® is a sophisticated blend of over 20 minerals extracted from nature. Its production process is the result of years of research, development, and innovation in the manufacturing of glass, state-of-the-art porcelain and quartz surfaces.

Electron microscopy makes it possible to appreciate the reduced porosity of the material, a consequence of the sintering and ultracompaction process exclusive to Dekton®. This reduced porosity and the absence of micro-defects causing stresses or weak points are the distinguishing features of Dekton®.



Sintered Particle Technology

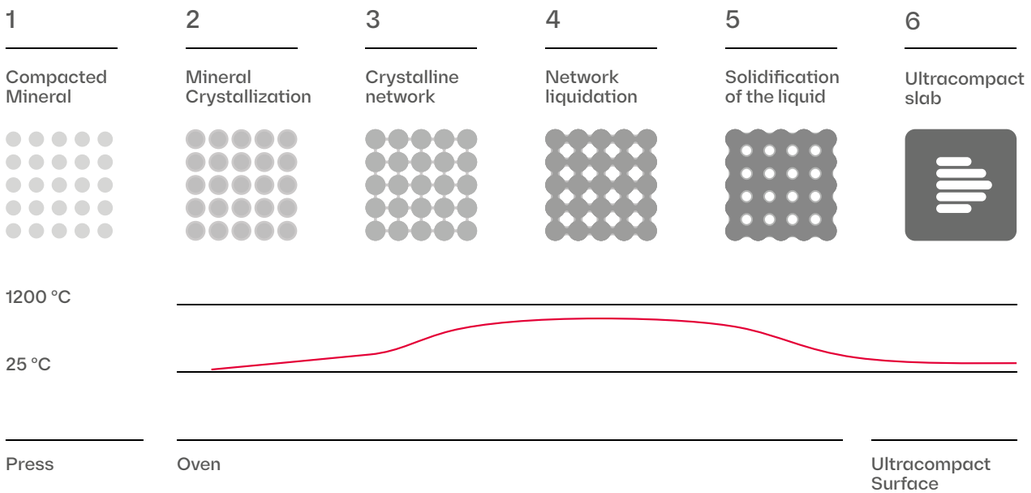
Dekton® uses an exclusive SPT in its manufacturing, capable of sintering mineral particles, bonding them together and compacting their internal structure. This innovative technological process mimics and accelerates the processes that natural stone undergoes when exposed to high pressures and temperatures for millenia.

Dekton® emulates in a few hours what nature takes millennia to do, thanks to the exclusive SPT technology.

- → The furnace has a length of 180 meters.
- → Temperatures reach approximately 1250°C.
- → Total processing time depends on the thickness of the slab (about 4 hours).

Safety in facades and cladding

In order to reinforce safety in ventilated facades and interior cladding, there is the possibility of adhering a safety mesh behind the Dekton® slab, specially developed to prevent falls due to breakage. It is a 300 g/m^2 fiberglass mesh adhered to the material with epoxy resin. Safety is one of Cosentino's main concerns.



Dekton® features

Dekton®
Product features

Dekton® has all the technical specifications required in a high resistance surface to materialize any interior and exterior residential or commercial design project.

Low water absorption

Dekton®'s water absorption is negligible so it does not undergo any expansion movement due to it.

Highly resistant to ultraviolet (UV) light

Dekton® is highly resistant to UV light and will not fade or degrade over time in any kind of outdoor application.

Superior mechanical resistance

Dekton®'s variety of thicknesses allow it to be used in applications where resistance to wind or impact are a project requirement.

Fireproof material

Dekton® can withstand high temperatures without burning, scorching or cracking. European Standard EN 13501 and ASTM E84 testing classifies Dekton® as a noncombustible material.

Color durability

Dekton®'s control of pigmentation and decoration in the manufacturing process provides better color consistency from one slab to another, resulting in a long lasting product that will not fade over time.

Scratch resistant

Dekton® is one of the most scratch resistant surfaces on the market today. It has a rating of seven (7/10) on the Mohs scale for mineral hardness.

Dimensional stability

Dekton® expansion is minimal so it can be installed with thin joints between panels. These joints will keep their width in all conditions.

Resistance to freezing and thawing

Dekton®'s resistance to durability tests in freezing and thawing situations and its application in various weather conditions prove its high performance.

Abrasion resistant

Dekton® is even more resistant to abrasion than granite and porcelain, making it the ideal surface for facades or high-traffic flooring in commercial applications.

Maximum fire and heat resistance

Dekton® has been successfully installed on facades in areas exposed to high temperatures.

Easy cleaning and low maintenance

Most graffiti can be removed from Dekton® with standard cleaning products. Maintenance costs are reduced.

Stain resistant

Dekton® is resistant to stains from a variety of sources so they can easily be removed without altering the surface's finish.

Dekton® Slim

DEKTON® SLIM
Designed by COSENTINO

High aesthetic value and performance in vertical cladding and furnishings.

Minimum Thickness of 4mm →|← Large Format & Performance

01 → Large format and minimum number of joints

Its large format of up to 320 x 144 cm covers large surfaces, minimizing the number of joints and therefore, dirt.

02 → Easy Installation

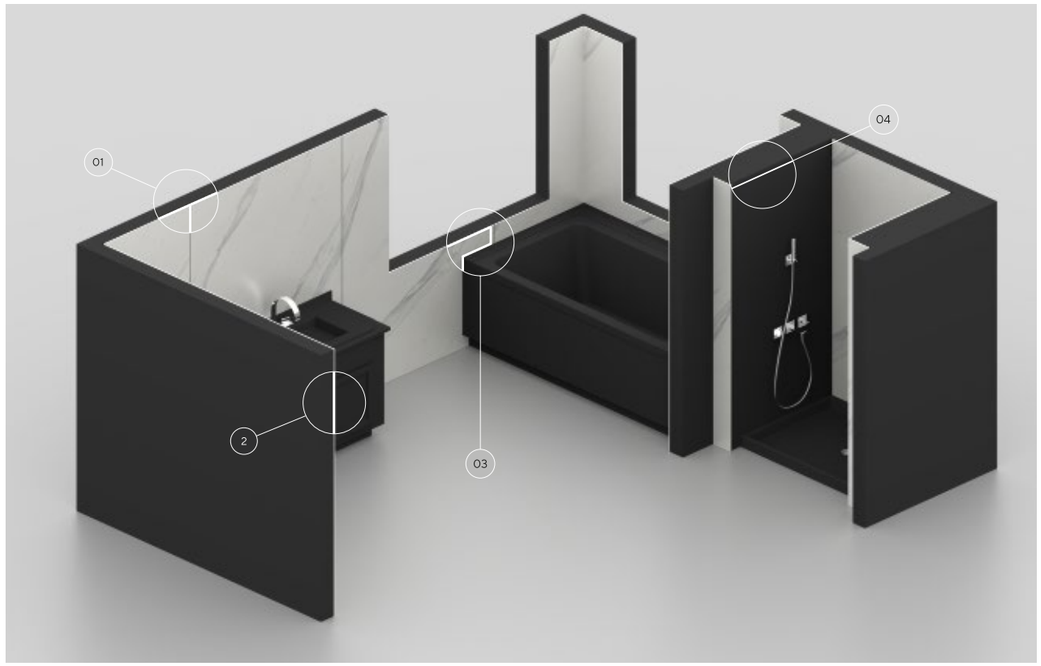
Having such a light format, but with so many possibilities, simplifies everything. Its thin thickness allows for quick cutting and on-site adjustments with ceramic tile tools.

03 → Design without limits

Dekton® Slim is very easy to work with and can be cut to size. It adapts to all spaces.

04 → Maximum resistance to humidity

Dekton® Slim is the ideal ultra moisture and stain resistant coating for bathrooms. A high performance product that requires no more maintenance than a simple damp cloth.



Dekton® Formats

Adaptable and versatile.
In any space.

Dekton® offers a variety of standard sizes, custom sizes and thicknesses to meet the functional and creative needs of the designer in any interior or exterior project, no matter how complex.

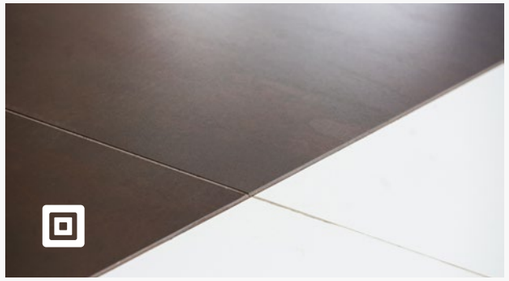
Dekton® Textures

Different Sensations.
Richness of Shades.

Dekton® comes in different textures so that the only limit is the imagination: from the ultra-glossy finish, to matte or velvet textured options.

X-Gloss

A luminous and dazzling finish achieved by mechanical polishing, without the need for enamels or other materials.



Matte

The matte texture pursues a natural, shine-free appearance, ideal for achieving a harmonious and timeless finish. Most Dekton® products are manufactured with this finish.

Velvet

The materials chosen in Velvet create a feeling of warmth and comfort. This texture is perfect in classic colors with veins.

Matte or Textured Velvet

Matte or Textured Velvet textures combine the warmth of velvet with the roughness of a textured, imperfect material. They are ideal for emulating the finish of natural stone.

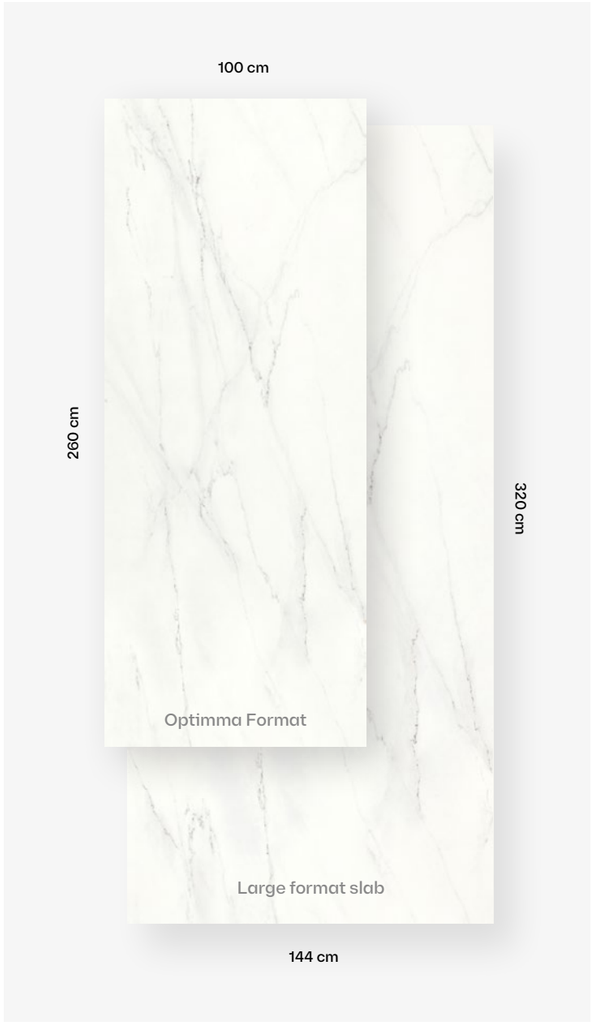
Optimma

New optimized Dekton® format.

The ultimate interior cladding solution.

The Dekton® slab has been optimized with its most common applications in mind to create a new format with improved cost, design, installation and handling. Introducing our first Optimma family format specifically for cladding:

Optimma format :
260 x 100 x 0,4 cm.



260 x 100 cm in 4 mm thickness

The slabs are created in 4mm thickness, which gives it a lightness that allows easy handling, and in case of need, it can be easily cut to adapt the product to all spaces.

Cost Efficiency

The sizes are optimized to the most common cladding standards, allowing us to avoid waste, which in turn reduces price.

Design with Purpose

The slab has been created to take advantage of its total height, which makes it much easier to cut it for cladding.

Easy to Install

The product is smaller and lighter, which makes it easier to use, transport and handle. Cutting can be done with simple tools. The edges are already bevelled and the piece is always meshed.

Design Match

The design has been conceived to place the boards vertically to create a continuous design.

Stone Dekoded

New Pietra Kode Collection

Introducing Pietra Kode: the Italian stones of yesteryear recoded by Dekton® for contemporary architecture and design through three series.

We've decoded the stones that dazzled the architects of yesteryear to meet the needs of modern architecture and design. We decipher their molecular structure to recodify it through the exclusive Dekton® technology, improving its attributes and transforming it into a high performance ultracompact stone.

Two thousand years ago, the Roman architect Vitruvio developed three principles that have guided the evolution of architecture until present day.

Reformulated and given a new meaning that meets the demands of architecture and design in the future while keeping the code of shared beauty that has evolved through the centuries, connecting classicism and modernity.

Pietra Kode is a journey through history, timeless architecture and design.

Research is at the core of what we do. Studying behaviors, understanding the demands of the market and always trying to be one step ahead. The question then became: How do we develop a collection that improves upon nature's masterpieces? How do we capture and reinterpret upon all its glorious imperfections? How do we embark on Pietra Kode?

This journey takes us to Italy. Vicenza, Travertino and Ceppo are at the center of this timeless collection. Stones that makes us travel through space and time. Drawing on the very best nature has to offer, Pietra Kode is a collection engrained in Italian classical architecture, with an eye towards the future, one that fits seamlessly into the codes of contemporary design.

Pietra Kode is a versatile tool in the hands of architects and creatives alike. Facades, flooring, bathrooms, kitchens, furniture and many more applications come to life through Dekton's unmatched performance.

Daniel Germani

Beauty, firmness and utility.

Principles which make up the DNA of Dekton®.

But do these canons of classic beauty make sense today? Are they relevant? What about firmness?

Are we faced with new environmental challenges that demand a change in material resistance?

What was once useful, is it still? Should it also answer concepts such as sustainability to be truly useful?

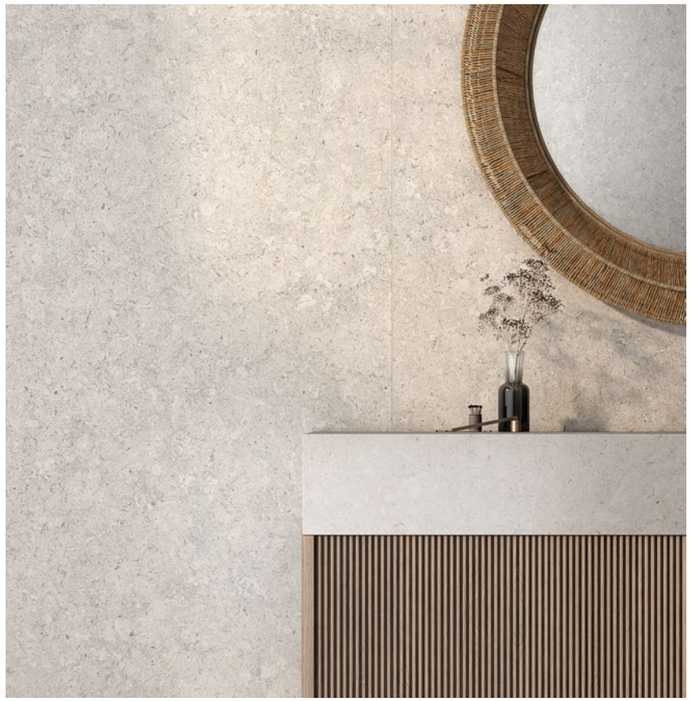
→ Flooring Dekton® VK04 Grafite / Countertop and cladding Dekton® VK02 Avorio

VK01 Nebbia

A creamy white fine-grained base splashed with warm taupe, this versatile color is ideal for facades, flooring, and any interior or exterior cladding project. It reinterprets the texture of Grigio Alpi, a type of Vicenza stone with macrofossils that has been quarried in Italy since Roman times. Its design makes it especially suited for applications that require continuity in design and edges.

VK02 Avorio

In ancient times, silver was considered a gift of nature created by the influence of the moon. This legend lives on in Argentium, a perfect matt grey that can be combined with both warm and cold atmospheres. Its trowelled structure, typical of lime plastering, provides an overwhelming personality to the series.



VK03 Grigio

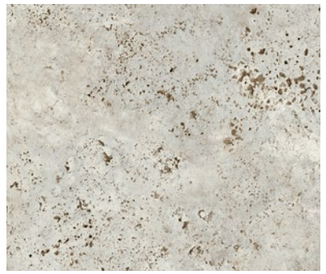
A dance of gray shades with warm accents, it perfectly combines with cream and taupe tones as well as woods. VK03 Grigio in inspired by Grigio Alpi stone, a type of Vincenza with macrofossils made popular by Renaissance architect Andrea Palladio, who used it in villas and palaces in the region of Vicenza. Its design makes it especially suited for applications that require continuity in design and edges.

VK04 Grafite

Its dark base, which intermingles black and gray tones and presents cloud-shaped whitish and reddish patches reinterprets the texture of dark, fine-grained limestone. Its design makes it especially suited for applications that require continuity in design and edges.

TK05 Sabbia

The veins reinterpret Italian Travertine run through each piece in perfect chaos, filling it with nuances. This attractive chromatic recodification of natural stone maximizes the strength and design of the original, doting incomparable beauty and resistance, perfect for rustic or natural environments.



TK06 Marmorio

It is the quintessential Roman stone. Its porous striped structure gives an elegant, bright and lightweight look to any design and takes its inspiration from Travertino Navona, a natural stone quarried near Tivoli, east of Rome.

GK07 Ceppo

The characteristic multiform structure and gray/blue tones of Italian Ceppo di Gré inspire this unique color. Ideal for both interior and exterior spaces, its atemporal design makes it a perfect choice for classic or modern designs.

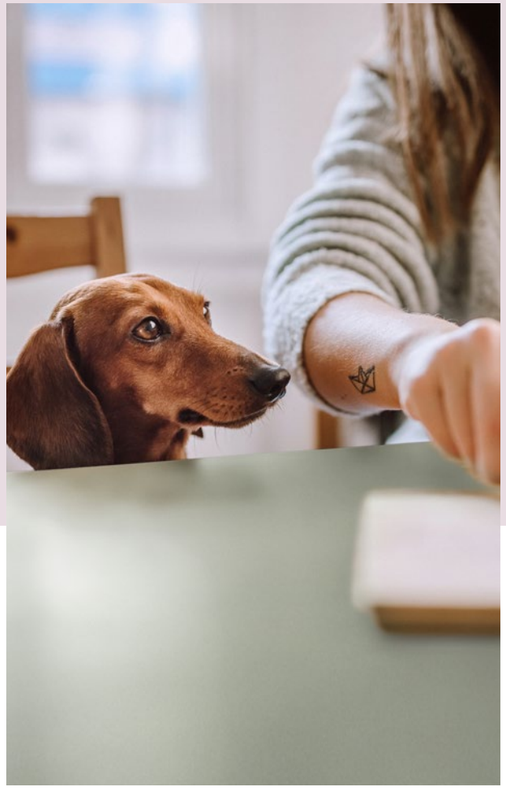
silestone®
Designed by COSENTINO

Silestone®

by Cosentino

The Ultimate Mineral HybriQ Surface



Silestone® is a hybrid surface of premium minerals, quartz, and recycled materials to dress interior spaces with color and texture.

Silestone® advantages.

Silestone® is extremely durable in kitchens, bathrooms and other spaces exposed to constant activity and use. In addition, it offers an unlimited range of colors and textures.

Silestone® has many advantages, including minimal maintenance, high resistance to stains and scratches, and a low fluid absorption rate. This resistance to fluids and its minimal joints make Silestone® the ideal solution for places where liquids are present. Silestone® is resistant and allows for prolonged enjoyment to last a lifetime.

The properties of Silestone® are the result of constant years of innovation that guarantee maximum hygiene and safety.

Acid and Scratch Resistant

Silestone® has a high level of scratch and impact resistance, as well as resistance to external aggressors such as acids common in daily kitchen use.

Impact Resistant

The high impact resistance of Silestone® allows the handling of hard objects (pots, pans, trays, etc.) with total peace of mind.

Stain Resistance

Silestone® is a non-porous surface that is highly resistant to stains from coffee, wine, lemon juice, oil, vinegar, makeup and many other everyday products.

25 year warranty
silestone®

Silestone® Formats

Infinite possibilities for indoor applications.

Silestone® is available in slabs up to 327 x 159 cm and in 30 x 30 cm, 40 x 40 cm, 60 x 60 cm, 60 x 30 cm and 60 x 40 cm tiles. They are marketed in thicknesses of 12, 20 and 30 mm. In addition, different pieces can be combined to simulate thicker edges.

Large format

Jumbo Slab → 327 x 159 cm
Standard Slab → 306 x 140 cm

Floor formats

→ 30 x 30 cm
→ 40 x 40 cm
→ 60 x 60 cm
→ 60 x 30 cm
→ 60 x 40 cm
→ Custom Size

Thicknesses

→ 12 mm
→ 20 mm
→ 30 mm
→ Custom thicknesses adding different pieces

Jumbo Slabs

Cosentino® offers Silestone slabs in Jumbo format (327 x 159 cms max.).This format allows for the creation of large surfaces with minimal jointing, design versatility, and better hygiene. This way, the slabs' use is optimized and waste minimized.

Silestone® Textures

Surface sensory perception.

In order to adapt to all styles, Silestone® offers different textures for any of its applications. Polished, Suede or Volcano are three possibilities that make the imagination soar and bring to life countertops, floors or walls with the desired texture.

Polished

Extreme shine, a smooth surface to the touch and a uniform, intense and consistent color.

Suede

Extra matte finish, offers a flat, non-rugged surface, which conveys a unique experience to the touch for its beauty and fineness.

Volcano

Rustic texture, rough to the touch, but soft at the same time, an attractive and pleasant to the touch surface

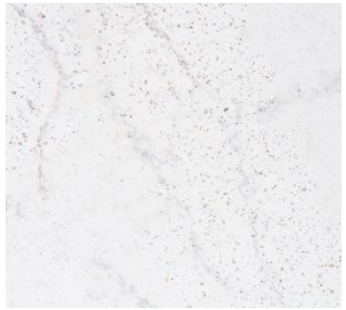
New Le Chic Collection

Le Chic is a unique collection that redefines a timeless classic. A step forward in veined-patterned surfacing. Emblematic natural stone-inspired aesthetics that bring to life the charm of iconic Parisian & Victorian spaces.

The Silestone® Le Chic Collection revisits classic shades through a modern interpretation. New distinctive colours portray a sense of timeless allure with a hint of nostalgia.

Refinement and elegance are recaptured with expressive veins and metallic accents through craftsmanship and innovation. Cream and rich-coloured backgrounds create patterns full of depth.



Eclectic Pearl

A silver desert infused with light.

Flowing streams of delicate tones incrusted with grains like diamonds on jewelry. Eclectic Pearl hypnotizes with delicate veining, texture, and metallic accents across the whole surface.

Versailles Ivory

Golden veins with majestic character.

Versailles Ivory is the warmest tone of the collection. Very subtle two-toned marbling in the background, with gradient effects mesmerize with the flickering lights of its golden sparkle.

Victorian Silver

Evocative patterns
of pearly rivers.

Soft and subtle two-toned marbling in the background, with gradient effects and great depth. The cool background tone blends with its silver and dark gray veins to create an elegant colour that fits seamlessly with warm and cold tones.

Parisien Bleu

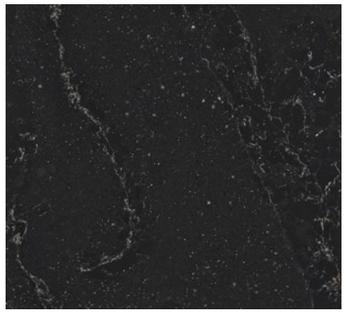
Reminiscent of
the City of Light

Parisien Blue boasts a deep bluish tone with strong personality and powerful character. Inspired by the shades seen in famous Imperial Roman stones, combined with fine veins in ochre tones.

Bohemian Flame

A blazing touch
of coppery glitter.

Bohemian Flame presents subtle sinuous veins with metallic inlays in copper shades. It is inspired by the movement of the golden flows of lava that generate scars on volcanic soil. It is reminiscent of the calmly moving golden flame of candles accentuating tiny metallic pieces.



Romantic Ash

Deep crystal and silver
particles in motion.

Large rivers and incrustations of grains in various sizes awaken memories of a milky way visible on a clear starry sky. The accent of blue strengthens, the depth of Romantic Ash.

The city never sleeps

New Collection Urban Crush

Lines of the underground pump up its veins strengthen its heartbeat. Every corner pulses with movement, delight, joy, relish... It's Urban Crush.

Created for those who love industrial style. For conscious and respectful people.

Seemingly inconspicuous. Dusty shades of the collection present themselves as the most industrial background. A perfect, natural partner for raw and eclectic spaces. But when you look closer, Urban Crush bursts with intensity. It is designed to breathe life into spaces.

Lime Delight

The flash of sun in the nearest building

The textured beige tones of Lime Delight are a versatile base for any interior design, from calm and pure spaces to more unexpected proposals. Its bright warm shades bring to mind radiance of famous Marbella limestone.

Concrete Pulse

The area of concrete never sleeps

The grey tone of Concrete Pulse is perfect for eclectic interiors where it helps to create a vibrant show of contrasts. This natural raw grey tone plays cheerfully with light and shadow.

→ Countertop and cladding Silestone® Cinder Craze

Brass Relish

The sunset in the city

The grained brown of Brass Relish blends seamlessly with the colors and design elements of modern vintage style. This sophisticated elegant color embodies finely grained sandstone.

Cinder Craze

Touch of the industrial surfaces

Almost black and grainy tones of Cinder Craze add style, personality, and life to industrial-inspired interiors. It is a modern reinterpretation of black sandstone. It combines grain and dark accents with white shell veins.

Sensa

by Cosentino®

SENSA
by COSENTINO®

Protected Natural Stone

Sensa by Cosentino® is premium maintenance-free natural stone brought to you by Cosentino, a world leader in the natural stone industry.

Sensa by Cosentino® is treated with a revolutionary stain protection treatment called SenGuard, and comes with a 15-year warranty.

SENSA 15 YEARS WARRANTY

Sensa by Cosentino® Treatment

The long-lasting, chemically-integrating technology allows the material to breathe. This technology enhances its powerful properties.

The process alters the surface tension of the stone causing the material itself to prevent liquids such as water, coffee or oil from penetrating.

Applications

Sensa kitchen countertops.
Natural, stain-resistant beauty.

Enjoy the design, hardness and resistance of natural stone without fear of stains. Sensa by Cosentino® quartzites and granites feature a revolutionary stain-resistant treatment that protects them for the life cycle of your countertops.

Textures

Unique patterns for irreplicable surfaces.

The colors and textures of Sensa by Cosentino® have the patient and whimsical design of nature. Each of the seven available shades has a texture that produces different effects and sensations: suede, polished or caresse.

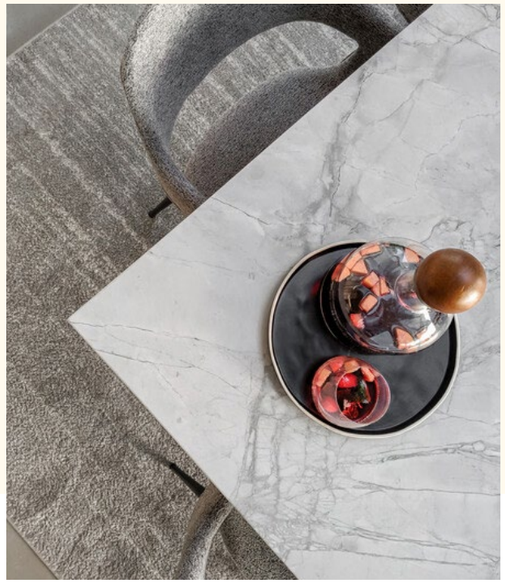
Scalea®

by Cosentino

From the Earth

We have selected the most premium natural stones from the best producer of all time: Earth.



Advantages Scalea®

Scalea® is Cosentino's collection made up of natural stones, chosen through an exhaustive selection process. This collection of natural stones is inspired by the origins of the Cosentino Group, as a brand that has worked with noble materials such as marble, granite, limestones and travertines. Its extraordinary resistance and durability, together with whimsical and unrepeatable designs, make Natural Stone a safe bet for the professional.

- → More than 100 materials in the portfolio.
- → Technical sheets and Declaration of Performance upon request.
- → Stocks locally in our own Centers.

Living rooms

The living room is transformed into a personal and timeless space with Cosentino surfaces; an expression of sophistication and functionality.

Live your space

Rediscover your home's living space

An integrated solution with maximum versatility and functionality.

Endless personalization possibilities.

Limitless customization

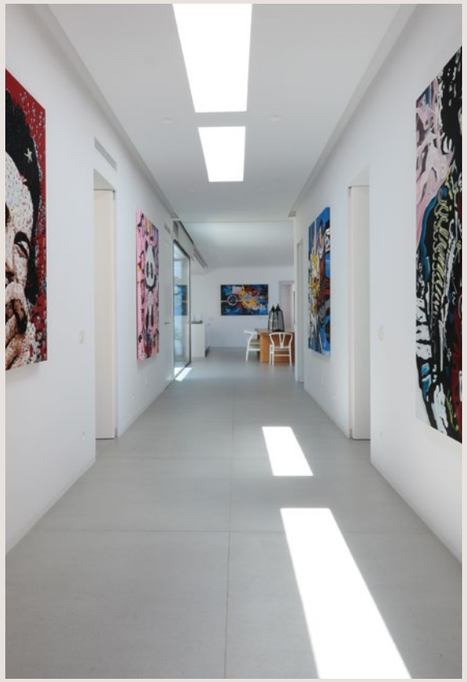
Designing a living room with high aesthetic value requires versatile surfaces in a variety of colors, textures, and unique chromatic pantones, such as Dekton and Silestone, which will cover floors, furnitures, cladding, and more, to create an integrated and differential interior design experience.

Perfect for high-traffic areas

Dekton® is an innovative surface with a high level of resistance, capable of withstanding high temperatures, ultraviolet rays and any scratches. It remains unalterable to wear and abrasion, as a result of the high daily traffic in spaces such as living rooms.

Easy installation

Dekton® is offered in a Slim format which is light, easy to cut, and adaptable to every space. Its thin thickness of 4mm allows adjustments to be made during installation, using tools for ceramic tiles.



Comprehensive solutions

The same material for flooring, cladding and furniture creates visual continuity and high aesthetic impact, unifying spaces and increasing their functionality.

New Dekton® Optimma Format

Dekton® has been optimized for interior cladding. The Optimma format (260 x 100 x 0,4 cm) allows for cost efficiencies, more design possibilities and easy installation and manipulation. The results: impactful cladding and integrated spaces.

Large format, minimal joints

Dekton® Slim's large format up to 320 x 144 cm and thickness of 4 mm allows you to cover large surfaces creating a continuous and homogeneous aesthetic for cladding and furniture.
This size reduces the number of joints, easing cleaning and maintenance.

→ Flooring Dekton® Keon

→ Flooring Dekton® Strato

→ Flooring Silestone® White Zeus

Cosentino Bathrooms

Cosentino® helps you to rediscover your bathroom space through a unique and integrated design concept.

Reimagine the most personal space in the home. Create a unique experience in which the most beautiful and functional Cosentino® surfaces create unique, warm, and exclusive spaces.

From wall and floor claddings in different yet perfectly balanced formats, colors and textures, to attractive vanities and shower trays, carefully designed with great attention to detail and simplicity.

Solutions of great aesthetic and functional value to suit every requirement and style of bathroom, which redefine the way in which we experience such a personal space and feeling of well-being.

Large format

Large format, minimal joints. Tailor-made floors and wall cladding.

Bathrooms are exposed to constant activity. Using a high-quality surface for floors and cladding reduces joints and guarantees hygiene and cleanliness. The strategically placed slabs in XXL make the room look bigger, creating the sensation of a larger bathroom.

Shower Trays

Shower trays with Dekton® Grip/ Grip+ and Silestone®: exclusive and integrated designs in the bathroom with limitless customization possibilities.

Cosentino® offers an extensive collection of shower trays in the material the architect or designer chooses and adaptable to any space. It is an interesting alternative to the traditional shower that simplifies installation and assembly.

Sinks

Sinks and vanity tops with great versatility that adapt to any space. Sophisticated designs with maximum beauty and durability.

Silestone® sinks are built with a unique and innovative design able to live up to the most demanding creative proposals. From sinks that integrate into the vanity top, to overmount options, double bowls...everything is possible with tailor-made fabrication.

Optimma Format

Dekton® Optimma Format. Optimized for interior bathroom cladding: taking full advantage of the space, easy installation, and design continuity in a vertical format.

The Optimma slab format is available in 260 x 100 cm and 0.4 cm thicknesses, and is able to meet any vertical cladding need to create a continuous design, taking advantage of the full height with easy installation and minimum waste.

Total Integration

Total aesthetic integration and visual continuity. The same material for your entire bathroom: floor, cladding, shower tray, and sink.

A single surface applied to every component of the bathroom allows for complete esthetic homogeneity, creating harmony, balance, and amplitude.

Colors and textures

New collections of innovative, on-trend colors and textures, to create bathroom spaces full of originality and impact.

Innovative Silestone® and Dekton® surfaces possess a wide variety of solid and veined colors, unique chromatic pantones, and sensory textures to rediscover bathroom spaces.

High transit resistance

It remains unalterable faced with daily erosion and abrasion in outdoors spaces, used in terraces, stairs and pool surroundings.

Dekton® Outdoor Countertops

Dekton® outdoor countertops are is resistant and durable. Innovative surfaces turn into functional and beautiful countertops.

Cosentino Kitchens

Reinventing the kitchen to make it the heart of the home.

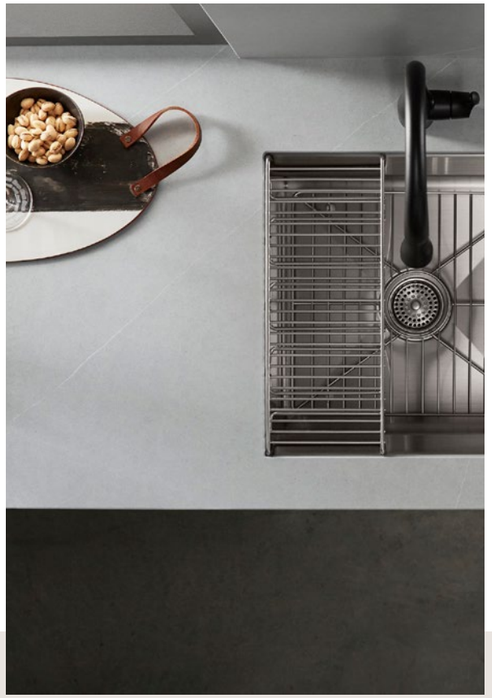
It's been a long time since the kitchen was a forgotten room in the darkest part of the house. The kitchen is now a key space that can integrate with the living-dining room and share the same design.

Integration within the space

The kitchen as a living space which connects to the rest of the house. Total integration of the worktop with the living room cladding or floor.

Kitchen Countertop and Island

Thousands of households all over the world have trusted Cosentino to provide them with a kitchen that is not only functional and beautiful, but also plays a key role in the daily lives of their families. We offer a wide range of colors and textures, so you're sure to find your perfect countertop.



Kitchen Flooring and Cladding

In this so-called "reconversion" process, the island plays a major role, as it serves as a connecting element between the two environments as well as a meeting place in the home. In this project, the interior designer built the entire design around the island.

Furniture

Surfaces integrated with unique and timeless furniture design.

Dekton®, The skin of the furniture

It's on-trend to use the same cladding on the kitchen or bathroom countertop to clad drawers and wardrobes. This allows you to achieve continuous and clean surfaces where joints disappear, creating a monolithic effect.

This decor trend is only possible with the technological evolution of materials. 8 mm and 12 mm thicknesses are ideal for tables and coffee tables. Dekton Slim 4mm thickness allows kitchen and bathroom furniture cladding, and also answers the creative restlessness of the designer: table tops for the interior and exterior completely personalized and exclusive.

Furniture

Unprecedented
durability and design.

Cosentino® surfaces redefine furniture thanks to their versatility, durability, and beauty.

→ Kitchen furniture cladding Dekton® Slim Opera

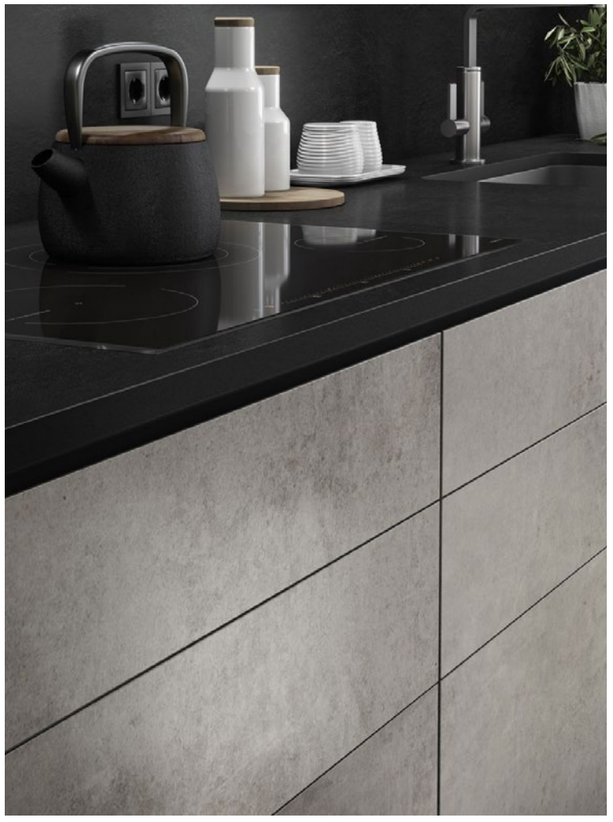
Dekton® Slim, 4 mm thickness makes it an incredibly easy material to work with. Its light weight and properties make it the ideal solution to clad all types of furniture and adapt to any aesthetic proposal: in white and gold, in black and chrome...

Dekton® Slim has all the advantages and properties of Dekton, including high resistance to scratches and stains.

Ideal for cladding closet doors and kitchens

Dekton® Slim Zenith and Dekton® Slim Opera were the two tones chosen to hide these drawers under the stairs and on kitchen cabinetry. The result is a camouflaged surface of this practical storage solution, without compromising the aesthetic of the space.

→ Kitchen furniture cladding Dekton® Slim Kreta



Cabinets integrated into the island

Dekton® Slim is the perfect solution to clad drawers in the kitchen island, achieving a monolithic effect.

For this industrial project, the designer chose Dekton Trilium: a finish inspired by volcanic rock with a touch of oxidation, which adds great character to the space.

Once again, Slim's 4 mm thickness allows the creation of an island totally integrated with drawers.

→ Table top Dekton® Trilium

→ Table top Silestone® Eternal Statuario

Ideal for work spaces

The properties of Dekton® and Silestone® make these materials the perfect choice for work spaces. With their endless possibilities in terms of finishes and designs, they add a deco touch to these spaces and create attractive and functional tables suitable to work from home.
